**Asian Development** William E. James,Seiji Naya,Gerald M. Meier,1989

While the world s attention has been focused on the spectacular economic success of Japan and Korea the less developed countries of Asia have often been neglected Asian Development closes the gap In nontechnical style and with minimal mathematics it presents an in depth perspective on the economic development of fourteen countries in East Southeast and South Asia Asian Development is mainly a story of success Though some problems remain Asian countries have shown remarkable resilience in responding to sharp changes in the international economy oil shocks world recession and inflation exchange rate and interest rate fluctuations and rapid technological change The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies Looking back they comment In the past growth of the United States and Japan pulled up the growth rates of the smaller economies in the region Looking forward they predict In the future increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies

Dick,2002 Multilateral and bilateral aid agencies now direct much of their East Asia activities to so called governance reform Almost every major development project in the region must now be justified in these terms and will usually involve an

element of legal institutional reform anti corruption initiatives or strengthening of civil society and often a mix of all of these Most are in fact major exercises in social engineering Aid agencies and major multilateral players like the IMF the World Bank and the Asian Development Bank are attempting not just to improve governance systems and combat corruption but implicitly to restructure entire national political systems and administrative structures Conditionality puts real weight behind these projects If successful they could transform the face of East Asia Defining governance and understanding corruption are therefore not minor issues of terminology However a great deal of optimism is required to believe that social engineering for good governance will succeed in either Indonesia or Vietnam within the foreseeable future In Indonesia there is neither the political will nor the mechanism to act since the legal system is itself utterly corrupted Better laws have been passed but they fail in implementation In Vietnam the problems are somewhat different but the outcomes are similar Corruption is widely recognised to be a major political social and economic issue even by the Party itself but few cases are ever tried The bureaucracy including the legal system and the party are so complicit that reform is impossible These systemic problems point to the basic flaw in the good governance agenda and strategy A politically powerful alliance of foreign and domestic interests is necessary Foreign multilateral agencies donors and NGOs are able to set the international policy agenda but their domestic allies are politically weak In the absence of rule of law the basic institutions of these transitional societies remain largely as they were and there is as yet no viable alternative system in either Indonesia or Vietnam The argument of this book is that more might be achieved sooner by much better understanding of political legal commercial and social dynamics in Indonesia and Vietnam not as they are meant to be but as they are Multilateral agencies donors NGOs business firms and scholars on the one hand and local politicians bureaucrats business people lawyers journalists academics and NGOs on the other hand have much usefully to discuss Only out of that dialogue a dialogue between the world as it is and the world of ideals can steady progress be made This book examines these problems initially in an abstract theoretical sense before testing the frameworks thus established through a series of case studies of Indonesia and Vietnam two very different Asian states one Vietnam still socialist but in difficult transition from command economy to a limited market structure the other Indonesia embracing a market economy and an emerging democratic system one with a Confucian legal and political tradition the other not one with a socialist the other a civil law legal system The book is divided into three parts The first Frameworks establishes some theoretical approaches to the problem of corruption and governance including a East European example The second part looks at case studies from Indonesia and the third part looks specifically at Vietnam Relevant legislation and judicial decisions can be found in the table of cases and a detailed glossary and list of abbreviations will assist readers unfamiliar with the countries under examination ABOUT THE CONTRIBUTORS Ibrahim Assegaf is the Executive Director of the Centre for Indonesian Law and Policy Studies Pusat Studi Hukum dan Kebijakan Indonesia and the Managing Director of the Indonesian law website <http://www.hukumonline.com> He is also a member of the Steering

**Asian Economy and Finance:** Dilip K. Das-Gupta, 2006-03-30 Topicality of Asian economy has refused to fade for almost four decades if anything it has been levitating The Asian economy has changed markedly since the economic and financial crisis of 1997 1998 and is continuing to evolve As a scholarly subject matter Asian economy has not stopped attracting academicians policy mandarins decision makers in the arena of business and students of Asian economy The Asian crisis was a cataclysmic event for the region and brought to the surface several systemic limitations like those in the financial sector corporate governance regulatory oversight legal framework and exchange rate management Managers of Asian economy need to get to the bottom of these acutely problematical systemic issues Additionally Asian economies need to change with the demands of time and devise their post crisis development strategy Asia's growth model that served it so well for four decades is overdue for renewal so that it can re-strengthen its bonds with the ever evolving regional and global economic reality The old growth model is likely to be less relevant and effective in the post crisis future of the Asian economies It is sure to run into the wall of diminishing returns An outstanding feature of Asian Economy and Finance A Post Crisis Perspective is that unlike most Asia related books it is written in a comprehensive and authoritative manner and covers large areas of Asian macro economy and finance The noteworthy areas of focus include global and intra regional trade and investment as well as financial and monetary aspects In depth discussions have been provided on regional integration through expanding trade financial flows regional production networks and financial and monetary co-operation In taking a contemporary or post crisis view of the Asian economy this book offers the newest knowledge related to relevant themes on the Asian economies as well as the latest concepts In a succinct manner this book

deals with the principal normative and positive strands with which one need to be properly familiar in this subject area This tightly written volume covers a great deal of ground and imparts knowledge on the Asian economy related themes to students researchers and policy makers alike The book is neither overly technical nor model oriented It is easy to access for the target readership because of its descriptive analysis style which stops short of mathematical formulations and econometric modeling Many students and other readers who have good analytical minds and sound knowledge of economic principles feel lost in mathematical formulations This writing style makes it accessible to a much larger number of readers

**Sustainable Urbanization** Mustafa Ergen,2016-09-28 The rapid urbanization that began with industrialization has begun to cause many problems New approaches are emerging today to minimize these problems and make urban areas more livable These problems include insufficient social facilities in urban areas for increasing populations due to migration and unbalanced use of green areas water and energy resources due to urbanization Careless consumption and the pollution of natural resources will cause people many more problems in the future than they do today in urban development Many professional disciplines have noticed this unbalanced development in urban areas Urban areas have larger populations than rural areas today Urban areas are developed neglectfully Sustainability is needed as a criterion for urban areas to develop in a more livable and healthy fashion Sustainable urban development approaches are seen in many fields ranging from land use to the use of natural resources in urban areas
