Building Community Resilience to Disasters Anita Chandra, 2011 Community resilience or the sustained ability of a community to withstand and recover from adversity has become a key policy issue at federal state and local levels including in the National Health Security Strategy Because resources are limited in the wake of an emergency it is increasingly recognized that resilience is critical to a community's ability to reduce long recovery periods after an emergency This report provides a roadmap for federal state and local leaders who are developing plans to enhance community resilience for health security threats and describes options for building community resilience in key areas Based on findings from a literature review and a series of community and regional focus groups the authors provide a definition of community resilience in the context of national health security and a set of eight levers and five core components for building resilience They then describe suggested activities that communities are pursuing and may want to strengthen for community resilience and they identify challenges to implementation

The Big Truck That Went By Jonathan M. Katz, 2013-01-08 On January 12 2010 the deadliest earthquake in the history of the Western Hemisphere struck the nation least prepared to handle it Jonathan M Katz the only full time American news correspondent in Haiti was inside his house when it buckled along with hundreds of thousands of others In this visceral authoritative first hand account Katz chronicles the terror of that day the devastation visited on ordinary Haitians and how the world reacted to a nation in need More than half of American adults gave money for Haiti part of a monumental response totaling 16.3 billion in pledges But three years later the relief effort has foundered It's most basic promises to build safer housing for the homeless alleviate severe poverty and strengthen Haiti to face future disasters remain unfulfilled The Big Truck That Went By presents a sharp critique of international aid that defies today's conventional wisdom that the way wealthy countries give aid makes poor countries seem irredeemably hopeless while trapping millions in cycles of privation and catastrophe Katz follows the money to uncover startling truths about how good intentions go wrong and what can be done to make aid smarter With coverage of Bill Clinton who came to help lead the reconstruction movie star aid worker Sean Penn Wyclef Jean Haiti's leaders and people alike Katz weaves a complex darkly funny and unexpected portrait of one of the world's most fascinating countries The Big Truck That Went By is not only a definitive account of Haiti's earthquake but of the world we live in today

Cerf Berr of Médelsheim 1726-1793 Margaret R. O'Leary, MD, 2014-07-31 On December 7 1793 an old man lay motionless at last surrounded by his family rabbis and members of the society who would prepare his body for Jewish burial Sixteen days after he was sentenced to jail his family would go to extraordinary efforts to bury him in a Jewish cemetery ordered destroyed by the French government just two weeks earlier The old man was Cerf Berr of Mdelsheim the tenacious eighteenth century Ashkenazi emancipator of the French Jews

Margaret R OLeary MD presents Cerf Berr's life story recognizing his profound contributions to the liberation of the Jews of France. While chronicling his incredible journey, OLeary not only highlights Cerf Berr's scrupulous honesty and reliability that earned him the deep appreciation of the French Crown but also details how he besieged authorities in both Strasbourg and Versailles to grant political, social, and economic equality for all of his coreligionists in France. Cerf Berr achieved that milestone on September 27, 1791, only to die two years later after imprisonment by sadistic French revolutionaries. Cerf Berr of Mdelshheim is the biography of a man who was faithful to his people, sought the good for the community, and cherished justice all while making a momentous contribution to the history of France and the Jews. *The Ethics of Coercion in Mass Casualty Medicine* Griffin Trotter, 2007-03-01

Disasters, both natural and manufactured, provide ample opportunities for official coercion. Authorities may enact quarantines, force evacuations, and commandeer people and supplies all in the name of the public's health. When might such extreme actions be justified, and how does a democratic society ensure that public officials exercise care and forethought to avoid running roughshod over human rights? In *The Ethics of Coercion in Mass Casualty Medicine*, Griffin Trotter explores these fundamental questions with skepticism, debunking myths in pursuit of an elusive ethical balance between individual liberties and public security. Through real-life and hypothetical case studies, Trotter discusses when forced compliance is justified and when it is not, how legitimate force should be exercised and implemented, and what societies can do to protect themselves against excessive coercion. The guidelines that emerge are both practical and practicable. Drawing on core concepts from bioethics, political philosophy, public health, sociology, and medicine, this timely book lays the groundwork for a new vision of official disaster response based on preventing and minimizing the need for coercive action. *Managing Hurricane Katrina* Arjen Boin, Christer Brown, James A. Richardson, 2019-05-07

The government's response to Hurricane Katrina, one of the most devastating natural disasters in U.S. history, suffered numerous criticisms. Nearly every assessment pointed to failure from evaluations of President George W. Bush, FEMA, and the Department of Homeland Security to the state of Louisiana and the city administration of New Orleans. In *Managing Hurricane Katrina: Lessons from a Megacrisis*, Arjen Boin, Christer Brown, and James A. Richardson deliver a more nuanced examination of the storm's aftermath than the ones anchored in public memory and identify aspects of management that offer more positive examples of leadership than bureaucratic and media reports indicated. Katrina may be the most extensively studied disaster to date, but the authors argue that many academic conclusions are inaccurate or contradictory when examined in concert. Drawing on insights from crisis and disaster management studies, Boin, Brown, and Richardson apply a clear framework to objectively analyze the actions of various officials and organizations during and after Katrina. They specify critical factors that determine the successes and failures of a societal response to catastrophes and demonstrate how to utilize their framework in future superdisasters. Going beyond previous assessments, *Managing Hurricane Katrina* reconsiders the role of government in both preparing for a megacrisis and building an effective response network at a time
