Richard H. Yahner

Fascinating Mammals Conservation And Ecology In The Mid Eastern States:

Fascinating Mammals Richard H. Yahner, 2001 A guide to the mammals of the mid eastern US states designed for those who would like to more thoroughly understand these creatures and the biological concepts behind their behaviour appearance and habitats It is also a primer on conservation issues facing the mammals Fascinating Mammals Richard H. Yahner, 2001 Written for the layperson and outdoors enthusiast this book introduces fauna native to the eastern part of the United States It describes these creatures and the biological concepts behind their behavior appearance and habitats The book also serves as a primer on conservation issues in Pennsylvania New Jersey New York Delaware West Virginia Ohio and Maryland Twenty illustrated chapters each present a brief introduction to the members of one family of mammals followed by short essays Yahner teaches wildlife conservation at Pennsylvania State University c Book News Inc Wildlife Behavior and Conservation Richard H. Yahner, 2011-12-21 Begins with in depth coverage of wildlife behavior concepts as they relate to conservation problems Topics will focus principally on discussion critique and development of behavioral concepts with particular attention given to published studies on various topics in wildlife behavioral concepts as related to conservation and natural history He will include an extensive list of references **Connecticut Wildlife** Geoffrey A. Hammerson, 2004 The best comprehensive look at wildlife in Connecticut Militarized Landscapes Chris Pearson, Peter Coates, Tim Cole, 2010-06-03 The black smoke billowing from burning oil wells during the Gulf War of 1990 91 directed media and public attention towards war s devastating environmental impact Yet even before the first bomb is dropped preparation for warfare materially and imaginatively reshapes rural landscapes and environments This volume is the first to explore the comparative histories and geographies of militarized landscapes Moving beyond the narrow definition of militarized landscapes as theatres of war it treats them as simultaneously material and cultural sites that have been partially or fully mobilized to achieve military aims Ranging from the Korean DMZ to nuclear testing sites in the American West and from Gettysburg to Salisbury Plain Militarized Landscapes focuses on these often secretive hidden dangerous and invariably controversial sites that occupy huge swathes of national territories The Publishers Weekly , 2001 Appalachian Winter Marcia Bonta, 2011-12-01 Winter is the season that most tests our mettle There are the obvious challenges of the weather freezing rain wind chill deep snow dangerous ice but also the psychological burdens of waiting for spring and the enduring often false starts that accompany its eventual return On the surface perhaps winter might seem an odd season for a nature book but there is plenty of beauty and life in the woods if only we know where to look The stark white landscape sparkles in the sunshine and glows beneath the moon on crisp clear nights the opening up of the forest makes it easy to see long distances birds some of which can be easily seen only in winter flock to feeders and animals even those that should be hibernating make surprise visits from time to time Appalachian Winter offers acclaimed naturalist Marcia Bonta s view of one season as experienced on and around her 650 acre home on the westernmost ridge of the hill and valley landscape that dominates

central Pennsylvania Written in the style of a journal each day's entry focuses on her walks and rambles through the woods and fields that she has known and loved for over thirty years Along the way she discovers a long eared owl in a dense stand of conifers tracks a bear through an early December snowfall explains the life and ecological niche of the red backed vole and examines the recent arrival of an Asian ladybug These are but a few of the tidbits sprinkled throughout the book interwoven with the human stories of Bonta's family as well as the highway builders and shopping mall developers that threaten the idyllic peacefulness of her mountain This is the fourth and final volume of Bonta's seasonal meditations on the natural history of the northern Appalachian Mountains Her gentle charming accounts of changing weather and of the struggles faced by plants animals and insects breathe new warmth into the coldest months of the year One Health Case Studies Susan Cork,Joann Lindenmayer,2024-12-24 The One Health Case Studies book is a collection of international case studies showcasing the work of One Health practitioners and their projects The book explores current areas of One Health grouped into themes of One Health policy pests and pathogens water and the environment agriculture and food security and education and community engagement This book provides an understanding of One Health practice globally through 28 diverse case studies Each case study is carefully designed with clear aims expected learning outcomes and reflective questions to encourage academic mastery and real world application of knowledge The book also bridges the gap between theory and practice by offering insights into current One Health best practices challenges and opportunities **Abstracts of Public Administration, Development, and Environment** ,1999 **Mammalia** ,2005 **Nature's Calendar** Colin Rees,2019-04-02 Take an enchanting journey through the shifting seasons in a wildlife sanctuary home to wetland forest and grassland and supporting an incredible diversity of plants and animals Flocks of waterfowl exploding into steely skies above frozen marshland salamanders creeping across the forest floor to vernal pools chorusing frogs peeping their ecstasy while warblers crowd budding trees turtles sunning on floating logs the ecological engineering of beavers these are but a few of the sights and sounds marking a year at Jug Bay Wetlands Sanctuary and its neighboring landscapes in Southern Maryland In an absorbing account of a year in the life of this sanctuary naturalist Colin Rees invites us to join him as he explores the secrets and wonders of the changing natural world Alongside the author we witness spring's avian migrations quickening of aquatic vegetation burgeoning of myriad invertebrates and the assaults of extreme weather conditions We revel in summertime's proliferation of fish fowl and mammals We become attuned to the shifting climate's impacts on autumnal transitions and we marvel at amazing feats of biological inventiveness in preparation for winter conditions Through these visions of the fleeting and yet enduring cycles of nature Rees shares deep insights into the ecological and behavioral dynamics of the natural environment Enhanced by more than two dozen color plates the book touches on a wide range of issues from microbial diversity bird banding and butterfly phenology to genetic diversity and habitat fragmentation It also examines the challenges of conserving these and other natural features in the face of climate change and development

pressures Thoughtful and lyrical Nature's Calendar speaks to all readers scientific and lay alike Fascinating profiles of flora and fauna celebrate the richness and complexity of a unique ecosystem exploring the entire ecology of this dynamic and delicate area W Inging it ,2001 Plant Ecology in the Middle East Ahmad Hegazy,Jonathan Lovett-Doust,2016-01-14 This advanced textbook explores the intriguing flora and plant ecology of the Middle East framed by a changing desert landscape global climate change and the arc of human history This vast region has been largely under recognized under studied and certainly under published due in part to the challenges posed to research by political disputes and human conflict and a treatise on the subject is now timely The book integrates Middle Eastern plant geography and its major drivers geo tectonics seed and fruit dispersal plant functional types etc with the principles of plant ecology The authors include the many specialized adaptations to desert and dryland ecosystems including succulence water conserving photosynthesis and a remarkable range of other life history strategies They explore the formation of climate relicts and describe the long history of domestication in the region together with the many reciprocal effects of agriculture on plant ecology The book concludes by discussing conservation in the region highlighting five regional biodiversity hotspots where the challenges of desertification habitat loss and other threats to plant biodiversity are particularly acute Plant Ecology in the Middle East is a timely synthesis of the field setting a new baseline for future research It will be important reading for both undergraduate and graduate students taking courses in plant ecology evolution systematics biodiversity and conservation and will also be of interest and use to a professional audience of botanists conservation biologists and practitioners working in dryland ecosystems Techniques for Wildlife Investigations and Management Clait E. Braun,Wildlife Society,2005

International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences ,2001 Bibliographic Index ,2004 **The Zoological Record** ,2001 **Culture, Environment, and Conservation in the Appalachian South** Benita J. Howell,2002 Focusing on the mountainous area from northern Alabama to West Virginia this important volume explores the historic and contemporary interrelations between culture and environment in a region that has been plagued by land misuse and damaging stereotypes of its people Committed to taking account of humankind's place in the environment this collection is a timely contribution to debates over land use and conservation Debunking the nature culture dichotomy contributors examine how physical space is transformed into culturally constituted place by a variety of factors both tangible architecture landmarks artifacts and intangible a sense of place long term family habitation of land tradition a way of life worth fighting for Archaeologists cultural geographers and ethnographers examine how the land was used by its earliest inhabitants and trace the effects of agricultural decline industrial development and tourism in the nineteenth and twentieth centuries Powerful case studies recount past displacement of local populations in the name of progress or conservation and track threatened communities struggles to maintain their claims to place in the face of extralocal counterclaims that would appropriate space and resources for other

purposes such as mountaintop removal of coal or a power company's plans to export electricity from Appalachia to distant urban centers Contributors also record successful community planning ventures that have achieved creative solutions to seemingly intransigent conflicts between demands for economic wealth and environmental health **American Book Publishing Record** ,2001 **Wild Earth** ,2002
