Fire Ice The Nuclear Winter By Rowan Robinson Michael:

Fire & Ice Michael Rowan-Robinson, 1985 **Nuclear Fictions** Michael Gardiner, 2024-11-30 In this book Michael Gardiner suggests that the conception of the war ending weapon was tied up with a longer commitment to unified space and singular progress The mission for total weapons can be seen rising with the highly technical defensive war of the later nineteenth century and passing through twentieth century atomic research then the targeting of the outsides of commercial empire and the post war consensus with deterrence as its foundation The end of the Cold War brought an opportunity to fully naturalise deterrence but also brought a tacit acceptance of nuclear violence while forms of violence against the individual were rigorously sought out If the world unifying role of deterrence has always been undermined by the rise of rival empires it has also been questioned by critical communities including the consensus sceptics of the 1950s 60s 1980s 90s Nuclear Criticism and readers of nuclear ism millennial campaigns for Scottish independence and twenty first century descriptions of nuclear colonialism Recently it has become more obvious that an Anglosphere concept of worldly deterrence was bound to a singular and ultimately nihilistic idea of progress bio Michael Gardiner is Professor in the Department of English and Comparative Literature at the University of Warwick *The Moon in the Nautilus Shell* Daniel B. Botkin, 2012-09-14 Why do we keep talking about so many environmental problems and rarely solve any If these are scientific issues then why can't scientists solve them or at least agree on what to do In his new book *The Moon in the Nautilus Shell* ecologist Daniel Botkin explains why For one thing although we live in a world of constantly changing environments and talk a lot about climate change most of our environmental laws policies and scientific premises are based on the idea that the environment is constant never changing except when people affect it For another we have lost contact with nature in personal ways Disconnected from our surroundings we lack the deep understanding and feelings about the environment to make meaningful judgments The environment has become just another one of those special interests that interferes with our lives Poised to be a core text of the twenty first century environmental movement *The Moon in the Nautilus Shell* challenges us to think critically about our role in nature *Global Challenges for Leviathan* Furio Cerutti, 2008-05-01 The sovereign state created at the onset of modernity can no longer protect us nor future generations from nuclear war and the effects of global warming Politics now has to cope with the survival of humankind not just ensure the security of individual nations Will it fail or succeed Far from touting easy solutions this book provides food for thought about the future of state and politics and the meaning of our relationship with posterity *The Harmony of the Sphere* Silvia De Bianchi, 2013-08-19 The contributors to *The Harmony of the Sphere* include professional historians of science philosophers of science and scientists who offer different perspectives from which Kant's and Herschel's systems can be approached The title *The Harmony of the Sphere* is an evocative one In it the reader will hear an echo of Kepler's cosmological system In fact however this title refers to the new model of the world defended by Kant and Herschel This model dismissed the idea of a finite static cosmos and introduced an

evolutionary perspective This volume represents a contribution to studies that integrate the history and philosophy of science It presents for the first time a comparative study of Kant and Herschel in order to highlight the historical and philosophical underpinnings of their worldviews worldviews which would in turn have a crucial influence on the development of nineteenth and twentieth century astronomy and cosmology *Balancing Passion and Reason* Mary Kathryn Neal,1988 Old Lies Revisited Winifred Whitehead,1991 No **Building a Greenhouse** Justin Masten Shaw,1991 *New Scientist* ,1985-10 Histoire Sociale ,1986 **Science & Public Policy** ,1988 Peace News for Nonviolent Revolution ,1986
