*The Fashioned Body* Joanne Entwistle, 2015-03-03 *The Fashioned Body* provides a wide ranging and original overview of fashion and dress from an historical and sociological perspective Where once fashion was seen as marginal it has now entered into core economic discourse focused around ideas about cultural and creative work as a major driver of developed economies With a new preface and new material on the evolving fashion industry this second edition gives a clear summary of the theories surrounding the role and function of fashion in modern society Entwistle examines how fashion plays a crucial role in the formation of modern identity through its articulation of the body gender and sexuality The book offers a much needed synthesis between the literature on fashion and dress and the sociology of the body offering an updated critique of the issues raised in the first edition Entwistle shows how an understanding of fashion and dress requires an understanding of the meanings acquired by the body in culture since it is the body that fashion speaks to and which is dressed in almost all social situations and encounters She argues that while fashion refers to a specific system of dress originating in the west all cultures dress the body in the same way making it a crucial feature of social order Drawing on the work of theorists the book offers insights into the connections that need to be made between the body fashion and dress *The Fashioned Body* will be an invaluable resource for anyone interested in the social role of fashion and dress in modern culture     *Beyond Design* Sandra

meanings and argues persuasively that Chinese fashion can't be wholly understood in terms of a Western discourse of modernity postmodernity and the global Expanding our understanding of the fashion system Fashion in Altermodern China takes on board new trends in global trade new technologies and the hybridity of designs and consumption of fashion Through critical readings of Barthes on the neutral and Jullien on blandness both directly influenced by Asian philosophies the author offers a new perspective on Chinese fashion arguing that while global local contexts lead to identifiably postmodern and hybrid aesthetics for women in contemporary China the flux and mix of available fashions is experienced in a more open neutral manner than scholars have previously described Crucially then rather than position trends in China only in terms of hybridity which betrays a Western bias and a binary logic of host recipient there are more fluid ways in which we need to understand how women engage in fashion in China today
