**Automatic Item Generation** Mark J. Gierl, Thomas M. Haladyna, 2013. Automatic item generation (AIG) represents a relatively new and unique research area where specific cognitive and psychometric theories are applied to test construction practices for the purpose of producing test items using technology. The purpose of this book is to bring researchers and practitioners up to date on the growing body of research on AIG by organizing in one volume what is currently known about this research area. Part I begins with an overview of the concepts and topics necessary for understanding AIG by focusing on both its history and current applications. Part II presents two theoretical frameworks and practical applications of these frameworks in the production of item generation. Part III summarizes the psychological and substantive characteristics of generated items. Part IV concludes with a discussion of the statistical models that can be used to estimate the item characteristics of generated items. Features: one future application of AIG describes the current technologies used for AIG and also highlights the unresolved issues that must be addressed as AIG continues to mature as a research area. Comprehensive: The book provides a comprehensive analysis of both the theoretical concepts that define automatic item generation and the practical considerations required to implement these concepts. Varied Applications: Readers are provided with novel applications in diverse content areas, e.g., science and reading comprehension that range across all educational levels, elementary through university.

*Story Symmetry* Monica Leonelle,2021-02-02 What makes a story feel connective engaging and complete If you ve read dozens of storytelling craft books and still don t have a strong answer to

that question you'll love how Story Symmetry doesn't give you another laundry list of items that your story is supposed to have. Instead, Story Symmetry attempts to reveal the connections between the various parts of story so that you can more easily build cohesive plots, characters, themes, and settings without having to stress over the decisions because, surprise, you've probably already made them in another area of your book. Included in the book *Monica's Story Symmetry Framework* which shows you the many layers of a story and how they each relate to each other. Translation guides for building out your story, for example, how you can use character to build your theme and vice versa. The Ultimate Novel Plotter to help you weave all the elements of your story into one cohesive document. Tons of examples from some of the most popular stories of our time including Harry Potter, The Hunger Games, the Twilight series, Star Wars, Lord of the Rings, How To Get Away With Murder, A Song of Ice and Fire, and more. If you've struggled to get 5 star reviews on your stories or build an audience of people dying to get your next book, Story Symmetry will help you identify areas of improvement and even show you how a few small tweaks in your currently available content can make a massive difference in your sales.

High Temperature Superconductor Cable Concepts for Fusion Magnets Christian Barth, 2014-07-20. Three concepts of high temperature superconductor cables carrying kA currents: RACC, CORC, and TSTC are investigated, optimized, and evaluated in the scope of their applicability as conductor in fusion magnets. The magnetic field and temperature dependence of the cables is measured; the thermal expansion and conductivity of structure, insulation, and filling materials are investigated. High temperature superconductor winding packs for fusion magnets are calculated and compared with corresponding low temperature superconductor cases.

*Econometric Foundations Pack with CD-ROM* Ron Mittelhammer (Prof.), George G. Judge, Douglas J. Miller, 2000-07-28. The text and accompanying CD-ROM develop step by step a modern approach to econometric problems. They are aimed at talented upper level undergraduates, graduate students, and professionals wishing to acquaint themselves with the principles and procedures for information processing and recovery from samples of economic data. The text fully provides an operational understanding of a rich set of estimation and inference tools including traditional likelihood-based and non-traditional non-likelihood-based procedures that can be used in conjunction with the computer to address economic problems.

Going Beyond the Theory/Practice Divide in Early Childhood Education Hillevi Lenz Taguchi, 2009-09-10. *Going Beyond the Theory/Practice Divide in Early Childhood Education* focuses on the use of pedagogical documentation as a tool for learning and transformation. Based on innovative research, the author presents new approaches to learning in early childhood education, shifting attention to the force and impact which material objects and artefacts can have in learning. Drawing upon the theories of feminist Karen Barad and philosophers Gilles Deleuze and Félix Guattari, Hillevi Lenz Taguchi discusses examples of how pens, paper, clay, and construction materials can be understood as active and performative agents.

challenging binary divides such as theory practice discourse matter and mind body in teaching and learning Numerous examples from practice are explored to introduce an intra active pedagogy Methodological strategies for learning with children in preschools and in teacher education are brought to the fore For example the neighbourhood around the preschool and children s homes is explored using drawing and construction work on the floor mathematics is investigated in teacher education using the body dance and music to investigate mathematical relationships and problems taken for granted forms of academic writing are challenged by different forms of praxis and experience based writings that transgress the theory practice divide children students and teacher educators use pedagogical documentation to understand their own learning and to critique dominant habits of thinking and doing Challenging the dominant understanding of inclusion in educational contexts and making difference actively visible and positive this book is rooted in the experiences practices and words of teachers teacher educators and student teachers It will appeal to all those involved in early childhood education and also to those interested in challenging educational thinking and practices
