Busybodies, Meddlers, and Snoops Kimberly J. Dilley,1998-06-25 Although the mystery novel has been popular with women readers since the 19th century until the late 1970s fictional women detectives typically were portrayed as stereotypic and passive and often

overlooked by critics Over the last two decades however women mystery writers have begun creating a new type of hero the modern female detective an independent intelligent witty and compassionate woman who can take care of herself This volume analyzes the new female serial detectives and highlights their struggles with femininity and feminism in the everyday and the way they have profoundly altered the genre s standard plotting and characterization *A Better Hope* Stanley Hauerwas,2000-12-01 By his own admission never one to duck a good fight Stanley Hauerwas has in the past three decades established himself as one of our most important and most disputatious theologians With *A Better Hope* he concentrates on the constructive case for the truth and power of the church and its faith since Christians cannot afford to let ourselves be defined by what we are against Whatever or whomever we are against we are so only because God has given us so much to be for Hauerwas here crystallizes and extends profound criticisms of America liberalism capitalism and postmodernism but also identifies unlikely allies such as Chicago Archbishop Francis Cardinal George and locates surprising resources for Christian survival such as mystery novels Interlocutors along the way include Reinhold Niebuhr John Courtney Murray and in a significant and previously unpublished essay social gospeller Walter Rauschenbusch Never boring and often telling *A Better Hope* demonstrates how a thinker so often accused of being tribal and sectarian is at the same time one of few contemporary theologians read not just by other theologians but by political scientists philosophers medical ethicists law professors and literary theorists **Recovering Nature** John P. O'Callaghan,Thomas S. Hibbs,2016-10-11 The recovery of nature has been a unifying and enduring aim of the writings of Ralph McInerny Michael P Grace Professor of Medieval Studies at the University of Notre Dame director of the Jacques Maritain Center former director of the Medieval Institute and author of numerous works in philosophy literature and journalism While many of the fads that have plagued philosophy and theology during the last half century have come and gone recent developments suggest that McInerny s commitment to Aristotelian Thomism was boldly if quietly prophetic In his persistent clear and creative defenses of natural theology and natural law McInerny has appealed to nature to establish a dialogue between theists and non theists to contribute to the moral and political renewal of American culture and particularly to provide some of the philosophical foundations for Catholic theology This volume brings together essays by an impressive group of scholars including William Wallace O P Jude P Dougherty John Haldane Thomas DeKoninck Alasdair MacIntyre David Solomon Daniel McInerny Janet E Smith Michael Novak Stanley Hauerwas Laura Garcia Alvin Plantinga Alfred J Freddoso and David B Burrell C S C *Philosophical Perspective on Cinema* Pedro Blas González,2022-05-17 The main premise of *Philosophical Perspective on Cinema* is simple Can a visual medium such as cinema put in greater perspective diverse aspects of human experience Films are usually sorted by genres but by applying metaphysical existential categories to cinema the author enables readers to reflect on the nature and essence of existence by making life appear less transparent to itself Undoubtedly the connection between sensual reality and philosophical reflection is often glossed over when the emphasis is placed on theoretical abstractions and not life itself

While this work is a reflection on the philosophy of existence the author embraces a practical approach to the metaphysical existential foundation of human existence Hitler and Abductive Logic Ben Novak,2014-05-01 Adolf Hitler is the greatest mystery of the 20th century and the mystery surrounding him consists of two unanswered questions that have baffled biographers and historians First how did he ever rise to power Second who was he really Hitler had the power to mesmerize crowds as the most dynamic orator of the modern age Yet his power was not in his ideas which he collected from the gutter sheets of Vienna nor was it in his personality his biographers describe him as an unperson and his character as a void and a black hole What then was the source of his power Was he a medium or a magician with paranormal powers as many contemporaries thought Or did he have a secret or method that has not yet been revealed Ben Novak spent fourteen years searching for the secret of Hitler s political success and his power as a speaker Hitler s most astute contemporary observer Konrad Heiden who wrote the first objective books on Hitler warning that this man was the greatest massdisturber in world history suggested that Hitler s secret lay in his use of eine eigentiimliche art von Logik or a peculiar form of logic Beginning with this clue Novak finds that there is a new form of logic in accordance with Heiden s description and examples that can explain Hitler s phenomenal political success This new form of logic called abduction was discovered by an American philosopher Charles Sanders Peirce 1839 1914 who is rapidly becoming America s most well known philosopher and logician Abduction is a third form of logic in addition to deduction and induction Unlike the other forms of logic abduction is based on instinct and has a power over emotions Novak argues that Hitler was the first politician to apply the logic of abduction to politics This book provides the first coherent account of Hitler s youth that ties together all the known facts clearly showing the genesis of the strangest and most terrible man of the twentieth century while identifying the power he discovered that allowed him to break out into the world in such a terrifying way *99 Jumpstarts for Kids* Peggy Whitley,Susan Williams Goodwin,2003-09-30 Similar to the previous 99 Jumpstarts to Research but designed for younger students this book helps teachers and librarians to teach basic research and information literacy skills to children To help them master the research process and narrow the limitless array of sources available on commonly researched topics in elementary and middle schools students are taught a basic note taking process and given specific source ideas and subject headings for each topic discussed This book will be an invaluable tool to help school librarians and teachers broach the difficult task of beginning to teach the research process Grades 3 8 **Mystery and Suspense Writers** Robin W.
