Cawsey, Gene Deszca, Cynthia Ingols, 2011-03-18 Bridging current theory with practical applications the toolkit combines conceptual models with concrete examples and useful exercises to dramatically improve the knowledge skills and abilities of students in creating effective change The Second Edition Takes a pragmatic action oriented approach Emphasizes the measurement of change Demonstrates principles and applications using real world examples exercises and cases Offers an integrated organizational change model so students can see the connections between topics and chapters *Leading Diversity in the 21st Century* Terri A. Scandura, Edwin Mouriño, 2017-04-01 The Leader Member Exchange LMX model of leadership has shown that effective leader follower relationships predict employee well being and performance Less research however addressed how diversity variables may affect the development of leader member exchange and outcomes

This book moves the field forward by addressing the 21st century challenges of how diversity may impact the development of effective working relationships. Key trends in the workforce suggest that the impact of diverse employees will challenge a leader's ability to develop effective working relationships with all direct reports. New frameworks are needed to understand how various groups such as women, Hispanics, African Americans, Millennials, LGBTQ, and persons with Autism Spectrum Disorder develop effective working relationships with their supervisors. This edited volume will bring together the top scholars in the field to address these segments of the workforce and offer practical advice for managers. This book will be used in college undergraduate and/or graduate level leadership classes. It might also be adopted for courses in managing diversity. Scholars will find the book a useful reference work. In addition, practicing managers will be interested in the implications of developing effective working relationships in diverse leader-member dyads.

The Battle for the Court Lawrence Baum, David Klein, Matthew J. Streb, 2017-10-03. Once largely ignored, judicial elections in the states have become increasingly controversial over the past two decades. Legal organizations, prominent law professors, and a retired Supreme Court justice have advocated the elimination of elections as a means to choose judges. One of their primary concerns is interest group involvement in elections to state supreme courts, which they see as having negative effects on both the courts themselves and public perceptions of these judicial bodies. In *The Battle for the Court*, Lawrence Baum, David Klein, and Matthew Streb present a systematic investigation into the effects of interest group involvement in the election of judges. Focusing on personal injury law, the issue that has played the most substantial role in spurring interest group activity in judicial elections, the authors detail how interest groups mobilize in response to unfavorable rulings by state supreme courts, how their efforts influence the outcomes of supreme court elections, and how those outcomes in turn effectively reshape public policies. The authors employ several decades worth of new data on campaign activity, voter behavior, and judicial policy making in one particularly colorful, important, and representative state, Ohio, to explore these connections among interest groups, elections, and judicial policy in a way that has not been possible until now.

Public Sector Employment Regimes Karin Gottschall, Bernhard Kittel, Kendra Briken, Jan-Ocko Heuer, Sylvia Hils, Sebastian Streb, Markus Tepe, 2015-10-29. This book

American democracy is the voting public Candidates for political office organized interests and political parties are often blamed for the ills of American democracy but this book places the focus on the core issue in American politics a disengaged demanding and often contradictory voting public Structural reforms such as the direct primary term limits and campaign finance regime reforms make the problems worse rather than better because these structural reforms fail to address core issues that disengage the voting public from republican politics **Air University Library Index to Military Periodicals**

,1981 **Behavioral Determinants of Enterprise Development and Innovation** Anna Ujwary-Gil,Natalia R.

Potoczek,2020-01-01 The second issue in 2020 of the quarterly published JEMI explores enterprise development and innovation The behavioral determinants of the economic ventures indicated by the authors is a continually developing trend of research in economic sciences Contemporary enterprises are increasingly investing their resources in obtaining information on factors that stimulate employee behavior in order to increase efficiency or develop innovation Behavioral approach is also used in seeking answers to questions about the development of small and medium enterprises SMEs posed by entities responsible for supporting the SME sector In economic sciences behavioral approaches result from an interdisciplinary view on the behavior of people participating in economic life The behaviors of entrepreneurs managers other participants in an organization clients and entities supporting economic activities are an essential subject of research interest The presented articles show the research perspectives that contribute to the development of a behavioral stream in economic sciences The first article proposes a triangulation of theoretical foundations for behavioral research in economic sciences Dominika Korzeniowska and ukasz Su kowski reviewed the scientific literature and analyzed 37 articles and 21

monographs selected from scientific databases As a result of their research the authors concluded that by adopting different research perspectives in behavioral economics rather than just a cognitive one it is possible to enrich both theoretical and empirical foundations in scientific research Discovering human economic behavior can be done using methods and techniques appropriate to research e g in behavioral or evolutionary trends The authors conduct their analysis in relation to three paradigms cognitive behavioral and evolutionary and then come to the conclusion that these approaches should not be treated as competitive but complementary knowledge of economic behavior For example the evolutionary approach in psychology makes it easier to explain the genetics of certain automatic response patterns that have developed during evolution Its usefulness is expressed in the possibilities of creating an image of the human economic mind or economic society In turn the use of behavioral approaches according to the authors allows finding ways to eliminate the effects of mental traps appearing in the processes of making economic decisions and other problem situations The authors in their research refer to three research trends but ultimately encourage the search for other theories and concepts in the study of human economic behavior and their impact on business ventures The next article presents field studies carried out in West Sumatra The authors use psychoeconomic factors lying on the side of entrepreneurs to study failures in their business operations An essential aspect of the research is the identification and analysis of opportunistic behavior and its impact on the success or failure of operations Hafiz Rahman Eri Besra and Nurhayati conducted quantitative research using multiple and partial regression analysis on a sample of 1541 young entrepreneurs from the West Sumatra province in Indonesia who had experienced failures in their earlier enterprises It was found that psycho economic factors together with the opportunistic behavior of individuals more or less caused the entrepreneurial failure The obtained research results also formed the basis for the claim that opportunistic behavior can be seen as both a source of business success and failure The authors believe that the research should be of interest to the Indonesian government as it suggests that the creation of entrepreneurial resilience takes place in a process that also considers the failures of undertaken enterprises Young entrepreneurs usually draw conclusions from the mistakes they made which is why it is postulated to support them even in situations of failure e g through entrepreneurship capacity building programs In addition to economic and business knowledge it is necessary to build mental resilience develop maturity logically consider the choice of alternatives improve decision making processes and deal with social pressure The subject of interest of the author of the third article is organizational behaviors that affect high performance Przemysław Zbierowski presented the results of his research conducted on a sample of 406 enterprises using the computer assisted personal interview CAPI technique Based on the collected research material the author analyzed the impact of high performance organizational features on actual organizational performance and the indirect impact on organizational citizenship and entrepreneurship oriented behavior As the author notes his research contributes to the scientific debate in at least three ways Firstly it confirms that the features of

high performance have a strong impact on the actual performance of the enterprise which is not surprising but verifies the hypothesis Secondly it indicates entrepreneurial orientation as a partial mediator in this relationship Finally he discovers the very strong impact that high performance features have on the organization's civic behavior The article also has practical implications The obtained research results form the basis for developing organizational citizenship and entrepreneurship orientation through the skillful use of high performance factors Behavioral research trends in economic sciences also include the research presented in the fourth article regarding employee behavior and their development stimulated by managerial coaching Ghulam Abid Saira Ahmed Tehmina Fiaz Qazi and Komal Sarwar filled the research gap in the field of sustainable employee development in the organization The research conducted by them is pioneering The authors relate to the context of work and individual differences in promoting a thriving workplace The intervention mechanism of self efficacy and prosocial motivation in the relationship between managerial coaching and thriving at work was explored using a sequential mediation approach Data were analyzed using Hayes Process Model 6 based on 1 000 bootstrap resampling with an actual sample of 221 respondents The obtained results confirm that managerial coaching increases employee self efficacy The goal of coaching is to increase the employee's sense of self efficacy in connection with a particular activity so that he or she can perform his or her tasks effectively and efficiently Efficiency among employees directly activates positive moods that help engage employees and trigger prosocial behavior This study contributes to the detection of awareness related to the links between prosocial motivation and employee development and provides an additional comprehensive analysis of the procedure for obtaining the positive effects of managerial coaching Another group of articles relates to the behavioral aspects of developing innovation in enterprises in relation to employees as well as the implementation of innovation by customers Determinants of innovation in enterprises have become the subject of the research interests of Izabella Steinerowska Streb and Grzegorz G d The authors presented the results of their research which was conducted on a sample of 353 Polish family businesses In the course of the conducted research it was possible to determine whether family businesses that introduced the creative ideas of their employees were more innovative than others The company's innovativeness can be expressed in the product process marketing or organizational area The authors also examined the relationship between the innovation of family businesses and their involvement in activities that stimulate creative thinking build trust in the workplace stimulate employee development and support team integration The study revealed that family businesses that are aware of the importance of creative employees and that bring their employees' creative ideas into business practice are more innovative than other family businesses In addition it was found that an increase in company innovation exists when the company supports employee development Interesting behavioral aspects are presented in the research on employee resistance to implementing technological innovations i dem S caky z and Oya Hacire Y regir conducted a study of medical personnel at a public hospital in Adana Turkey to investigate the reasons for employee resistance to

implementing an IT system The Technology Acceptance Model TAM was expanded to include factors such as affective commitment gender and age Based on the data collected from 291 surveys a regression analysis was conducted which led to the formulation of conclusions regarding the usefulness of information technology its ease of use and affective commitment It was examined whether demographic factors such as age gender position and tenure are associated with resistance to implemented technological innovations The results of this study confirm earlier models of technology acceptance The practical implications of the study relate to the need to increase employee participation in making decisions about the change process The examined resistance of employees to technological innovations should also be treated as an essential voice in the discussion of problems related to managing change in the organization In the article presented by Neema Mori and Rosallia Mlambiti attention was focused on the acceptance of product innovation by customers The research was carried out in Tanzania using the example of mobile banking services To examine the impact of demographic factors on the adoption of innovative mobile banking services Rogers Diffusion Innovation Theory DIT was applied to 416 clients of a leading bank in Tanzania Regression results showed a positive and significant relationship between income level and education on the one hand and the adoption of mobile banking on the other Practical implications refer to the recommendations to develop promotional practices and awareness campaigns and capture customer demographic profiles to encourage them to use mobile banking The study showed the importance of using the situational theory to adopt innovative technologies in banking services in Tanzania The authors indicate that this approach to research issues broadens the understanding of the importance of demographic factors especially in relation to the Sub Saharan African region and also contributes to a better understanding of mobile banking from the point of view of the bank s customers in Tanzania The last article covers a bibliometric analysis of published research results in the field of business innovation its financing and policy framework The analysis was based on the resources of the Web of Science Core Collection using Vosviewer for the period 1990 2019 The researched publications were divided according to the research area and then the research gaps were identified In total 437 articles were found that went through various stages of selection 32 publications were analyzed in detail and the study presents citations received by each of these selected publications and their summaries Thematically grouped summaries show the areas that the researchers paid more or less attention to The conducted research allowed the authors to state that the countries involved in a higher level of innovation had a higher level of publication Few studies on this topic have been developed in emerging economies such as Africa and Asia excluding China and Taiwan A similar situation was noted for countries in the Middle East Most of the research comes from the United States and European countries The article also refers to aspects such as the time horizon of research approach and research methods The results of the presented research allow readers to get acquainted with the current state of publications on the subject of financing innovation and policy in this field The editors express the hope that the articles presented will contribute to the development of knowledge on behavioral

aspects of the functioning of enterprises and the development of innovation The authors extension of the research perspective with behavioral determinants strengthens our belief in the legitimacy of supporting this research trend in JEMI We thank all the researchers and authors for enriching their studies broadening the perspective of resolving complex management problems and developing innovation in organizations dispersed in geographical economic and cultural terms We hope all readers will find this second issue of JEMI in 2020 both interesting and informative Photoplay ,1924 **Guiding Teachers into Bilingual Education** Valérie Fialais, Reseda Streb, 2025-08-30T00:00:00Z This publication aims to build a guideline for both teachers and administrators with monolingual class experience who whether out of interest or necessity wish to create the proper setting for bilingual teaching In addition this guide uses a twofold strategy combining academic research theory and on site bilingual school practice The bridge between the two fields is considered to be the keystone to this book It strengthens the argumentation for both the theoretical concepts employed and professional experience *Steel Initiative* United States. Congress. House. Committee on Science and Technology. Subcommittee on Energy Development and Applications, 1985 **Least Cost Utility Planning Initiative** United States. Congress. House. Committee on Science and Technology. Subcommittee on Energy Development and Applications, 1986 **The Materiality and Spatiality of Death, Burial and Commemoration** Christoph Klaus Streb, Thomas Kolnberger, 2021-09-28 Death dying and burial produce artefacts and occur in spatial contexts The interplay between such materiality and the bereaved who commemorate the dead yields interpretations and creates meanings that can change over time Materiality is more than simple matter void of meaning or relevance The apparent inanimate has meaning It is charged with significance has symbolic and interpretative value perhaps a form of selfhood which originates from the interaction with the animate In our case gravestones bodily remains and the spatial order of the cemetery are explored for their material agency and relational constellations with human perceptions and actions Consciously and unconsciously by interacting with such materiality one is creating meaning while materiality retroactively provides a form of agency Spatiality provides more than a mere context it permits and shapes such interaction Thus artefacts mementos and memorials are exteriorised materialised and spatialized forms of human activity they can be understood as cultural forms the function of which is to sustain social life However they are also the medium through which values ideas and criteria of social distinction are reproduced legitimised or transformed This book will explore this interplay by going beyond the consideration of simple grave artefacts on the one hand and graveyards as a space on the other hand to examine the specific interrelationships between materiality spatiality the living and the dead The chapters in this book were originally published as a special issue of the journal *Mortality*
