MÜNSTERBERG,1909 This volume on psychotherapy belongs to a series of books which I am writing to discuss for a wider public the practical applications of modern psychology The first book called *On the Witness Stand* studied the relations of scientific psychology to crime and the law courts This new book deals with the relations of psychology to medicine Others discussing its relations to education to social problems to commerce and industry will follow soon For popular treatment I divide applied psychology into such various separated books because they naturally address very different audiences That which interests the lawyer does not concern the physician and again the school teacher has his own sphere of interests Moreover the different subjects demand a different treatment The problems of psychology and law were almost entirely neglected I was anxious to draw wide attention to this promising field and therefore I chose the form of loose popular essays without any aim towards systematic presentation of the subject As to psychology and medicine almost the opposite situation prevails There is perhaps too much talk afloat about psychotherapy the widest circles cultivate the discussion the magazines Pg viii overflow with it The duty of the scientific psychologist is accordingly not to stir up interest in this topic but to help in bringing this interest from mere gossip vague mysticism and medical amateurishness to a clear understanding of principles What is needed in this time of faith cures of a hundred types is to deal with the whole circle of problems in a serious systematic way and to emphasize the aspect of scientific psychological theory Hence the whole first part of this book is an abstract discussion and its first chapters have not even any direct relation to disease I am convinced that both physicians and ministers and all who are in practical contact with these important questions ought to be brought to such painstaking and perhaps fatiguing inquiry into principles before the facts are reached To those who seek a discussion of life facts alone the whole first part will of course appear to be a tedious way around they may turn directly to the second and third parts One word for my personal right to deal with these questions as too much illegitimate psychotherapeutics is heard to day For me the relation between psychology and medicine is not a chance chapter of my science to which I have turned simply in following up the various sides of applied psychology And still less have I turned to it because it has become the fashion in recent years On the contrary it has been an important factor in all my work since my student days I have been through five years of regular medical studies three years in Leipzig and two years Pg ix in Heidelberg I have an M D degree from the University of Heidelberg In my first year as docent in a German university twenty years ago I gave throughout the winter semester before several hundred students a course in hypnotism and its medical application It was probably the first

university course on hypnotism given anywhere Since that time I have never ceased to work psychotherapeutically in the psychological laboratory Yet that must not be misunderstood I have no clinic and while by principle I have never hypnotized anyone for mere experiment s sake but always only for medical purposes yet I adjust my practical work entirely to the interests of my scientific study The limitations of my time force me to refuse the psychotherapeutic treatment of any case which has not a certain scientific interest for me and of the many hundreds whom I have helped in the laboratory no one ever had to pay anything Thus my practical work has strictly the character of laboratory research The chief aim of this book is twofold It is a negative one I want to counteract the misunderstandings which overflowed the whole field especially by the careless mixing of mental and moral influence And a positive one I want to strengthen the public feeling that the time has come when every physician should systematically study psychology the normal in the college years and the abnormal in the medical school This demand of medical education cannot be postponed any longer The aim of the book is not to fight the Emmanuel Church Movement or Pg x even Christian Science or any other psychotherapeutic tendency outside of the field of scientific medicine I see the element of truth in all of them but they ought to be symptoms of transition Scientific medicine should take hold of psychotherapeutics now or a most deplorable disorganization will set in the symptoms of which no one ought to overlook to day *The Island of Fantasy* Fergus Hume, 1892
