Fire And Ice 80:

Fire and Ice Richard L. Davis, 2016-08-01 *Death by Fire and Ice* Brian O'Connor, 2022-10-15 *Death by Fire and Ice* tells the little known story of the sinking of the steamboat Lexington on Long Island Sound in January 1840 Built in 1835 by Cornelius Vanderbilt the Lexington left Manhattan bound for Stonington Connecticut at four o'clock in the afternoon on a bitterly cold day carrying an estimated one hundred forty seven passengers and crew and a cargo of among other things baled cotton After making her way up an ice encrusted East River and into Long Island Sound she caught fire off Eaton's Neck on Long Island's north shore at approximately seven o'clock The fire quickly ignited the cotton stowed on board With the crew unable to extinguish the fire the blaze burned through the ship's wheel and tiller ropes rendering the ship unmanageable Soon after the engine died and the blazing ship drifted aimlessly in the Sound away from shore with the prevailing wind and current As the night wore on the temperature plummeted reaching nineteen degrees below zero With no hope of rescue on the dark horizon the forlorn passengers and crew faced a dreadful decision remain on board and perish in the searing flames or jump overboard and succumb within minutes to the Sound's icy waters By three o'clock in the morning the grisly ordeal was over for all but one passenger and three members of the crew the only ones who survived The tragedy remains the worst maritime disaster in the history of Long Island Sound Within days the New York City Coroner convened an inquest to determine the cause of the disaster After two weeks of testimony reported daily in the New York City press the inquest jury concluded that the Lexington had been permitted to operate on the Sound at the imminent risk of the lives and property of its passengers and that had the crew acted appropriately the fire could have been extinguished and a large portion if not all of the passengers saved The public's reaction to the verdict was scathing the press charged that the members of the board of directors of the Transportation Company which had purchased the Lexington from Commodore Vanderbilt in 1839 were guilty of murder and should be indicted Calls were immediately made for Congress to enact legislation to improve passenger safety on steamboats This book explores the ongoing debate in Congress during the nineteenth century over its power to regulate steamboat safety and it examines the balance Congress struck between the need to insulate the nation's shipping industry from ruinous liability for lost cargo while at the same time greatly enhancing passenger safety on the nation's steamboats Wind, Fire, and Ice Robert M. Bunes, 2021-10-01 Between 1955 and 1987 the United States Coast Guard Cutter Glacier was the largest and most powerful icebreaker in the free world Consequently it was often given the most difficult and dangerous Antarctic missions This is the dramatic first person account of its most legendary voyage In 1970 the author was the Chief Medical Officer on the Glacier when it became trapped deep in the Weddell Sea pressured by 100 miles of wind blown icepack Glacier was beset within seventy miles of where Sir Ernest Shackleton's ship the Endurance was imprisoned in 1915 His stout wooden ship succumbed to the crushing pressure of the infamous Weddell Sea pack ice and sank leading to an unbelievable two year saga of hardship heroism and survival The

sailors aboard the Glacier feared they would suffer Shackleton's fate or one even worse. Freakishly good luck eventually saved the Glacier from destruction in the crushing ice pack only to experience a three-hour fire that nearly killed one of the crew followed by eighty-foot waves that came close to capsizing the ship. Wind, Fire, and Ice is a story about a physician who starts out with a set of false assumptions, namely that he is going to have an easy assignment and see numerous exotic ports but then slowly comes to realize a much different hard reality.

[Fire and Ice](#) Natalie Starkey, 2021-09-30 A tour of the Solar System's tallest hottest coldest and weirdest volcanoes and a look inside what makes them erupt The volcano among the most familiar and perhaps the most terrifying of all geological phenomena However Earth isn't the only planet to harbour volcanoes In fact the Solar System and probably the entire Universe is littered with them Our own Moon which is now a dormant piece of rock had lava flowing across its surface billions of years ago while Mars can be credited with the largest volcano in the Solar System Olympus Mons which stands 25km high While Mars's volcanoes are long dead volcanic activity continues in almost every other corner of the Solar System in the most unexpected of locations We tend to think of Earth volcanoes as erupting hot molten lava and emitting huge billowing clouds of incandescent ash However it isn't necessarily the same across the rest of the Solar System For a start some volcanoes aren't even particularly hot Those on Pluto for example erupt an icy slush of substances such as water methane nitrogen or ammonia that freeze to form ice mountains as

hard as rock While others like the volcanoes on one of Jupiter's moons Io erupt the hottest lavas in the Solar System onto a surface covered in a frosty coating of sulphur Whether they are formed of fire or ice volcanoes are of huge importance for scientists trying to picture the inner workings of a planet or moon Volcanoes dredge up materials from the otherwise inaccessible depths and helpfully deliver them to the surface The way in which they erupt and the products they generate can even help scientists ponder bigger questions on the possibility of life elsewhere in the Solar System Fire and Ice is an exploration of the Solar System's volcanoes from the highest peaks of Mars to the intensely inhospitable surface of Venus and the red hot summits of Io to the coldest seemingly dormant icy carapaces of Enceladus and Europa an unusual look at how these cosmic features are made and whether such active planetary systems might host life
