Fire Storm Jean Craighead George, 2003-09-16 Alex enjoys kayaking behind the raft of his aunt and uncle as they journey down Idaho's Salmon River until they find themselves in the middle of a forest fire **Fire, Storm and Flood** James Dyke, 2021-08-05 An unflinching photographic record of the epic effects of a violent climate from the earliest extinction events to the present Violent geologic events have ravaged the Earth since time began spanning the vast eons of our planet's existence These seismic phenomena have scored their marks in rock strata and been reflected in fossil records for future humanity to excavate and ponder For most of the preceeding 78 000 years Homo sapiens simply observed natural climate upheaval One hundred years ago however industrialization stunningly changed the rules so that now most climate change is driven by us **Fire Storm and Flood** is an unflinching photographic record of the epic effects of a violent climate from the earliest extinction events to the present in which we witness climate chaos forced by unnatural global warming It uses often emotional and moving imagery to drive home the enormity of climatic events offering a sweeping acknowledgment of our crowded planet's heartbreaking vulnerability and show stopping beauty *Firestorm* Edward Struzik, 2017-10-05 Frightening Firestorm comes alive when Struzik discusses the work of offbeat scientists New York Times Book Review Comprehensive and compelling Booklist A powerful message Kirkus Should be required reading Library Journal For two months in the spring of 2016 the world watched as wildfire ravaged the Canadian town of Fort McMurray Firefighters named the fire the Beast It acted like a mythical animal alive with destructive energy and they hoped never to see anything like it again Yet it's not a stretch to imagine we will all soon live in a world in which fires like the Beast are commonplace A glance at international headlines shows a remarkable increase in higher temperatures stronger winds and drier lands a trifecta for igniting wildfires like we've rarely seen before This change is particularly noticeable in the northern forests of the United States and Canada These forests require fire to maintain healthy ecosystems but as the human population grows and as changes in climate animal and insect species and disease cause further destabilization wildfires have turned into a potentially uncontrollable threat to human lives and livelihoods Our understanding of the role fire plays in

healthy forests has come a long way in the past century. Despite this, we are not prepared to deal with an escalation of fire during periods of intense drought and shorter winters, earlier springs, potentially more lightning strikes, and hotter summers. There is too much fuel on the ground, too many people and assets to protect, and no plan in place to deal with these challenges. In *Firestorm*, journalist Edward Struzik visits scorched earth from Alaska to Maine and introduces the scientists, firefighters, and resource managers making the case for a radically different approach to managing wildfire in the 21st century. Wildfires can no longer be treated as avoidable events because the risk and dangers are becoming too great and costly. Struzik weaves a heart-pumping narrative of science, economics, politics, and human determination and points to the ways that we and the wilder inhabitants of the forests around our cities and towns might yet flourish in an age of growing megafires.

SECRETS BETRAYAL SACRIFICE THIS TIME THEY'RE NOT JUST FIGHTING FIRE An original series created by bestselling authors Susan May Warren and Lisa Phillips. He thought his life was over and then she walked back in. Charlie Benning has always been a rescuer, first with the Last Chance County Fire and Rescue team and now as a firefighter with the Jude County Hotshots. But this summer isn't about saving lives; it's about hiding his own terrible secret. A secret he's keeping from his estranged daughter, Alexis. But fate is about to intervene. Will their secrets destroy their second chance? Jayne Price raised her son Orion on her own, just fine, thank you. And now she runs Wildlands Academy, a summer camp that teaches kids how to fight forest fires and confront their own teenage angst. Kids like Alexis Benning, who clearly has a chip on her shoulder about her semi-estranged firefighter father. And Jayne has her own issues, like not wanting her only son to join the elite smokejumping corps. It's enough that he's risking his life as a hotshot on the Jude County team. Then the wildfire turns its force onto the camp, and suddenly the hotshots show up to help her fight it. Only problem: the last person she expects is for her former flame, Charlie Benning, the man she can't forget, to show up working alongside her son. Rather, his son. Who he doesn't know exists. And then Charlie discovers the secret she's been keeping, and he's torn between anger and the long-simmering love that refuses to die. And Jayne isn't about to let go of the man she loves a second time. But if the blazing wildfire isn't enough, a dangerous and relentless killer is on the prowl in the woods. Now, with the camp cut off from the outside world and the fire closing in, it's a race against time as Charlie, Jayne, Orion, and a team of courageous smokejumpers join forces to protect the campers against a merciless inferno and a murderer. But the biggest threat of all might be Charlie's devastating secret that could destroy the happy ending they've waited for so long. Prepare for an edge-of-your-seat journey that will leave you breathless until the very last page.
