We are considered with the following nonlinear Schrödinger equation:

$$-\Delta u + (\lambda \phi(x) + 1)u = f(u), x \in V,$$

on a locally finite graph $G = (V, E)$, where V denotes the vertex set, E denotes the edge set, $\lambda > 1$ is a parameter, $f(s)$ is asymptotically linear with respect to s at infinity, and the potential $\phi : V \rightarrow [0, +\infty)$ has a nonempty well Ω . By using variational methods, we prove that the above problem has a ground state solution u_λ for any $\lambda > 1$. Moreover, we show that as $\lambda \rightarrow \infty$, the ground state solution u_λ converges to a ground state solution of a Dirichlet problem defined on the potential well Ω .

1 | INTRODUCTION

In this paper, we consider the following asymptotically linear Schrödinger equation:

$$-\Delta u + (\lambda \phi(x) + 1)u = f(u), x \in V, \quad (1.1)$$

on a connected locally finite graph $G = (V, E)$, where V denotes the vertex set, E denotes the edge set, and $\lambda > 1$ is a parameter. We call G a locally finite graph if for any $x \in V$, there are only finite $y \in V$ such that $xy \in E$. A graph is connected if any two vertices x and y can be connected via finite edges. For any edge $xy \in E$, we assume that the weight ω_{xy} satisfies $\omega_{xy} = \omega_{yx} > 0$. The measure $\mu : V \rightarrow \mathbb{R}^+$ is a finite positive function. For any function $u : V \rightarrow \mathbb{R}$, the graph Laplacian of u is defined as

$$\Delta u(x) := \frac{1}{\mu(x)} \sum_{y \sim x} \omega_{xy} (u(y) - u(x)), \quad (1.2)$$

where $y \sim x$ stands for any vertex y connected with x by an edge $xy \in E$.

In the past decade, the study of partial differential equations on graphs, which has a wide range of applications in image processing, data analysis, and neural networks, has been receiving great attention; see [1–3] for more practical backgrounds. Recently, there are some mathematical works on geometric inequalities on graphs [4, 5] and the heat equation on graphs [6–10]. In the case of elliptic differential equations on graphs, Grigor'yan et al. [11–13] obtained the existence results by using variational methods. The existence of normalized solutions for nonlinear Schrödinger equations on metric graphs has been obtained in [14, 15]. On locally finite graphs, there are some works about nonlinear Schrödinger equations
