should buy books with fingerplays when there are so many free videos on YouTube We believe that parents should define the development and entertainment of their children Video content is entertainment not a participatory game It is created by somebody else not the child and grabs the attention of kids against their will This book also provides instruction for the hand movements but gives the child the space for their own sense of creation Hand gestures are not done for the child but by the child Here is a chance for kids to think learn and to try for themselves Also the book suggests more activities compared with simply repeating from an image on a screen Kids can see all gestures step to step try them and feel them This gives them the chance to see themselves from the outside looking in modifying when necessary to get it just right This self analyzing ability is an extremely important skill for their future lives Fingerplays and Action Rhymes Linda Milliken,1996-03-01 **The**
