**International Law and Revolution** Owen Taylor, 2019-05-23 This book explores the historical inter relations between international law and revolution with a focus on how international anti capitalist struggle plays out through law The book approaches the topic by analysing the meaning of revolution and what revolutionary activity might look like before comparing this with legal activity to assess the basic compatibility between the two It then moves on to examine two prominent examples of revolutionary movements engaging with international law from the twentieth century the early Soviet Union and the Third World movement in the nineteen sixties and seventies The book proposes that the form of law or its base logic is rooted in capitalist social relations of private property and contract and that therefore the law is a particularly inhospitable place to advance revolutionary breaks with established distributions of power or wealth This does not mean that the law is irrelevant to revolutionaries but that turning to legal means comes with tendencies towards conservative outcomes In the light of this the book considers the possibility of how or whether international law might contribute to the pursuit of a more egalitarian future **International Law and Revolution** fills a significant gap in the field of international legal theory by offering a deep theoretical reflection on the meaning of the concept of revolution for the twenty first century and its link to the international legal system It develops the commodity form theory of law as applied to international law and explores the limits of law for progressive social struggle informed by historical analysis It will therefore appeal to students and scholars of public international law legal history human rights international politics and political history

*The Legality and Legitimacy of the Use of Force in Northeast Asia* Brendan Howe, Boris Kondoch, 2013-06-06 In *The Legality and Legitimacy of the Use of Force in Northeast Asia* Brendan Howe and Boris Kondoch bring together distinguished authors with extensive Northeast Asian backgrounds to offer a diverse and comprehensive evaluation of when it is right from regional perspectives to use force in international relations The use of force in international relations has been severely curtailed by pragmatic considerations of international order and further constrained by positive international law In Northeast Asia the prohibition of aggression has remained uncontested Strict adherence to non intervention in Northeast Asia has however increasingly come under attack from internal and external normative communities The contributors therefore use regional legal normative cultural and historical insights to shed light on the contemporary positions of Northeast Asian political communities with regard to the use of force
