approaches to intentionality and expounds his own Part I gives a critical account of the five most comprehensive and
prominent contemporary approaches to intentionality These approaches can be summarised as the instrumentalist approach
derived from Carnap and Quine and culminating in the work of Daniel Dennett the linguistic approach derived from the work
of Chomsky and exhibited most fully in the work of Jerry Fodor the biological approach developed by Ruth Garrett Millikan
Colin McGinn and others the information processing approach which has been given a definitive form in the work of Fred
Dretske and the functional role approach of Brian Loar In Part II Professor Lyons sets out a multi level developmental
approach to intentionality Drawing upon work in neurophysiology and psychology the author argues that intentionality is to
be found in different forms at the levels of brain functioning prelinguistic consciousness language and at the holistic level of
whole person performance which is demarcated by our ordinary everyday talk about beliefs desires hopes intentions and the
other propositional attitudes Written in a direct clear and lively style the extended survey of contemporary debate in Part I
