Crump, 2009-11-15 Vampire bats that regurgitate blood for roosting buddies Mosquitoes that filch honeydew droplets from ants Reptiles that enforce chastity on their lovers with copulatory plugs Capuchin monkeys that use millipede secretions as mosquito repellent The natural world is full of unusual relationships and negotiation between life forms striving to survive is evolution at its most diverse entertaining and awe inspiring Picking up where her highly popular *Headless Males Make Great Lovers* left off tropical field biologist Marty Crump takes us on another voyage of discovery into the world of unusual natural histories this time focusing on extraordinary interactions involving animals plants fungi and bacteria *Sexy Orchids Make Lousy Lovers* you need only recall your last sinus infection to understand how that works Throughout Crump brings her trademark spunk and zest to these stories of intimate exchange She introduces readers to penguins that babysit pseudoscorpions that ride and mate under the wings of giant harlequin beetles and parasitic fungi that bend insects to their will A lively companion to Crump's earlier work *Sexy Orchids Make Lousy Lovers* *Other Unusual Relationships* captures the bizarre and befuddling aspects of the behavior of animals plants and microbes After this entertaining romp through the world of natural relationships you'll never look at an orchid the same way again

Engineering Optimization Xin-She Yang, 2010-07-20 An accessible introduction to metaheuristics and optimization featuring powerful and modern algorithms for application across engineering and the sciences From engineering and computer science to economics and management science optimization is a core component for problem solving Highlighting the latest developments that have evolved in recent years *Engineering Optimization An Introduction with Metaheuristic Applications* outlines popular metaheuristic algorithms and equips readers with the skills needed to apply these techniques to

their own optimization problems With insightful examples from various fields of study the author highlights key concepts and techniques for the successful application of commonly used metaheuristic algorithms including simulated annealing particle swarm optimization harmony search and genetic algorithms The author introduces all major metaheuristic algorithms and their applications in optimization through a presentation that is organized into three succinct parts Foundations of Optimization and Algorithms provides a brief introduction to the underlying nature of optimization and the common approaches to optimization problems random number generation the Monte Carlo method and the Markov chain Monte Carlo method Metaheuristic Algorithms presents common metaheuristic algorithms in detail including genetic algorithms simulated annealing ant algorithms bee algorithms particle swarm optimization firefly algorithms and harmony search Applications outlines a wide range of applications that use metaheuristic algorithms to solve challenging optimization problems with detailed implementation while also introducing various modifications used for multi objective optimization Throughout the book the author presents worked out examples and real world applications that illustrate the modern relevance of the topic A detailed appendix features important and popular algorithms using MATLAB and Octave software packages and a related FTP site houses MATLAB code and programs for easy implementation of the discussed techniques In addition references to the current literature enable readers to investigate individual algorithms and methods in greater detail

Engineering Optimization An Introduction with Metaheuristic Applications is an excellent book for courses on optimization and computer simulation at the upper undergraduate and graduate levels It is also a valuable reference for researchers and practitioners working in the fields of mathematics engineering computer science operations research and management science who use metaheuristic algorithms to solve problems in their everyday work [Nature-inspired Metaheuristic Algorithms](#) Xin-She Yang,2010 Modern metaheuristic algorithms such as particle swarm optimization and cuckoo search start to demonstrate their power in dealing with tough optimization problems and even NP hard problems This book reviews and introduces the state of the art nature inspired metaheuristic algorithms for global optimization including ant and bee algorithms bat algorithm cuckoo search differential evolution firefly algorithm genetic algorithms harmony search particle swarm optimization simulated annealing and support vector machines In this revised edition we also include how to deal with nonlinear constraints Worked examples with implementation have been used to show how each algorithm works This book is thus an ideal textbook for an undergraduate and or graduate course as well as for self study As some of the algorithms such as the cuckoo search and firefly algorithms are at the forefront of current research this book can also serve as a reference for researchers
