Fire In Paradise The Yellowstone Fires And The Politics Of Environmentalism:

Fire in Paradise Micah Morrison, 1993 Discusses the debate over the controversial political and environmental issues surrounding the 1988 series of fires in Yellowstone National Park **Yellowstone in the Afterglow** Mary Ann Franke, 2000

Protecting Yellowstone Michael J. Yochim, 2013-03-15 Yellowstone National Park looks like a pristine western landscape populated by its wild inhabitants bison grizzly bears and wolves But the bison do not always range freely snowmobile noise intrudes upon the park's profound winter silence and some tourist villages are located in prime grizzly bear habitat Despite these problems the National Park Service has succeeded in reintroducing wolves allowing wildfires to play their natural role in park forests and prohibiting a gold mine that would be present in other more typical western landscapes Each of these issues bison snowmobiles grizzly bears wolves fires and the New World Mine was the center of a recent policy making controversy involving federal politicians robust debate with interested stakeholders and discussions about the relevant science Yet the outcomes of the controversies varied considerably depending on politics science how well park managers allied themselves with external interests and public thinking about the effects of park proposals on their access and economies Michael Yochim examines the primary influences upon contemporary national park policy making and considers how those influences shaped or constrained the final policy In addition Yochim considers how park managers may best work within the contemporary policy making context to preserve national parks **The Really Inconvenient Truths** Iain Murray, 2008-04-22 Al Gore is bad for the planet Talk about really inconvenient truths that's one of the many you'll find in Iain Murray's rollicking exposés of environmental blowhards who waste more energy endanger more species and actually kill more people yes that's right than the environmental villains they finger Did you know that estrogen from birth control and morning after pills is causing male fish across America to develop female sex organs Funny how pro choice and environmentalist liberals never talk about that Or how about this the Live Earth concert to save the planet released more CO₂ into the atmosphere than a fleet of 2 000 Humvees emit in a year We hear a lot about AIDS in Africa but the number one killer of children in much of Africa is malaria and guess who was responsible for banning the pesticide that used to have malaria under control Iain Murray a sprightly conservative environmental analyst with a long record of skewering liberal hypocrisy has dug up seven of the all time great environmental catastrophes caused by the Left and exposed them in *The Really Inconvenient Truths* **Yellowstone Wildlife** Paul A. Johnsgard, 2013-06-15 *Yellowstone Wildlife* is a natural history of the wildlife species that call Yellowstone National Park and the Greater Yellowstone Ecosystem their home Illustrated with stunning images by renowned wildlife photographer Thomas Mangelsen *Yellowstone Wildlife* describes the lives of species in the park exploring their habitats from the Grand Tetons to Jackson Hole From charismatic megafauna like elk bison wolves bighorn sheep and grizzly bears to smaller mammals like bats pikas beavers and otters to some of the 279 species of birds Johnsgard describes the behavior of animals throughout the seasons with sections on what summer and autumn mean to the

wildlife of the park especially with the intrusion of millions of tourists each year Enhanced by Mangelsen s wildlife photography Yellowstone Wildlife reveals the beauty and complexity of these species intertwined lives and that of Yellowstone s greater ecosystem *Blazing Heritage* Hal K. Rothman,2007-04-12 National parks played a unique role in the development of wildfire management on American public lands With a different mission and powerful meaning to the public the national parks were a psychic battleground for the contests between fire suppression and its use as a management tool *Blazing Heritage* tells how the national parks shaped federal fire management *Storytelling in Yellowstone* Lee H. Whittlesey,2007 Whittlesey shares tales of the great Geyserland as told by the earliest tour guides of America s first and most unique national park Wonderlandscape John Clayton,2017-08-08 Yellowstone is America s premier national park Today is often a byword for conservation natural beauty and a way for everyone to enjoy the great outdoors But it was not always this way *Wonderlandscape* presents a new perspective on Yellowstone the emotions various natural wonders and attractions evoke and how this explains the park s relationship to America as a whole Whether it is artists or naturalists entrepreneurs or pop culture icons each character in the story of Yellowstone ends up reflecting and redefining the park for the values of its era For example when Ernest Thompson Seton wanted to observe bears in 1897 his adventures highlighted the way the park transformed from a set of geological oddities to a wildlife sanctuary reflecting a nation was concerned about disappearing populations of bison and other species Subsequent eras added Rooseveltian masculinity ecosystem science and artistic inspiration as core Yellowstone hallmarks As the National Park system enters its second century *Wonderlandscape* allows us to reflect on the values and heritage that Yellowstone alone has come to represent how it will shape the America s relationship with her land for generations to come *Keeping Faith with Nature* Robert B. Keiter,2008-10-01 As the twenty first century dawns public land policy is entering a new era This timely book examines the historical scientific political legal and institutional developments that are changing management priorities and policies developments that compel us to view the public lands as an integrated ecological entity and a key biodiversity stronghold Once the background is set each chapter opens with a specific natural resource controversy ranging from the Pacific Northwest s spotted owl imbroglio to the struggle over southern Utah s Colorado Plateau country Robert Keiter uses these case histories to analyze the ideas forces and institutions that are both fomenting and retarding change Although Congress has the final say in how the public domain is managed the public land agencies federal courts and western communities are each playing important roles in the transformation to an ecological management regime At the same time a newly emergent and homegrown collaborative process movement has given the public land constituencies a greater role in administering these lands Arguing that we must integrate the new imperatives of ecosystem science with our devolutionary political tendencies Keiter outlines a coherent new approach to natural resources policy Crisis on the national forests United States. Congress. House. Committee on Resources. Subcommittee on Forests and Forest Health,2003 **Yellowstone and the Snowmobile** Michael J.

Yochim,2009 The first scholarly study of winter use in any national park examines the history of the conflict between the National Park Service and various interest groups over snowmobile use in Yellowstone a highly politicized value driven battle that has taken a serious toll on the NPS s ability to protect the park Wyoming Wildlife: A Natural History Paul Johnsgard,2019-06-30 This book surveys Wyoming s mammal bird reptile and amphibian faunas In addition to introducing the state s geography geology climate and major ecosystems it provides 65 biological profiles of 72 mammal species 195 profiles of 196 birds 9 profiles of 12 reptiles and 6 profiles of 9 amphibians There are also species lists of Wyoming s 117 mammals 445 birds 22 reptiles and 12 amphibians Also included are descriptions of nearly 50 national and state properties including parks forests preserves and other public access natural areas in Wyoming The book includes a text of more than 150 000 words nearly 700 references a glossary of 115 biological terms nearly 50 maps and line drawings by the author and 33 color photographs by Thomas D Mangelsen Albany Law Environmental Outlook Journal ,2005 *Restoring a Presence* Peter Nabokov, Lawrence Loendorf,2016-01-18 Placing American Indians in the center of the story *Restoring a Presence* relates an entirely new history of Yellowstone National Park Although new laws have been enacted giving American Indians access to resources on public lands Yellowstone historically has excluded Indians and their needs from its mission Each of the other flagship national parks Glacier Yosemite Mesa Verde and Grand Canyon has had successful long term relationships with American Indian groups even as it has sought to emulate Yellowstone in other dimensions of national park administration In the first comprehensive account of Indians in and around Yellowstone Peter Nabokov and Lawrence Loendorf seek to correct this administrative disparity Drawing from archaeological records Indian testimony tribal archives and collections of early artifacts from the Park the authors trace the interactions of nearly a dozen Indian groups with each of Yellowstone s four geographic regions *Restoring a Presence* is illustrated with historical and contemporary photographs and maps and features narratives on subjects ranging from traditional Indian uses of plant mineral and animal resources to conflicts involving the Nez Perce Bannock and Sheep Eater peoples By considering the many roles Indians have played in the complex history of the Yellowstone region authors Nabokov and Loendorf provide a basis on which the National Park Service and other federal agencies can develop more effective relationships with Indian groups in the Yellowstone region

American Indians and Yellowstone National Park Peter Nabokov, Lawrence L. Loendorf,2002 **Compromising Yellowstone** Michael J. Yochim,2004 Four case studies all drawn from Yellowstone National Park s recent history examine the relationship between interest groups and the National Park Service NPS in park policy making The NPS initiates and controls most policy making efforts with political influence common Major interest groups include environmentalists recreation advocates business groups and scientists Differing motivations and perspectives on park purpose create controversies that usually result in compromises Case studies begin with first an NPS effort about 1960 to zone portions of Yellowstone Lake as non motorized conservationists and the NPS contested boating groups and some powerful politicians

The second study details efforts to close the Fishing Bridge village amid concerns that grizzly bears were dying in unacceptable numbers in that area. Business and recreational interests contested the NPS who received little support from environmental groups. The third study details the fire policy review that took place after the historic 1988 wildfires. Widespread scientist support for allowing wildfires to burn naturally overcame economic and political opposition. The final study examines the ongoing snowmobile controversy, finding that all four primary interest groups are involved strongly, engaging the debate through litigation and political maneuvering. Throughout, conservationists believe parks to be sacred nature preserves and have the most supportive relationship with the NPS. Recreational groups cherish individual freedoms and strive to retain park access; they often contest NPS intentions. Business groups envision parks as economic generators with a primary purpose being the promotion of local and regional economies; they are effective at compelling the NPS to compromise. Scientists lead in promoting science-based park management but sometimes fail to provide consistent or timely direction. All interest groups assume that park resource exploitation is inappropriate and find the NPS relatively open to their input. Political influence is pervasive and in Yellowstone's case generally favorable to economic enhancement and public access. The compromise settlements may weaken overall park protections but preserve Yellowstone as one of America's wildest places. Such controversies are the medium through which Americans contest core values that reflect conflicting relationships between people and nature and by which Yellowstone is defined as a wild place. *Wildfire*, 1998. *Public Land & Resources Law Review*, 2012. *The Library Journal*, 1993. Includes beginning Sept 15, 1954 and on the 15th of each month Sept-May a special section. School library journal ISSN 0000-0035 called Junior Libraries 1954-May 1961. Also issued separately. **Vocational and Technical Resources for Community College Libraries** Mary Ann Laun, 1995.
