processing hierarchical deep learning networks as game playing artefacts using regret matching and building GPU accelerated deep learning frameworks Deep learning an advanced level of machine learning technique that combines class of learning algorithms with the use of many layers of nonlinear units has gained considerable attention in recent times Unlike other books on the market this volume addresses the challenges of deep learning implementation computation time and the complexity of reasoning and modeling different type of data As such it is a valuable and comprehensive resource for engineers researchers graduate students and Ph D scholars

**Electronically Active Textiles** Tilak Dias,2020-02-21

Electronically Active Textiles e textiles are a type of textile material that has some form of electronic functionality This can be achieved by attaching electronics onto the surface of the textile incorporating electronic components as part of the fabrication of the textile itself or by integrating electronics into the yarns or fibers that comprises the textile The addition of electronic components can give textiles a wide range of new functions from lighting or heating to advanced sensing capabilities As such e textiles have provided a platform for developing a range of new novel products in fields such as healthcare sports protection transport and communications The purpose of this volume is to report on the advances in the integration of electronics into textiles and presents original research in the field of e textiles as well as a comprehensive review of the evolution of e Textiles Topics include the fabrication and illumination of e textiles and the use of e textiles for temperature sensing
