Evaluating Arguments — Quiz — Level 1

One of the biggest reasons to keep the minimum voting age at 18 is that the brains of teens a year or two younger need more time to develop the reasoning skills voting requires. Some people disagree—including my sister and Professor Laurence Steinberg. He is a Temple University psychologist who believes that a 16-year-old's brain has matured enough to make informed decisions when voting. However, Professor Steinberg overlooks some important points.

People can get very emotional about political issues. Just ask anyone with a relative who shows up at holiday gatherings and expresses strong political opinions that lead to huge arguments. I admire my sister and her friends for their passion in trying to change voter eligibility to age 16, but that kind of intensity can short-circuit clear thinking at times. I know I made some foolish choices without fully thinking things through when I was their age. Even Professor Steinberg says that when emotions run high, kids' decision-making skills aren't so great.

Fill in the blanks to identify the author's first claim and an opposing claim.

The author supports his argument with a claim that a 16-year-old

needs more time to develop

He also includes an opposing claim that a person's brain at 16 years old
