Extending Education through Technology Ronald McBeth,2004-03-01 Dreaming in Code: Ada Byron Lovelace, Computer Pioneer Emily Arnold McCully,2019-03-12 Written with grace and intelligence researched with care Sure to inspire a new generation of pioneers Shelf Awareness starred review This illuminating biography reveals how the daughter of Lord Byron Britain s most infamous Romantic poet became the world s first computer programmer Even by 1800s standards Ada Byron Lovelace had an unusual upbringing Her strict mother worked hard at cultivating her own role as the long suffering ex wife of bad boy poet Lord Byron while raising Ada in isolation Tutored by the brightest minds Ada developed a hunger for mental puzzles mathematical conundrums and scientific discovery that kept pace with the breathtaking advances of the industrial and social revolutions taking place in Europe At seventeen Ada met eccentric inventor Charles Babbage a kindred spirit Their ensuing collaborations resulted in ideas and concepts that presaged computer programming by almost two hundred years and Ada Lovelace is now recognized as a pioneer and prophet of the information age Award winning author Emily Arnold McCully opens the window on a peculiar and singular intellect shaped and hampered by history social norms and family dysfunction The result is a portrait that is at once remarkable and fascinating tragic and triumphant *Forgotten Women: The Scientists* Zing Tsjeng,Zhi Ying Tsjeng,2018-03-08 To say this series is empowering doesn t do it justice Buy a copy for your daughters sisters mums aunts and nieces just make sure you buy a copy for your sons brothers dads uncles and nephews too indy100 Here s to no more forgotten women Evening Standard The women who shaped and were erased from our history The Forgotten Women series will uncover the lost histories of the influential women who have refused over hundreds of years to accept the hand they ve been dealt and as a result have formed shaped and changed the course of our futures The Scientists celebrates 48 unsung scientific heroines whose hugely important yet broadly unacknowledged or incorrectly attributed discoveries have transformed our understanding of the scientific world Mary Anning the amateur paleontologist whose fossil findings changed scientific thinking about prehistoric life Emmy Noether dubbed The Mighty Mathematician You ve Never Heard Of Yn s Mex a the Mexican American botanist who discovered over 500 new plant species Wangari Maathai who started an environmental and ecological revolution in Kenya Margaret Sanger the maverick nurse who paved the way for the legalization of contraception

Chapters including Earth Biology Medicine Physics Mathematics and Technology Inventions profile the female scientists who have defied the odds and the opposition to change the world around us The number of Nobel prize winning women

Routledge Library Editions: Philosophy of Time Various Authors, 2021-03-05 Reissuing five works originally published between 1937 and 1991 this collection contains books addressing the subject of time from a mostly philosophic point of view but also of interest to those in the science and mathematics worlds These texts are brought back into print in this small set of works addressing how we think about time the history of the philosophy of time the measurement of time theories of relativity and discussions of the wider thinking about time and space among other aspects One volume is a thorough bibliography collating references on the subject of time across many disciplines **Women, Work and Computerization** Ellen Balka, Richard Smith, 2013-11-11 ELLENBALKKA Simon Fraser University ebalka Sfu ca 1 INTRODUCTION In developing the call for papers for the 7th International Federation of Information Processors IFIP Women Work and Computerization Conference we sought to cast our net widely We wanted to encourage presenters to think broadly about women work and computerization Towards this end the programme committee developed a call for papers that in its final form requested paper submissions around four related themes These are 1 Setting the Course Taking Stock of Where We Are and Where We re Going 2 Charting Undiscovered Terrain Creating Models Tools and Theories 3 Navigating the Unknown Sex Time Space and Place and 4 Taking the Helm Education and Pedagogy Our overall conference theme Charting a Course to the Future was inspired in part by Vancouver s geography which is both coastal and mountainous As such navigation plays an important part in the lives of many as we seek to enjoy our environs In addition as the first Women Work and Computerization conference of the new millennium we hoped to encourage the broad community of scholars that has made past Women Work and Computerization conferences a success to actively engage in imagining and working towards a better future for women in relation to computers The contributions to this volume are both a reflection of the hard work undertaken by many to improve the situation of women in relation to computerization and a testament to how much work is yet to be done *Creating an Ecological Society* Fred Magdoff, Chris Williams, 2017-05-29 Sickened by the contamination of their water their air of the Earth itself more and more people are coming to realize that it is capitalism that is quite literally killing them It is now clearer than ever that capitalism is also degrading the Earth s ability to support other forms of life Capitalism s imperative to make profit at all costs and expand without end is destabilizing Earth s climate while increasing human misery and inequality on a planetary scale Already hundreds of millions of people are facing poverty in the midst of untold wealth perpetual war growing racism and gender oppression The need to organize for social and environmental reforms has never been greater But crucial as reforms are they cannot solve our intertwined ecological and social crises Creating an Ecological Society reveals an overwhelmingly simple truth Fighting for reforms is vital but revolution is essential Because it aims squarely at replacing capitalism with an ecologically sound and socially just society Creating an Ecological

Society is filled with revolutionary hope Fred Magdoff and Chris Williams who have devoted their lives to activism Marxist analysis and ecological science provide informed fascinating accounts of how a new world can be created from the ashes of the old Their book shows that it is possible to envision and create a society that is genuinely democratic equitable and ecologically sustainable And possible not one moment too soon for society to change fundamentally and be brought into harmony with nature

Numbers and Narratives Maria Tamboukou, 2025-09-10 Why have there been so few women mathematicians This book does not seek an answer in absence but in the forces ruptures and intensities that shape the becoming of a femme philosophe a mathematician scientist and philosopher within the shifting assemblages of eighteenth and nineteenth century Europe Moving beyond exclusion as mere negation it traces the conditions of emergence the differential speeds and slippages through which women entered inhabited and transformed the mathematical sciences Drawing on auto biographical documents literary and philosophical writings and the materialities of the archive this book approaches the digital turn not as a tool but as a plane of composition where new trajectories of memory work unfold Between historiography and fabulation it maps a space where women s mathematical thought was not only possible but inevitable if only in flashes excesses and d tours This book will resonate with scholars in the sociology history and philosophy of science and mathematics particularly those engaged with feminist thought the politics of knowledge and experimental archival methods

Parallel Problem Solving from Nature, PPSN XI Robert Schaefer, Carlos Cotta, Joanna Kolodziej, Günter Rudolph, 2010-09-13 We are very pleased to present to you this LNCS volume the proceedings of the 11th International Conference on Parallel Problem Solving from Nature PPSN 2010 PPSN is one of the most respected and highly regarded conference series in evolutionary computation and indeed in natural computation as well This biennial event was first held in Dortmund in 1990 and then in Brussels 1992 Jerusalem 1994 Berlin 1996 Amsterdam 1998 Paris 2000 Granada 2002 Birmingham 2004 Reykjavik 2006 and again in Dortmund in 2008 PPSN 2010 received 232 submissions After an extensive peer review process involving more than 180 reviewers the program committee chairs went through all the review reports and ranked the papers according to the reviewers comments Each paper was evaluated by at least three reviewers Additional reviewers from the appropriate branches of science were invoked to review interdisciplinary papers The top 128 papers were finally selected for inclusion in the proceedings and presentation at the conference This represents an acceptance rate of 55% which guarantees that PPSN will continue to be one of the conferences of choice for bio inspired computing and metaheuristics researchers all over the world who value the quality over the size of a conference The papers included in the proceedings volumes cover a wide range of topics from evolutionary computation to swarm intelligence from bio inspired computing to real world applications Machine learning and mathematical games supported by evolutionary algorithms as well as memetic agent oriented systems are also represented They all are the latest and best in natural computation The proceedings are composed of two volumes divided into nine thematic sections

The Formula Luke Dormehl, 2014-04-03 What if everything

in life could be reduced to a simple formula What if numbers were able to tell us which partners we were best matched with not just in terms of attractiveness but for a long term committed marriage Or if they could say which films would be the biggest hits at the box office and what changes could be made to those films to make them even more successful Or even who out of us is likely to commit certain crimes and when This may sound like the world of science fiction but in fact it is just the tip of the iceberg in a world that is increasingly ruled by complex algorithms and neural networks In *The Formula* Luke Dormehl takes you inside the world of numbers asking how we came to believe in the all conquering power of algorithms introducing the mathematicians artificial intelligence experts and Silicon Valley entrepreneurs who are shaping this brave new world and ultimately asking how we survive in an era where numbers can sometimes seem to create as many problems as they solve

Victorians and Numbers Lawrence Goldman, 2022-02-03 A defining feature of nineteenth century Britain was its fascination with statistics The processes that made Victorian society including the growth of population the development of industry and commerce and the increasing competence of the state generated profuse numerical data This is a study of how such data influenced every aspect of Victorian culture and thought from the methods of natural science and the struggle against disease to the development of social administration and the arguments and conflicts between social classes Numbers were collected in the 1830s by newly created statistical societies in response to this data revolution They became a regular aspect of governmental procedure thereafter and inspired new ways of interrogating both the natural and social worlds William Farr used them to study cholera Florence Nightingale deployed them in campaigns for sanitary improvement Charles Babbage was inspired to design and build his famous calculating engines to process them The mid Victorians employed statistics consistently to make the case for liberal reform In later decades however the emergence of the academic discipline of mathematical statistics statistics as we use them today became associated with eugenics and a contrary social philosophy Where earlier statisticians emphasised the unity of mankind some later practitioners following Francis Galton studied variation and difference within and between groups In chapters on learned societies government departments international statistical collaborations and different Victorian statisticians *Victorians and Numbers* traces the impact of numbers on the era and the intriguing relationship of Victorian statistics with Big Data in our own age

Ada's Legacy Robin Hammerman, Andrew L. Russell, 2015-10-01 *Ada's Legacy* illustrates the depth and diversity of writers thinkers and makers who have been inspired by Ada Lovelace the English mathematician and writer The volume which commemorates the bicentennial of Ada's birth in December 1815 celebrates Lovelace's many achievements as well as the impact of her life and work which reverberated widely since the late nineteenth century In the 21st century we have seen a resurgence in Lovelace scholarship thanks to the growth of interdisciplinary thinking and the expanding influence of women in science technology engineering and mathematics *Ada's Legacy* is a unique contribution to this scholarship thanks to its combination of papers on Ada's collaboration with Charles Babbage Ada's position in the Victorian and Steampunk literary

genres Ada's representation in and inspiration of contemporary art and comics and Ada's continued relevance in discussions around gender and technology in the digital age With the 200th anniversary of Ada Lovelace's birth on December 10 2015 we believe that the timing is perfect to publish this collection of papers Because of its broad focus on subjects that reach far beyond the life and work of Ada herself Ada's Legacy will appeal to readers who are curious about Ada's enduring importance in computing and the wider world

The book delves into Faster Than Thought A Symposium. Faster Than Thought A Symposium is a crucial topic that must be grasped by everyone, from students and scholars to the general public. This book will furnish comprehensive and in-depth insights into Faster Than Thought A Symposium, encompassing both the fundamentals and more intricate discussions.

1. The book is structured into several chapters, namely:
 - Chapter 1: Introduction to Faster Than Thought A Symposium
 - Chapter 2: Essential Elements of Faster Than Thought A Symposium
 - Chapter 3: Faster Than Thought A Symposium in Everyday Life
 - Chapter 4: Faster Than Thought A Symposium in Specific Contexts
 - Chapter 5: Conclusion
 2. In chapter 1, the author will provide an overview of Faster Than Thought A Symposium. The first chapter will explore what Faster Than Thought A Symposium is, why Faster Than Thought A Symposium is vital, and how to effectively learn about Faster Than Thought A Symposium.
 3. In chapter 2, this book will delve into the foundational concepts of Faster Than Thought A Symposium. The second chapter will elucidate the essential principles that must be understood to grasp Faster Than Thought A Symposium in its entirety.
 4. In chapter 3, the author will examine the practical applications of Faster Than Thought A Symposium in daily life. This chapter will showcase real-world examples of how Faster Than Thought A Symposium can be effectively utilized in everyday scenarios.
 5. In chapter 4, the author will scrutinize the relevance of Faster Than Thought A Symposium in specific contexts. The fourth chapter will explore how Faster Than Thought A Symposium is applied in specialized fields, such as education, business, and technology.
 6. In chapter 5, this book will draw a conclusion about Faster Than Thought A Symposium. The final chapter will summarize the key points that have been discussed throughout the book.
- This book is crafted in an easy-to-understand language and is complemented by engaging illustrations. This book is highly recommended for anyone seeking to gain a comprehensive understanding of Faster Than Thought A Symposium.
