First World Hunger:

First World Hunger Revisited G. Riches, T. Silvestri, 2014-09-11 Is food aid the way of the future? What are the prospects for integrated public policies informed by the right to food? *First World Hunger Revisited* investigates the rise of food charity and corporately sponsored food banks as effective and sustainable responses to increasing hunger and food poverty in twelve rich food secure societies

First World Hunger Graham Riches, 1997-04 *First World Hunger* examines hunger and the politics of food security and welfare reform 1980-95 in five liberal welfare states: Australia, Canada, New Zealand, the UK, and the USA. Through national case studies it explores the depoliticization of hunger as a human rights issue and the failure of New Right policies and charitable emergency relief to guarantee household food security. The need for alternative integrated policies and the necessity of public action are considered essential if hunger is to be eliminated

World Hunger Suzanne C. Toton, 1982

Hungry Britain Hannah Lambie-Mumford, 2017-07-05 Examining the prolific growth of UK charitable emergency food provision over the past fifteen years, *Hungry Britain* uses the human right to food as a pathway to developing solutions to food poverty. Hannah Lambie-Mumford draws on data from the country's two largest charitable food providers to explore the effectiveness of this emerging system of food acquisition, its enduring sustainability, and most importantly, where responsibility lies for ensuring that all people can realize their human right to food. She shows that the increasing tendency of charitable food providers to take responsibility for protecting people against food poverty occurs in tandem with significant cuts to the welfare state, shaping both the need for and nature of emergency food provision. Arguing for a clear rights-based framework, this book envisions a future where a range of actors from the state to charities and the food industry will be jointly accountable in combating food poverty

Know your food Diana Elena Dumitras, Ionel Mugurel Jitea, Stef Aerts, 2023-08-07 Food production and consumption is no longer a traditional activity. Every day we make choices that influence not only our health but also that of other living beings and our planet. Our food cultures are changing rapidly. Do we still know our food? And if not, is that a bad thing? This book presents the state of the art in agriculture and food ethics. It considers a wide range of ethics and innovation topics in agriculture, aquaculture, markets, consumption, and food culture. Its multi-disciplinary analysis by the many authors helps to understand our current global challenges. At the same time, it opens a wide range of new possibilities for future debate, research, and reflection towards a sustainable world. The book will appeal to anyone interested in agriculture, animal, and food ethics. To students and people looking for a quick overview, it offers a wide range of issues. Experienced readers will find a deepened analysis and new themes and perspectives adding to the existing body of knowledge

Food Bank Nations Graham Riches, 2018-04-19 In the world's most affluent and food secure societies, why is it now publicly acceptable to feed donated surplus food dependent on corporate food waste to millions of hungry people? While recognizing the moral imperative to feed hungry people, this book challenges the effectiveness, sustainability, and moral legitimacy of globally entrenched corporate food banking as the primary response to rich world food poverty. It

investigates the prevalence and causes of domestic hunger and food waste in OECD member states the origins and thirty year rise of US style charitable food banking and its institutionalization and corporatization It unmasks the hidden functions of transnational corporate food banking which construct domestic hunger as a matter for charity thereby allowing indifferent and austerity minded governments to ignore increasing poverty and food insecurity and their moral legal and political obligations under international law to realize the right to food The book s unifying theme is understanding the food bank nation as a powerful metaphor for the deep hole at the centre of neoliberalism illustrating the de politicization of hunger the abandonment of social rights the stigma of begging and loss of human dignity broken social safety nets the dysfunctional food system the shift from income security to charitable food relief and public policy neglect It exposes the hazards of corporate food philanthropy and the moral vacuum within negligent governments and their lack of public accountability The advocacy of civil society with a right to food bite is urgently needed to gather political will and advance joined up policies and courses of action to ensure food security for all

Ethics of Charitable Food Leire Escajedo San-Epifanio, Esther M. Rebato Ochoa, 2022-05-10 This book provides an in depth analysis of different dimensions of contemporary food charity It does so against the background of an increasing number of food banks and other forms of food philanthropy The book examines the incongruity of considering food donation as an expression of pure altruism Taking into account the dignity and rights of people it addresses how hunger is seen and explained in rich countries and how philanthropy and democracy coexist It looks at the relationship that exists between religious traditions and the current food donation narrative It discusses the risks of stigmatizing food recipients and clarifies ways to better deal with food poverty and food waste Paradoxically food insecurity and food waste have grown exponentially in the last decade More and more people are not able to access food properly The amount of perfectly edible food that is discarded also grows The consolidation of democracies welfare policies and economic growth do not guarantee that all citizens can meet their basic needs in the so called rich countries This book analyses the current state of affairs and presents facts and reflections from diverse sources and from a cross disciplinary perspective

Sharing Economies in Times of Crisis Anthony Ince, Sarah Marie Hall, 2017-09-05 The new sharing economy is a growing phenomenon across the Global North It claims to transform relationships of production and consumption in a way that can improve our lives reduce environmental impacts and reduce the cost of living Amidst various economic environmental and other crises this message has strong resonance Yet it is not without controversy and there have been heated debates over negative dimensions for workers and consumers alike This book stretches far beyond the sharing economy as it is popularly defined and explores the complex intersections of sharing and the economy and how a better understanding of these relationships might help us address the multiple crises that confront contemporary societies The contributors to this book explore a wide diversity of sharing systems and practices from various empirical case studies ranging from hospitality to seed swapping and from indigenous land rights to alcohol consumption In each chapter a different crisis or vulnerability frames

and shapes the study allowing contributors to unpick the ways in which crisis and sharing relate to each other in real life The book is divided into three thematic sections Following an extended introduction to the themes and ideas of the book by the editors the first section foregrounds the shaping of sharing practices by already existing or anticipated crises The second section focuses on the lived relations between sharing and economic practice In the third section authors conclude the book by exploring the possibilities and challenges for creating alternative economic forms grounded in practices of sharing This edited volume makes a major original contribution towards academic understandings of sharing economies in the context of crises It is suitable for both students and academics who are interested in political economy economic geography and consumption

International Human Rights Law and Destitution Luke Graham,2022-08-18 This book explores destitution from the perspective of international human rights law and more specifically economic social and cultural rights The experience of destitution

correlates to the non realisation of a range of economic social and cultural rights However destitution has not been defined from this perspective Consequently the nexus between destitution and the denial of economic social and cultural rights remains unrecognised within academia and policy and practice This book expressly addresses this issue and in so doing renders the nexus between destitution and the non realisation of these rights visible The book proposes a new human rights based definition of destitution composed of two parts The rights which must be realised the component rights and the level of realisation of these rights which must be met the destitution threshold to avoid destitution This human rights based understanding of destitution is then applied to a UK case study to highlight the relationship between government policy and destitution to illustrate how destitution manifests itself and to make recommendations founded upon engendering the realisation of economic social and cultural rights aimed towards addressing destitution This book will have global and cross sectoral appeal to anti poverty advocates policy makers as well as to researchers academics and students in the fields of human rights law poverty studies and social policy
