Smith, 2002-05-31 No composer contributed more to film than Bernard Herrmann who in over 40 scores enriched the work of such directors as Orson Welles Alfred Hitchcock Francois Truffaut and Martin Scorsese In this first major biography of the composer Steven C Smith explores the interrelationships between Herrmann's music and his turbulent personal life using much previously unpublished information to illustrate Herrmann's often outrageous behavior his working methods and why his music has had such lasting impact From his first film Citizen Kane to his last Taxi Driver Herrmann was a master of evoking psychological nuance and dramatic tension through music often using unheard of instrumental combinations to suit the dramatic needs of a film His scores are among the most distinguished ever written ranging from the fantastic Fahrenheit 451 The Day the Earth Stood Still to the romantic Obsession The Ghost and Mrs Muir to the terrifying Psycho Film was not the only medium in which Herrmann made a powerful mark His radio broadcasts included Orson Welles's Mercury Theatre on the Air and The War of the Worlds His concert music was commissioned and performed by the New York Philharmonic and he was chief conductor of the CBS Symphony Almost as celebrated as these achievements are the enduring legends of Herrmann's combativeness and volatility Smith separates myth from fact and draws upon heretofore unpublished material to illuminate Herrmann's life and influence Herrmann remains as complex as any character in the films he scored a creative genius an indefatigable musicologist an explosive bully a generous and compassionate man who desperately sought friendship and love Films scored by Bernard Herrmann Citizen Kane The Ghost and Mrs Muir Vertigo Psycho Fahrenheit 451 Taxi Driver The Magnificent Ambersons The Man Who Knew Too Much North By Northwest The Birds The Snows of Kilimanjaro Cape Fear Marnie Torn Curtain among others **Road to the Fire's Heart** M. in numerical analysis newton s method also known as the newton raphson method named after isaac newton and joseph raphson is a root finding algorithm which produces successively better approximations to the roots or zeroes of a real valued function the most basic version starts with a single variable function f defined for a real variable x the function s derivative f' and an initial guess x_0 for a root of f if the function satisfies sufficient assumptions and the initial guess is close
