Vasari,2015-12-04 The Lives of the Most Excellent Painters Sculptors and Architects Often called the first art historian Vasari invented the genre of the encyclopedia of artistic biographies with his *Le Vite de pi eccellenti pittori scultori ed architettori* Lives of the Most Eminent Painters Sculptors and Architects dedicated to Grand Duke Cosimo I de Medici which was first published in 1550 He was the first to use the term Renaissance rinascita in print though an awareness of the ongoing rebirth in the arts had been in the air since the time of Alberti and he was responsible for our use of the term Gothic Art though he only used the word Goth which he associated with the barbaric German style The Lives also included a novel treatise on the technical methods employed in the arts The book was partly rewritten and enlarged in 1568 with the addition of woodcut portraits of artists some conjectural The work has a consistent and notorious bias in favour of Florentines and tends to attribute to them all the developments in Renaissance art for example the invention of engraving Venetian art in particular along with arts from other parts of Europe is systematically ignored in the first edition Between the first and second editions Vasari visited Venice and while the second edition gave more attention to Venetian art finally including Titian it did so without achieving a neutral point of view Vasari s biographies are interspersed with amusing gossip Many of his anecdotes

have the ring of truth while others are inventions or generic fictions such as the tale of young Giotto painting a fly on the surface of a painting by Cimabue that the older master repeatedly tried to brush away a genre tale that echoes anecdotes told of the Greek painter Apelles With a few exceptions however Vasari's aesthetic judgement was acute and unbiased He did not research archives for exact dates as modern art historians do and naturally his biographies are most dependable for the painters of his own generation and those of the immediate past Modern criticism with new materials opened up by research has corrected many of his traditional dates and attributions Vasari includes a sketch of his own biography at the end of the *Lives* and adds further details about himself and his family in his lives of Lazzaro Vasari and Francesco Salviati According to the historian Richard Goldthwaite Vasari was one of the earliest authors to use the term competition or *concorrenza* in Italian in its economic sense He used it repeatedly and stressed the concept in his introduction to the life of Pietro Perugino in explaining the reasons for Florentine artistic preeminence In Vasari's view Florentine artists excelled because they were hungry and they were hungry because their fierce competition amongst themselves for commissions kept them so Competition he said is one of the nourishments that maintain them *Academy Notes* Buffalo Fine Arts Academy, 1909

Lives of the Most Eminent Painters, Sculptors & Architects Giorgio Vasari, 1912 **Deepening Community** Paul Born, 2014-03-10 Community shapes our identity quenches our thirst for belonging and bolsters our physical mental emotional and economic health But in the chaos of modern life community ties have become unraveled leaving many feeling afraid or alone in the crowd grasping at shallow substitutes for true community In this thoughtful and moving book Paul Born describes the four pillars of deep community sharing our stories taking the time to enjoy one another taking care of one another and working together for a better world To show the role each of these plays he shares his own stories as a child of refugees and as a longtime community activist It's up to us to create community Born shows that the opportunity is right in front of us if we have the courage and conviction to pursue it *Lives of the Most Eminent Painters, Sculptors and Architects (Vol. 1-10)* Giorgio Vasari, 2023-12-13 Giorgio Vasari's monumental work *Lives of the Most Eminent Painters Sculptors and Architects* spanning ten volumes serves as a cornerstone of art historiography from the Renaissance period This comprehensive series not only chronicles the lives and contributions of influential artists such as Leonardo da Vinci and Michelangelo but also encapsulates the evolving artistic principles of the time Vasari's narrative style rich with anecdote and artistic commentary situates each artist's achievements within the broader cultural and historical framework marking a shift towards the modern conception of the artist as a creative individual His keen observations and personal insights provide invaluable context making this work a pivotal resource for understanding Renaissance art's aesthetic developments and its social ramifications Vasari himself a painter and architect was profoundly influenced by the vibrant creative environment of 16th century Italy Born in Arezzo in 1511 he was not merely an observer but an active participant in the artistic dialogue of his era His firsthand experiences combined with his extensive network among artists and patrons gifted him with unique

perspectives forging a personal narrative intertwined with the artistic legacies he recorded These experiences informed his ambition to legitimize art history as a discipline and to celebrate the genius of his contemporaries This essential volume is highly recommended for scholars students and art enthusiasts alike Vasari s narrative offers not just historical insight but also an emotional connection to the figures who shaped the trajectory of Western art Readers will be enriched by the breadth of knowledge contained within these pages gaining not only appreciation for the masters of the past but also an understanding of the enduring influence of their craft

Abstract Painting in Canada Roald Nasgaard, Art Gallery of Nova Scotia, 2008 In the tradition of the distinguished Douglas McIntyre art program this lavishly illustrated and superbly printed book is a rich readable history of abstract painting in Canada The story begins in the 1920s with the sometimes eccentric but remarkable work rooted in symbolism and theosophy of pioneers such as Kathleen Munn Bertram Brooker and Lawren Harris Two decades later the Automatistes Canada s first truly independent avant garde art movement burst onto the scene in Montreal After the Second World War the urge to abstraction spread across Canada manifesting itself in significant regional movements Vancouver painters retained a British flavour while in Toronto the Painters Eleven looked south to New York Montreal s Plasticiens launched their own razor edged interpretation of the European tradition of geometric abstraction In the sixties and seventies the Prairies were influenced by Clement Greenberg s post painterly abstraction while Halifax became a hub of conceptual art and concrete painting The book continues through the eighties and nineties during which critics largely denounced painting and concludes in the twenty first century with abstract painting alive and well again in the studios of Canada s young artists A monumental tome containing 200 color reproductions it mines a rich vein of art history ripe for international discovery

The Realities of 'Reality' - Part II: Making Sense of Why Modern Science Advances (Volume 2 of 2) Fritz Dufour, MBA, DESS, 2019-03-23 The difference between Part I and Part II Volumes 1 2 of this series is that in Part I the author showed how what we call reality starts with the inner self whereas Part II describes what in fact impacts and modifies the environment or reality and what are the factors behind that dynamics What impacts and modifies the environment is science This Volume 2 starts by showing how technology plays an important role in scientific progress Although the relationship between the two is symbiotic science can exist without technology but technology desperately needs science Military technology is an example of how technology can help science advance Some military inventions end up having civilian use Science being at the center of society the book makes the case for the direct impact of such social sciences as politics and economics on the advancement of science Politics says the author influences science because of uncertainty in science and economics does it thanks to the availability of money to scholars and scientists for their research On the other hand government also influences scientific progress through regulations The book gives cyberspace regulation as an example Furthermore by showing how art influences science the author really argues for the polyfactorial aspect of scientific progress In that line of thought he goes on to also prove that factors such as skepticism curiosity and the quest for knowledge greatly influence the advancement of science That says the author is a ninety degree turn By ending Part two that way I wanted to somehow link it to Part I which argues that reality starts from within *The Beat Hotel* Barry Miles, 2000 The Beat Hotel is a delightful chronicle of a remarkable moment in American literary history From the Howl obscenity trial to the invention of the cut up technique Barry
