Economics Of Industrial Policy:

Industrial Policy in America Marco R. Di Tommaso, Stuart O. Schweitzer, 2013-01-01 In contrast to what observers have frequently argued this timely and thought provoking book suggests that the concept of industrial policy is not alien to the American past and present The debate on this topic in the US has always been full of contradictory rhetoric and policy practices and the expert authors therefore acknowledge a need to rethink the traditional antagonist positions They illustrate that contemporary markets continue to demand to be fixed by government policies and governments continue to show how fixing the market policies might fail The conclusion is that the future of industrial policy is about how to make both markets and governments better in their functioning but that the real goal for industrial policy is to make better market and better government policies consistent with the goal of building a better society Affirming that it is time to break the taboo and discuss the nation's goals targets and tools to develop a new effective American industrial policy this pathbreaking book will prove a thought provoking and challenging read for students academics and policymakers with an interest in political economy and industrial policy public sector and international economics

Economics of Industrial Policy and Strategy D. G. McFetridge, 1986 The papers in this volume are concerned with industrial strategy what it is and which strategy if any Canada should adopt Each paper approaches the issues in a different way and yet there is a common thread to their conclusions

Economics And Politics Of Industrial Policy Steven A. Shull, 2019-03-08 Industrial policy is a good example of the growing economic and political interdependency between Europe and the United States The contributors to this volume which compiles the proceedings of the seventh conference sponsored by the Institute for the Comparative Study of Public Policy examine the ways in which national and supranational in the case of the European Community industrial policies are implemented It is thought that diversity within the country is the primary reason why the United States does not have a comprehensive national policy There is a consensus among the authors that the U S economy is less subject or amenable to central government planning than the economies of Europe In Europe there is more interest in coordinating industrial policy throughout the European Community but here too the failure to adopt a comprehensive policy reveals the enormous diversity and parochialism that conflict with supranational goals The contributors conclude that while a centrally planned and implemented industrial policy may be desirable we do not have the means to achieve it Acknowledging the major industrial and trade problems facing the United States and Western Europe the authors feel that it is not clear whether these problems can be resolved by government intervention

Losing Time Otis Graham, 1994-01-04 Industrial policy reform Otis Graham argues is an important part of a public private set of remedies but it hinges upon an improved use of policy history and of historical perspective generally He proposes an explicit if minimalist approach by the federal government that would unify and reform our de facto industrial policies in order to equip the United States with the institutional capacity to formulate industrial interventions guided by

strategic vision and bipartisan participation by labor and management

Industrial Policy in an Era of Globalization

Marcus Noland, Howard Pack, 2003 Globalization reigns supreme as a description of recent economic transformation and it carries many meanings In the policy realm the orthodox terms of engagement have been enshrined in the Washington consensus But disappointing results in Latin America and transitional economies plus the Asian financial crisis have shaken the faith in Washington and elsewhere One response has been to hark back to the more statist policies that the consensus marginalized In this regard Japan Korea and Taiwan are promoted as the poster nations that have derived great benefits from increasing integration with the international economy without surrendering national autonomy in the economic or cultural spheres effectively beating the West at its own game The fundamental questions addressed in this monograph are whether industrial policy was indeed a major source of growth in these three economies and if so can it be replicated under current institutional arrangements and if so is it worth replicating or would developing countries today be better off embracing the suitably refined orthodoxy

The Aims and Instruments of Industrial Policy Organisation for Economic Co-operation and Development, 1975 *International Handbook on Industrial Policy* P. Bianchi, 2008-01-01 This timely and much needed Handbook reconsiders an old topic from a fresh perspective raising a number of new interesting and worthwhile issues in the wake of ten years of globalization This comprehensive analysis illustrates that old style industrial policies whereby the government directly intervened in markets and was often the producer itself are no longer relevant Structural changes occurring in economies summarized in the term globalization are triggering the definition and implementation of new industrial policies The contributors leading experts in their field unite to evaluate this shift of over a decade ago Employing various empirical and methodological approaches with a strong theoretical underpinning this world wide study of the state of the art of industrial policy issues is an invaluable reference tool It has been enthusiastically received by a wide ranging audience including scholars researchers and policy makers with an interest in industrial economics and policy business studies and policies for growth competitiveness and development

Huang,2021-03-12 The debate on industrial policy has been in full swing among the academic circles in recent years The crux of this debate is not whether China needs industrial policies but rather the kind of industrial policies it wants Given the profound changes to the domestic and international environments and institutional background during China s industrial development industrial policies must be able to make up for market failures while avoiding government failures To this end it is suggested to establish a market friendly industrial policy system dominated by functional industrial policies in accordance with the requirements of building an interactive and cooperative government market relationship to help transform and upgrade China s industries *Industrial Policy Vs. International Integration Miroslav N. Jovanović,2007-01-01 International economic integration has played a significant part in economic policy decisions for most countries and regions throughout the world over decades This text looks at why the success of integration schemes has been so variable and what the prospects are for integration in the future

Economic Planning and Industrial Policy in the Globalizing Economy Murat Yülek,2014-09-04 This book discusses national development planning in the context of a globalized world economy National economic development planning the process of defining strategic economic objectives for a country and designing policies and institutional frameworks to attain them was popular in many countries in the 1960s and 1970s Over time it lost its appeal More recently with globalization accelerating and economic competition increasing it is making a comeback in different countries under different forms

National planning in this new era is different than the earlier quantitative planning approaches. It employs different tools such as strategic visions and action plans, revived forms of physical infrastructure planning, industrial policy, and cluster policy. Built on the research of international scholars with firsthand knowledge of the countries in question, this volume presents and evaluates current national planning strategies and policy worldwide. It will be of interest to both academicians who study and teach globalization and development as well as policy makers who may use it as a reference as they contemplate their own strategies.

Annual World Bank Conference on Development Economics 2010, Global Justin Yifu Lin, Boris Pleskovic, 2011-05-17 The Annual World Bank Conference on Development Economics ABCDE is one of the world's best known series of conferences for the presentation and discussion of new knowledge on development. The conference provides a forum for the world's leading development thinkers to share new knowledge and ideas. Lessons from East Asia and the Global Financial Crisis was the theme of the ABCDE held in Seoul, Republic of Korea, on June 22-24, 2009. The conference was co-organized by the Government of the Republic of Korea, the Korea Development Institute (KDI), and the World Bank.

The Industrial Policy Revolution I Justin Lin Yifu, 2013-12-16 This volume is the result of the 2012 International Economic Association's series of roundtables on the theme of Industrial Policy. The first New Thinking on Industrial Policy was hosted by the World Bank in Washington, D.C., and the second New Thinking on Industrial Policy Implications for Africa was held in Pretoria, South Africa.

The Oxford Handbook of Industrial Hubs and Economic Development Arkebe Oqubay, Justin Yifu Lin, 2020-07-23 Industrialization supported by industrial hubs has been widely associated with structural transformation and catch-up. But while the direct economic benefits of industrial hubs are significant, their value lies first and foremost in their contribution as incubators of industrialization, production, and technological capability and innovation. The Oxford Handbook of Industrial Hubs and Economic Development adopts an interdisciplinary approach to examine the conceptual underpinnings, review empirical evidence of regions and economies, and extract pertinent lessons for policy researchers and practitioners on the key drivers of success and failure for industrial hubs. This Handbook illustrates the diverse and complex nature of industrial hubs and shows how they promote industrialization, economic structural transformation, and technological catch-up. It explores the implications of emerging issues and trends such as environmental protection and sustainability, technological advancement, shifts in the global economy, and urbanization.
