Fires In October:

The Great Chicago Fire and the Myth of Mrs. O'Leary's Cow Richard F. Bales, 2015-09-01 The Great Chicago Fire of 1871 swallowed up more than three square miles in two days leaving thousands homeless and 300 dead Throughout history the fire has been attributed to Mrs O Leary an immigrant Irish milkmaid and her cow On one level the tale of Mrs O Leary's cow is merely the quintessential urban legend But the story also represents a means by which the upper classes of Chicago could blame the fire's chaos on a member of the working poor Although that fire destroyed the official county documents some land tract records were saved Using this and other primary source information Richard F Bales created a scale drawing that reconstructed the O Leary neighborhood Next he turned to the transcripts more than 1 100 handwritten pages from an investigation conducted by the Board of Police and Fire Commissioners which interviewed 50 people over the course of 12 days The board's final report published in the Chicago newspapers on December 12 1871 indicates that commissioners were unable to determine the cause of the fire And yet by analyzing the 50 witnesses' testimonies the author concludes that the commissioners could have determined the cause of the fire had they desired to do so Being more concerned with saving their own reputation from post fire reports of incompetence drunkenness and bribery the commissioners failed to press forward for an answer The author has uncovered solid evidence as to what really caused the Great Chicago Fire [The Miramichi Fire](#) Alan MacEachern, 2020-07-23 On 7 October 1825 a massive forest fire swept through northeastern New Brunswick devastating entire communities When the smoke cleared it was estimated that the fire had burned across six thousand square miles one fifth of the colony The Miramichi Fire was the largest wildfire ever to occur within the British Empire one of the largest in North American history and the largest along the eastern seaboard Yet despite the international attention and relief efforts it generated and the ruin it left behind the fire all but disappeared from public memory by the twentieth century A masterwork in historical imagination The Miramichi Fire vividly reconstructs nineteenth century Canada's greatest natural disaster meditating on how it was lost to history First and foremost an environmental history the book examines the fire in the context of the changing relationships between humans and nature in colonial British North America and New England while also exploring social memory and the question of how history becomes established warped and forgotten Alan MacEachern explains how the imprecise and conflicting early reports of the fire's range along with the quick rebound of the forests and economy of New Brunswick led commentators to believe by the early 1900s that the fire's destruction had been greatly exaggerated As an exercise in digital history this book takes advantage of the proliferation of online tools and sources in the twenty first century to posit an entirely new reading of the past Resurrecting one of Canada's most famous and yet unexamined natural disasters The Miramichi Fire traverses a wide range of historical and scientific literatures to bring a more complete story into the light [The Seasonal Nature of Fires](#) , **You and Forest Fires** United States. The World To-day ,1909 **Predictive Species and Habitat Modeling in Landscape Ecology** C. Ashton Drew,Yolanda F. Wiersma,Falk Huettmann,2010-11-25 Most projects in Landscape Ecology at some point define a species habitat association These models are inherently spatial dealing with landscapes and their configurations Whether coding behavioral rules for dispersal of simulated organisms through simulated landscapes or designing the sampling extent of field surveys and experiments in real landscapes landscape ecologists must make assumptions about how organisms experience and utilize the landscape These convenient working postulates allow modelers to project the model in time and space yet rarely are they explicitly considered The early years of landscape ecology necessarily focused on the evolution of effective data sources

metrics and statistical approaches that could truly capture the spatial and temporal patterns and processes of interest Now that these tools are well established we reflect on the ecological theories that underpin the assumptions commonly made during species distribution modeling and mapping This is crucial for applying models to questions of global sustainability Due to the inherent use of GIS for much of this kind of research and as several authors research involves the production of multicolored map figures there would be an 8 page color insert Additional color figures could be made available through a digital archive or by cost contributions of the chapter authors Where applicable would be relevant chapters GIS data and model code available through a digital archive The practice of data and code sharing is becoming standard in GIS studies is an inherent method of this book and will serve to add additional research value to the book for both academic and practitioner audiences

The Iron Age ,1906 **Iron Age** ,1904 World Disasters Keith Eastlake, Henry Russell, Mike Sharpe, 2001-05 This fascinating book looks at some of the most horrifying and noteworthy disasters to have occurred around the world More than 200 disasters involving aircraft ships and trains as well as fires are analysed in detail accompanied by 500 photographs The entries which are arranged chronologically explain the background to each incident the event itself and the search for causes and culprits The volume also contains a wide ranging introduction a bibliography and a comprehensive index

Chicago's Great Fire Carl Smith, 2020-10-06 A definitive chronicle of the 1871 Chicago Fire as remembered by those who experienced it from the author of *Chicago and the American Literary Imagination* Over three days in October 1871 much of Chicago Illinois was destroyed by one of the most legendary urban fires in history Incorporated as a city in 1837 Chicago had grown at a breathtaking pace in the intervening decades and much of the hastily built city was made of wood Starting in Catherine and Patrick O Leary s barn the Fire quickly grew out of control twice jumping branches of the Chicago River on its relentless path through the city s three divisions While the death toll was miraculously low nearly a third of Chicago residents were left homeless and more were instantly unemployed This popular history of the Great Chicago Fire approaches the subject through the memories of those who experienced it Chicago historian Carl Smith builds the story around memorable characters both known to history and unknown including the likes of General Philip Sheridan and Robert Todd Lincoln Smith chronicles the city s rapid growth and its place in America s post Civil War expansion The dramatic story of the fire revealing human nature in all its guises became one of equally remarkable renewal as Chicago quickly rose back up from the ashes thanks to local determination and the world s generosity As we approach the fire s 150th anniversary Carl Smith s compelling narrative at last gives this epic event its full and proper place in our national chronicle The best book ever written about the fire a work of deep scholarship by Carl Smith that reads with the forceful narrative of a fine novel It puts the fire and its aftermath in historical political and social context It s a revelatory pleasure to read Chicago Tribune
