Opening and Closing Klapp, 1978-09-29 In this original application of information theory to social analysis Orrin Klapp examines how and why societies are producing more stress than they ever can handle He argues that the reduction of social noise the chaos from which we try to construct meaning is a major goal of individuals and groups alike Individuals groups even entire societies normally cycle rhythmically between two basic modes of adaptation to the constant communication flow opening or scanning for desired information and closing or defending against noise For example in a society functioning in the opening mode movements like ecumenicism and expansionism achieve momentum Extreme reactions in either mode lead to an opposite swing according to Professor Klapp's model His wide ranging conceptual scheme incorporates hypotheses about the variety and redundancy of information as well as about human channel capacities and the need for homeostasis His research reveals intriguing relationships among such phenomena as the concern about industrial population and the search for ethnic roots **Five Acres and Independence** Maurice Grenville Kains, McClure L. Lanning, J. Alormany, 1973-09-01 Great back to the land classic explains basics of self sufficient farming The one book to get 95 illustrations
