Fast Fighting Boats 1870 1945 Their Design Construction And Use:

Fast Fighting Boats, 1870-1945 Harald Fock, 1978 **The Washington Conference, 1921-22** Erik Goldstein, John Maurer, 2012-12-06 The Washington Conference regulated the inter war naval race between the world powers In the era when it was still believed that battleships were the epitome of naval power and a sign of a country s strength this conference led to limitations on the building of such weapons by the naval powers of Britain the USA and Japan This collection of essays deals with many aspects of the conference the factors that caused it the interests of the participating nations both present and future and the results **World War II at Sea** Spencer C. Tucker, 2011-11-10 The war at sea was a key aspect of World War II one that is too often under studied This comprehensive encyclopedia shares current understandings of the struggle to control the seas during that conflict and it opens our eyes to the reasons sea power continues to be of critical importance today Scholarly treatment of World War II is constantly changing as new materials inform new interpretations At the same time current military operations lead to reevaluation of the tactics and technologies of the past Marshalling the latest information and insights into this epic conflict *World War II at Sea An Encyclopedia* will enable students and other interested readers to explore specific naval engagements while also charting the transformation of naval history through innovations in ordnance In treating the naval aspects of World War II this two volume ready reference enhances the understanding of a part of the war that is often overshadowed by the fighting on land and in the air The encyclopedia focuses on the events individuals organizations and ideas that shaped the world s navies during World War II as well as the resultant battles that changed naval history It also covers the numerous innovations that occurred during the conflict and shows how strategies evolved and were executed *British Coastal Forces* Norman Friedman, 2023-04-30 The Royal Navy invented the fast motor torpedo boat during the First World War and used it and other small coastal craft to great effect during the Second This book tells the dramatic story of British coastal forces both offensive and defensive in both World Wars and beyond In the Second World War British coastal forces fought a desperate battle to control the narrow seas particularly the Channel and the North Sea and took the war to the coasts of German occupied Europe fighting where larger warships could not be risked They also made a significant contribution to victory in the Mediterranean but it was primarily warfare in home waters that shaped wartime British Coastal Forces and left lessons for postwar development In this book Norman Friedman uniquely connects the technical story of the coastal craft and their weapons and other innovations with the way they fought In both world wars much of the technology was at the edge of what was feasible at the time Boats incorporated considerable British innovation and also benefited from important US contributions particularly in supplying high powered engines during World War II In contrast with larger warships British coastal forces craft were essentially shaped by a few builders and their part in the story is given full credit They also built a large number of broadly similar craft for air sea rescue and for completeness these are described in an appendix This fascinating dramatic story is also relevant to modern naval thinkers concerned with gaining or

denying access to hostile shores The technology has changed but the underlying realities have not This book includes an extensive account of how coastal forces supported the biggest European example of seizing a defended shore the Normandy invasion That was by far the largest single British coastal forces operation demanding a wide range of innovations to make it possible Like other books in this series this one is based very heavily on contemporary official material much of which has not been used previously like the extensive reports of US naval observers who were allowed wide access to the Royal Navy as early as 1940 Combined with published memoirs these sources offer a much more complete picture than has previously appeared of how Coastal Forces fought and of the way in which various pressures both operational and industrial shaped them

Allied Defense of the Malay Barrier, 1941-1942 Tom Womack,2015-12-01 Though few realize it the Netherlands East Indies were the object of Japan s attack on Pearl Harbor in December 1941 Likewise their invasions of Guam Wake Island and the Philippines were mainly diversionary operations to safeguard their main assault on Dutch and British colonies Since

the end of World War I Japan had coveted the vast East Indies oil reserves and the colony had feared invasion since Germany overran Holland in May 1940 Isolated politically the weakly defended archipelago was a tempting prize The East Indies government initially maintained a strict policy of neutrality while desperately working to build up its military strength As Japanese actions pushed the region toward war the Dutch reluctantly embraced closer ties with America and Britain For a brief period the East Indies were key players in Pacific War strategy This book details for the first time in English the Dutch prewar strategy their efforts to counter Japanese espionage and their sizable though largely forgotten military contribution in the early months of the Pacific War **United States Naval Institute Proceedings** United States Naval Institute,1979
