

The population of the United States is expected to grow over the next ten years at a rate of 0.1%. (In 1980, the rate was 2.2%.)¹

Economic growth is simply the rise in workers and their productivity.

We need more workers, but 10,000 Americans are retiring every day.²

Corporations need to reinvest in productivity and the government should look at worthwhile infrastructure projects.

Growth from productivity leads to a higher standard of living. It is a goal everyone should strive to achieve. Unfortunately, growth in productivity has been slowing for decades.

U.S. corporations are holding around \$3 trillion overseas to avoid taxes. We need policy to encourage that money to be brought home.

The average age of retirement in the United States.³ Many older Americans just don't have the health to productively work full-time.

Does Law Matter? Michael G. Faure, J. M. Smits, 2011 One of the most discussed questions in social science of the last decade is to what extent differences in economic development among countries can be explained by differing law and institutions According to the legal origins thesis the answer is clear it claims that differences in economic performance are to a large extent dependent on whether a country belongs to the civil law or common law family Others have severely criticised this thesis This volume takes stock of the debate and offers an integrated approach that not only takes into account the insights of economics but also of comparative law and empirics Page 4 of cover

Economic Law as an Economic Good Karl M. Meessen, Marc Bungenberg, Adelheid Puttler, 2009-07-29 Governments or at least the clever ones among them are aware of the factors guiding business activities In the course of adopting and enforcing economic legislation they seek to attract business activities in order to increase national income and fiscal revenues generate employment opportunities and very generally please voters Hence economic law may be considered an economic good as suggested by the title of this book That function which most rules of economic law have in the competition of systems was strengthened by the worldwide liberalization of trade Today it is of greater significance than ever before Lawyers and economists academics and practitioners from inside and outside Germany have taken a look at the facts and discussed approaches to conceptualizing them The resulting thirty essays collected in this volume contribute to the interpretation of existing and the making of new economic law

The New Horizon of China's Economic Law Theory Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and

prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory Emerging Economies and the Transformation of International Business Subhash C.
