The First Great Political Realist Roger Boesche, 2002-08-06 The First Great Political Realist is a succinct and penetrating analysis of one of the ancient world's foremost political realists Kautilya. Kautilya's treatise Arthashastra stands as one of the great political books of the ancient world; its ideas on the science of politics strikingly similar to those of Thucydides, Machiavelli, Hobbes, Clausewitz, and even Sun Tzu. Roger Boesche's excellent commentary on Kautilya's voluminous text draws out the essential realist arguments for modern political analysis and demonstrates the continued relevance of Kautilya's work to modern Indian strategic thinking and our understanding of the relationship between politics and economics. Striking a balance between textual analysis and secondary scholarship, Boesche's work will be an enduring contribution to the study of ancient Indian history, Eastern political thought, and international relations.

*Kautilya's Arthashastra* Kauṇḍilya, Priyadarshini Academy (Bombay, India), 2009-01-01 Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation, and most importantly, devising a tax structure that ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a

successful trade contract to be established it had to be beneficial to all He emphasised State control and investment in land water and mining Kautilya was a true statesman who bridged the gap between experience and vision For Kautilya good governance was paramount He suggested built in checks and balances in systems and procedures for the containment of malpractices Many postulates of Kautilya s philosophy of political economy are applicable to contemporary times

*Widening the World of International Relations* Ersel Aydinli, Gonca Biltekin, 2018-07-11 Current international relations IR theories and approaches which are almost exclusively built in the West are alien to the non Western contexts that engender the most hard pressing problems of the world and ultimately unhelpful in understanding or addressing the needs surrounding these issues Our supposedly revolutionary new concepts and approaches remain largely insufficient in explaining what happens globally and in offering lessons for improvement This deficiency can only be addressed by building more relevant theories For theory to be relevant in accounting for contemporary international relations we argue it should not only apply to but also emanate from different corners of the current political universe In other words diversity and dialogue can only come about when periphery scholars do not just

meta theorize but also theorize Aydinli and Biltekin propose a new form of theorizing through this collection of work one that effectively blends peripheral outlooks with theory production They call this form homegrown theorizing or original theorizing in the periphery about the periphery Arguing that disciplinary culture is oblivious to the diversity that might be achieved by theorizing based on indigenous ideas and or practices this book intends to highlight that potential showing diversity in the background of the authors because wherever one looks at the world from paints the picture that is being seen Therefore we bring together scholars from Eastern Europe to South Africa from Iran to Japan to cover the extant diversity in ideas This work will be essential reading for all students and scholars concerned with the future of international relations theory
