First Humans Human Origins And History To 10000 Bc:

The First Humans Göran Burenhult, 1993 Examines theories of evolution the Great Apes the origins of language extinct species and the global expansion that precipitated adaptation and diversity The First Humans American Museum of Natural History, 1993 Southern Asia, Australia, and the Search for Human Origins Robin Dennell, Martin Porr, 2014-02-24 This is the first book to focus on the role of Southern Asia and Australia in our understanding of modern human origins and the expansion of Homo sapiens between East Africa and Australia before 30 000 years ago With contributions from leading experts that take into account the latest archaeological evidence from India and Southeast Asia this volume critically reviews current models of the timing and character of the spread of modern humans out of Africa It also demonstrates that the evidence from Australasia should receive much wider and more serious consideration in its own right if we want to understand how our species achieved its global distribution Critically examining the Out of Africa model this book emphasises the context and variability of the global evidence in the search for human origins

The Origins of Human Society Peter Bogucki, 2000-01-04 The Origins of Human Society traces the development of human culture from its origins over 2 million years ago to the emergence of literate civilization In addition to a global coverage of prehistoric life the book pays specific attention to the origins and dispersal of anatomically modern humans the development of symbolic expression the transition from mobile foraging bands to sedentary households early agriculture and its consequences the emergence of social differentiation and hereditary ranking and the prehistoric roots of ancient states and empires The Blackwell History of the World Series The goal of this ambitious series is to provide an accessible source of knowledge about the entire human past for every curious person in every part of the world It will comprise some two dozen volumes of which some provide synoptic views of the history of particular regions while others consider the world as a whole during a particular period of time The volumes are narrative in form giving balanced attention to social and cultural history in the broadest sense as well as to institutional development and political change Each provides a systematic account of a very large subject but they are also both imaginative and interpretative The Series is intended to be accessible to the widest possible readership and the accessibility of its volumes is matched by the style of presentation and production

Nature's Holism Laurence Evans, 1999-08 In the association of the bee and the flower is a very advanced reflection of the process of evolution through natural selection Nature's Holism explores the coevolution of long associated species arriving at a holistic view of nature where the compatibility between species is significant In nature there are two interacting forces There is the numerical increase in numbers of a species termed a force of perpetuity Increasing numbers of a single species have an inevitable impact on the environment However as each species survives within an ecological context there is a feedback from the ecosystem as numbers increase requiring a necessary compatibility with the ecosystem Fitness is therefore defined not only by quantitative representation of genes in the next generation perpetuity but also the qualitative condition of compatibility with the habitat or ecosystem that provided the conditions and resources for this success

Time Maps Eviatar Zerubavel, 2020-03-04 The pioneering sociologist and author of *The Seven Day Circle* continues his analysis of time with this fascinating look at history as social construct Who were the first people to inhabit North America Does the West Bank belong to the Arabs or the Jews Why are racists so obsessed with origins Is a seventh cousin still a cousin Why do some societies name their children after dead ancestors As Eviatar Zerubavel demonstrates in *Time Maps* we cannot answer burning questions such as these without a deeper understanding of how we envision the past In a pioneering attempt to map the structure of collective memory Zerubavel considers the cognitive patterns we use to organize the past and the social grammar of conflicting interpretations of history Drawing on fascinating examples that range from Hiroshima to the Holocaust and from ancient Egypt to the former Yugoslavia Zerubavel shows how we construct historical origins how we tie discontinuous events together into stories how we link families and entire nations through genealogies and how we separate

distinct historical periods from one another through watersheds such as the invention of fire or the fall of the Berlin Wall Time Maps extends beyond all of the old clichés about linear circular and spiral patterns of historical process and provides us with models of the actual legends used to map history brilliant and elegant Hayden White University of California Santa Cruz

Cultural Vision J. Knutsen, 2003-11 For hundreds of millennia thousands of tribal cultures have thrived throughout the planet each possessing a unique Vision derived from thousands of years of evolution With their deep ties to the world around them they experienced a communion with life which offered a spiritual sense of overwhelming interconnectedness with the land the plants the animals and each other But one culture evolved to dominate all others and linear history was created Now a new reality has been built over the former surface of the planet not only altering the biosphere but also what is available for us to interact with and relate to We struggle with the meaningless daily rote duties of our jobs We live sequestered lives in houses and apartments cut off from our neighbors woefully uninformed in a sea of trivial information Unprecedented resource extraction and energy consumption is heralding the greatest mass extinction of plant and animal life the likes of which has not been seen in the last 65 million years *Cultural Vision* exposes the ancient roots of these challenges as it reveals a new direction for the future of humanity based upon cooperation true human values and cultural diversity

A Cultural History of Climate Wolfgang Behringer, 2010 Explores the latest historical research on the development of the earth's climate showing how even minor changes in the climate could result in major social political and religious upheavals

Why It's Ok to Talk to Your Dog David Paxton, 2011 Sensational A profound re appraisal of human evolution with dogs Our ability to speak words set us apart from other human like species who could not Those other species are now extinct But the anatomy for speaking words interferes with our sense of smell Ancestors of the dog moved into caves of human ancestors some 130 000 years ago As humans and dogs adapted to each other a unique co evolved partnership emerges We became part of each other's nature

Therefore if we desire to live in naturally vibrant communities the human dog partnership must be nurtured and managed well
