Economics For A Civilized Society:

Economics for a Civilized Society Greg Davidson,1996 *Economics for a Civilized Society* G. Davidson,1996-08-21

Economics for a Civilized Society incorporates both self interest and civic value motivations to provide an understanding of how our economic system works and how we can develop economic policies that assures a prosperous and civil society. Conventional economics policies involving inflation the money supply unemployment international trade and payments require that some people suffer so that others thrive in a zero sum game context. Civilized economic policies will employ all of society's resources to work for the betterment of both individuals families and the community. From taxes to international trade the Davidsons show how to surmount today's seemingly intractable economic problems with civilized programmes.

Economics for a Civilized Society Greg Davidson,Paul Davidson,1996 A revised presentation of an economic theory taking into account the civic responsibilities of individuals communities and government. Levine,2013-01-11 First published in 1977 David Levine's *Economic Studies* offers a critique and reconstruction of the theoretical conception of economic life. The premise of the study is that only an investigation of the system of elementary economic relations value capital production can overcome the confusion and misdirection which baffles progress in all areas of economic theory and lay the foundation for further development of economic science. Levine discusses both the origins of economic science and the character of contemporary economic thought. He presents a critique of the ideas of classical political economy and of the notion of a labor theory of value which excludes the possibility of a science of economic relations.

Economics and Sociology: Towards an Integration T. Huppes,2013-11-09 In recent years economics has been the subject of increasingly severe criticism. It has failed both to predict and to counteract the economic crisis now afflicting nearly the whole Western world. Economic life is more disrupted than ever the rate of inflation has risen alarmingly unemployment has not been as high since the 1930s economic growth is stagnating there is increasing opposition to the inequality in the distribution of income and wealth on a national scale as well as in the world at large the process of economic integration EEC GATT UNCTAD is being thwarted programmes of economic development in the third world have not produced the desired effects etcetera. Obviously it would not be fair to put the blame for the crisis on economic science. But the present predicament does call for serious consideration of the limitations of economic explanation. Among the social sciences economics is unquestionably the most advanced discipline. Its very sophistication however leads it to abstract from social

phenomena such as norms institutions power conflict and social change Thus the manifest influence of sociological variables on the course of economic processes remains hidden Dominating this book as a drumbeat is the conviction held by the several authors that a clearer grasp of the current problems may be obtained if economists and sociologists are prepared to co operate more closely An interdisciplinary approach is warranted the distinction between the social sciences should be less sharply drawn
