Schooling the Child Helena Austin, Bronwyn Dwyer, Peter Freebody, 2005-08-19 What is a child How is the concept of childhood defined This book aims to explore these perennial and complex questions by looking at the way in which society constructs and understands childhood The authors focus in particular on the school a key location within which social and cultural notions of childhood are defined and performed The book is divided into three major parts Part 1 frames the accepted notions of childhood and schooling and introduces ethnomethodological analysis as a tool to rethink current versions of the child Part 2 focuses on how school students become members of a category within the institution of the classroom The authors explore this idea through transcripts of talk between teachers and students and amongst students themselves in two classroom studies Part 3

looks at the materials of education concentrating specifically on children's texts. The authors examine how such texts portray a notion of the child within the story and also assume a notion of the child as reader of the story. This important book shows how much is at stake for children in accepting adults' deep seated notions of childhood. It will be of great interest to educational researchers and policy makers, sociologists of childhood, teachers and student teachers.

Literacy, Place, and Pedagogies of Possibility Barbara Comber, 2015-07-30. How can teachers ensure a pedagogy of possibility underpinned by social justice and what has literacy got to do with this? This book explores the positive synergies between critical literacy and place conscious pedagogy. Through rich classroom research it introduces and demonstrates how a synthesis of insights from theories of space and place and literacy studies can underpin the design and enactment of culturally inclusive curriculum for diverse student communities and illustrates how making place and space the objects of study provide productive resources for teachers to design enabling pedagogical practices that extend students' literate repertoires. The argument is that systematic study of and engagement with specific elements of place can enable students' academic learning and literacy. Literacy, Place and Pedagogies of Possibility is informed by critical literacy, place conscious pedagogy and spatial theory and is richly illustrated with examples from classroom research including teacher and student artifacts. It provides new directions for classroom practice in critical literacy. This novel combination of multidisciplinary theory and classroom research extends
