threads of research and speculation to muse upon the meaning of it all Our hominid ancestors experienced a spiritual awakening at the very dawn of consciousness that set them apart from the other creatures of our planet It was a journey to another realm induced by a special food that belonged to the gods This was a plant that was animate with the spirit of deity It was an entheogen It was the visionary vehicle for the trip of the first shaman The story was told over and over again until it achieved the perfect form of a myth The realm was imagined as a topographical place the outer limit of the cosmos the fiery empyrean or its geocentric opposite our own planet Gaia Myths multiplied over time but they always preserved this primordial truth These myths provide a road map a scenario if you can read them for whoever today wants to follow However it is not an easy journey and it is also fraught with many dangers of getting lost of finding no return Access to the entheogens is now largely prohibited or strictly licensed The restrictions constitute an infringement of cognitive freedom limiting the further evolution of human potential into productive creative imagination and experiences that lie beyond the normal the traditional province of shamans who can understand the speech of plants and animals change shape at will and journey both physically and in the spirit to distant exotic realms In addition religions have staked out territorial claims to this realm of spiritual consciousness They have colonized it identified it with their god often reserving the access for their own elite Similarly trade in drugs both medicinal and illegal has colonized the entheogens making them only chemicals rationally depriving them of their spirit

Entheogens have been deemed be prohibited controlled substances and as such is an infringement of cognitive freedom Whatever the danger of potential abuse the substance is not the fault but the user The hammer is not

guilty but the carpenter who misuses it because of deficient training In order to exonerate the executioner in Classical antiquity the axe was brought to trial and found guilty The prohibition has drastically retarded the investigation into the therapeutic potential of proscribed drugs including their efficacy in curing addiction Some of these substances also offer the potential for accessing levels of cognition and consciousness beyond the ordinary the traditional provenance of mystics and shamans like bilocation clairvoyance and zoomorphism
