Numerical Methods in Mechanics of Materials Ken Chong, Arthur Boresi, Sunil Saigal, James Lee, 2017-11-27 In the dynamic digital age the widespread use of computers has transformed engineering and science A realistic and successful solution of an engineering problem usually begins with an accurate physical model of the problem and a proper understanding of the assumptions employed With computers and appropriate software we can model and analyze complex physical systems and problems However efficient and accurate use of numerical results obtained from computer programs requires considerable background and advanced working knowledge to avoid blunders and the blind acceptance of computer results This book provides the background and knowledge necessary to avoid these pitfalls especially the most commonly used numerical methods employed in the solution of physical problems It offers an in depth presentation of the numerical methods for scales from nano to macro in nine self contained chapters with extensive problems and up to date references covering Trends and new developments in simulation and computation Weighted residuals methods Finite difference methods Finite element methods Finite strip layer prism methods Boundary element methods Meshless methods Molecular dynamics Multiphysics problems Multiscale methods *Software and Hardware Applications of Microcomputers* M. of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an internal and broader dissemination publishing house to assure improved service Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 30 thesis year 1985 a total of 12 400 theses titles from 26 Canadian and 186 United States universities We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work
