

Mastering the Cylinder

Lock in the foundational skills of spindle turning.

BY BETH INGLAND

The cylinder made a living as a round wooden. Before I started turning, in 1985, I made cabinets and furniture, and I taught myself to turn so I could put more time into my work. When I discovered that this new work was also putting great money into my bank account, I began to specialize in turning—most kinds of furniture, and especially pieces were made in the shop. As I turned wooden shapes again and again, I figured out how to turn with an economy of movement and an air

of ease. I also made a living as a woodworker. Before I started turning, in 1985, I made cabinets and furniture, and I taught myself to turn so I could put more time into my work. When I discovered that this new work was also putting great money into my bank account, I began to specialize in turning—most kinds of furniture, and especially pieces were made in the shop. As I turned wooden shapes again and again, I figured out how to turn with an economy of movement and an air

Mounting the workpiece

There are many gadgets for finding the center of a turning blank. I use a cheap plastic type sold at most woodworking stores. Whatever you use to find the center, it's all about making a perfect cylinder.

of motion. You can also find the center by placing a straightedge across the center and marking it. I have also found the center point with a pencil, push the ends against, and get the blank between centers. To the lathe, which spins slowly, I usually use a cone center. It marks the workpiece with a point, allowing me to take a piece down to a small diameter. In the lathe, the cone center is typically used as a spring-loaded gear called a rest, which makes it easy to get pieces on and off the

Set up

MOUNT THE WORKPIECE

Find the center point. After marking the center point, push the pencil in with an ear that will accurately locate the center point.

After centering the blank, push the rest into the center of the blank. Push the rest into the center of the blank.

After centering, push the rest into the center of the blank. Push the rest into the center of the blank.

ADJUST THE TOOL REST

Adjust the tool rest. To set the length of the rest, use the back of the gauge on the rest and the back of the rest. Push the rest with the cutting tool of the rest is about center on the workpiece.

Parallel placement. Adjust the rest so the long edge is parallel with the workpiece and the gap between the rest is 1/4 in.

Fine Woodworking On Spindle Turning
