arrived What was once a niche interest for a few academics concerned with environmental issues and a few
environmentalists interested in religion has become an established academic field with classic texts graduate programs
regular meetings at academic conferences and growing interest from other academics and the mass media Theologians
ethicists sociologists and other scholars are engaged in a broad dialogue about the ways religious studies can help
understand and address environmental problems including the sorts of methodological terminological and substantive
debates that characterize any academic discourse This book recognizes the field that has taken shape reflects on the ways it
is changing and anticipates its development in the future The essays offer analyses and reflections from emerging scholars of
religion and ecology each addressing her or his own specialty in light of two questions 1 What have we inherited from the
work that has come before us and 2 What inquiries concerns and conversation partners should be central to the next
generation of scholarship The aim of this volume is not to lay out a single and clear path forward for the field Rather the
authors critically reflect on the field from within outline some of the major issues we face in the academy and offer
perspectives that will nurture continued dialogue **Bibliographic Guide to Psychology** New York Public Library.
