Economics Crosscurrents Of The American Dream:

Economics STAR Review Paul Stich, George Habib, 2002-03 Correlates with national standards for functioning as economically literate citizens Engages students with cooperative discussion questions Motivates with engaging reading writing and critical thinking activities Challenges students with major portfolio projects and authentic assessment Explores basic economic theory and issue oriented discussion on business entrepreneurship the enterprise system governmental roles and personal finance Lincoln and the Economics of the American Dream G. S. Boritt, 1994 This unique exploration of Lincoln's economic beliefs shows how they helped shape his view of slavery his conduct of the war and most fundamentally his understanding of what the United States was and could become **Black Community Uplift and the Myth of the American Dream** Lori Latrice Martin, 2018-10-26 The book uses the politics of respectability concept as an appropriate framework to show why racial disparities between black and white people in America persist The politics of respectability originated with black Baptist women in the late 19th and early 20th centuries Sadly the politics of respectability is under utilized and often confused with respectability politics The book using the politics of respectability to examine three important myths the myth of the American Dream the myth of America as a meritocracy and the model minority myth Additionally the politics of respectability is used to understand BlackLivesMatter and recent NFL protests led by Colin Kaepernick **Cavaliers and Economists** Katharine A. Burnett, 2019-05-15 Offering a compelling intervention in studies of antebellum writing Katharine A Burnett's *Cavaliers and Economists: Global Capitalism and the Development of Southern Literature 1820-1860* examines how popular modes of literary production in the South emerged in tandem with the region's economic modernization In a series of deeply historicized readings Burnett positions southern literary form and genre as existing in dialogue with the plantation economy's evolving position in the transatlantic market before the Civil War The antebellum southern economy comprised part of a global network of international commerce driven by a version of laissez faire liberal capitalism that championed unrestricted trade and individual freedom to pursue profit Yet the economy of the U S South consisted of large scale plantations that used slave labor to cultivate staple crops including cotton Each individual plantation functioned as a racially and socially repressive community a space that seemingly stood apart from the international economic networks that fueled southern capitalism For writers from the South fiction became a way to imagine the region as socially and culturally progressive while still retaining hallmarks of traditional southern culture namely plantation slavery in the context of a rapidly changing global economy Burnett excavates an elaborate network of transatlantic literary exchange operating concurrently with the region's economic expansion in which southern writers adopted popular British genres such as the historical romance and the seduction novel as models for their own representations of the U S South Each chapter focuses on a different genre pairing largely under studied southern texts with well known British works Ranging from the humorous sketch to the imperial adventure tale and the social problem novel

Cavaliers and Economists reveals how southern writers like Augusta Jane Evans Johnson Jones Hooper Maria McIntosh William Gilmore Simms and George Tucker reworked familiar literary forms to reinvent the South through fiction By considering the intersection of economic history and literary genre Cavaliers and Economists provides an expansive study of the means by which authors created southern literature in relation to global free market capitalism showing that in the process they renegotiated and rejustified the institution of slavery

Knowledge and Power in the Global Economy David Gabbard, 2017-07-05 Advancing a three fold political agenda this volume illuminates how the meanings assigned to a whole vocabulary of words and phrases frequently used to discuss the role and reform of U S public schools reflect an essentially economic view of the world contends that education or educational reform conducted under an economized worldview will only intensify the effects of the colonial relations of political and economic domination that it breeds at home and abroad and offers a set of alternative concepts and meanings for reformulating the role of U S public schools and for considering the implications of such a reformulation more generally for the underlying premises of all human relationships and activities Toward these ends the authors in Part I critically examine many of the most commonly used terms within the rhetoric of educational reform since the early 1980s and before Part II links today s economized worldview to curricular and instructional issues These essays are especially important for comprehending how the organization of school curriculum privileges those disciplines deemed most central to market expansion math and science and how the political centrality of the economic sphere influences the nature of the knowledge presented in specific content areas Given that language constrains as well as advances human thought the twin tasks of de economizing education and decolonizing society will require a vocabulary that transcends the familiar terminologies addressed in Parts I and II The entries in Part III cultivate the beginnings of such a vocabulary as the authors elucidate innovative concepts which they view as central to the creation of truly alternative educational visions and practices

Cross Currents Cindy Scheopner, Ian M. Sullivan, 2014-07-24 Philosophy begins with a question The same question is often asked in different languages Comparative philosophy is a project that engages thinkers from all areas of the world and approaches common problems from different perspectives The conversations look at not only interactions between cultures but also the relationships among humans animals and nature But the many languages and unfamiliar terms can seem intimidating even to those with formal philosophical training This book provides an approachable survey of current topics from some of the newest comparative philosophers as they enter the field Arising out of a graduate student philosophy conference at the University of Hawai i these selected papers were revised to respond to the suggestions and challenges presented during the conference For this volume foreign terms are translated and introductions and editors notes give context to the individual chapters Ignoring the traditional divisions of academic philosophy this anthology focuses rather on the common search for answers by bringing thinkers from what are labeled eastern and western philosophy into conversation with one another as members of the global community
