First Industrialists The Problem Of Origins:

The First Industrialists François Crouzet, 1986 **The First Industrialists** François Crouzet, 1985-02-21 This book is focused on the social and occupational origins of the founders of modern British industry what kind of families did they come from What was their occupation before they set up as industrialists In discussing these and other issues this study makes an important contribution to the problem of social mobility during the Industrial Revolution **Mining Tycoons in the Age of Empire, 1870-1945** Raymond E. Dumett, 2009 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the Gilded Age witnessed an unprecedented level of technological change material excess untrammelled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich Intelligent Town Louise Miskell, 2019-09-15 This is the first full length study of Swansea's urban development from the late eighteenth to the late nineteenth century It tells the little known story of how Swansea gained an unrivalled position of influence as an urban centre which led it briefly to claim to be the metropolis of Wales and how it then lost this status in the face of rapid urban development elsewhere in Wales As such it provides an important new perspective on Welsh urban history in which the role of Cardiff Merthyr Tydfil and even Bristol are better known as towns of influence in Welsh urban life It also offers an analysis of how Swansea's experience of urbanisation fits into the wider picture of British urban history The Coalitions Against Napoleon William Nester, 2023-06-30 Britain alone could not hope to defeat the might of Napoleonic France which through enforced conscription had become a nation in arms But British leaders had a long history of forging alliances to counter their rivals and when revolution ravaged France in 1793 and a levée en masse raised a huge patriotic army it was through a coalition of monarchies that French ambitions were restrained a coalition made possible by British gold and British industry When Napoleon seized the reins of power in France he too introduced conscription and once again it was a succession of British led and funded coalitions which eventually brought Napoleon to his knees During the years 1793 to 1815 the British Government formed and underwrote seven coalitions that cost Britain 1 657 854 518 as the national debt tripled from 290 000 000 to 860 000 000 Of that British subsidies to around thirty allies amounted to 65 830 228 along with staggering amounts of war supplies mass produced by British factories and shipped to allies Britain's leading role in Europe did not end with Waterloo Immediately following the Sixth Coalition and amidst the Seventh Coalition Britain constructed with the other great powers a security system of cooperation and consultation called the Concert of Europe that prevented a serious war among them for two generations Britain's power to

underwrite those coalitions came from a related series of revolutions agrarian mercantile financial technological manufacturing cultural and political that developed over the proceeding century For many reasons that happened in Britain and not elsewhere Of them cultural values may be most crucial Constraints were fewer and incentives greater for enterprising Britons to invest invent buy and sell in ways that enriched themselves and their nation more than elsewhere During the eighteenth century Britain s leaders mastered a virtuous power cycle of victorious wars expanding production captured territories and markets and more income During a speech before Congress in December 1940 President Franklin D Roosevelt called on Americans to be an arsenal of democracy to aid Britain and other countries threatened by the imperialistic fascist powers Britain played exactly the same role during the Napoleonic era The Coalitions Against Napoleon explores how Britain developed and asserted the financial manufacturing and military power to achieve that goal

Planning the French Canals Reed G. Geiger,1994 Finally in a comparative framework the debate over the canals led to an examination of the inadequacy of a British model and to a rehearsal of the arguments about state economic policy that the next generation would revive **Titan** William R. Nester,2016-05-31 When the leaders of the French Revolution executed Louis XVI and Marie Antoinette in 1793 they sent a chilling message to the hereditary ruling orders in Europe Believing that monarchy anywhere presented a threat to democratic rule in France the leaders of the revolution declared war on European aristocracies including those of Great Britain For more than twenty years thereafter France and England waged a protracted war that ended in British victory In Titan William R Nester offers a deeply informed and thoroughly fascinating narrative of how England accomplished this remarkable feat Between 1789 and 1815 British leaders devised funded and led seven coalitions against the revolutionary and Napoleonic governments of France In each enterprise statesmen and generals searched for order amid a complex welter of bureaucratic political economic psychological technological and international forces Nester combines biographies of great men the likes of William Pitt Horatio Nelson and Arthur Wellesley with an explanation of the critical decisions they made in Britain s struggle for power and his own keen analysis of the forces that operated beyond their control Their efforts would eventually crush France and Napoleon and establish a system of European power relations that prevented a world war for nearly a century The interplay of individuals and events the importance of conjunctures and contingency the significance of Britain s island character and resources all come into play in Nester s exploration of the art of British military diplomacy The result is a comprehensive and insightful account of the endeavors of statesmen and generals to master the art of power in a complex battle for empire *British Imperialism* P.J. Cain,A. G. Hopkins,2016-03-02 A milestone in the understanding of British history and imperialism this ground breaking book radically reinterprets the course of modern economic development and the causes of overseas expansion during the past three centuries Employing their concept of gentlemanly capitalism the authors draw imperial and domestic British history together to show how the shape of the nation and its economy depended on international and imperial ties and how these ties were

undone to produce the post colonial world of today Containing a significantly expanded and updated Foreword and Afterword this third edition assesses the development of the debate since the book s original publication discusses the imperial era in the context of the controversy over globalization and shows how the study of the age of empires remains relevant to understanding the post colonial world Covering the full extent of the British empire from China to South America and taking a broad chronological view from the seventeenth century to post imperial Britain today British Imperialism 1688 2015 is the perfect read for all students of imperial and global history *The Middlemost and the Milltowns* Brian Lewis,2002-11-01

This book seeks to enrich our understanding of middle class life in England during the Industrial Revolution For many years questions about how the middle classes earned and failed to earn money conducted their public and private lives carried out what they took to be their civic and religious duties and viewed themselves in relation to the rest of society have been largely neglected questions These topics have been marginalized by the rise of social history with its predominant focus on the political formation of the working classes and by continuing interest in government and high politics with its focus on the upper classes and landed aristocracy This book forms part of the recent attempt influenced by contemporary ideas of political culture to reassess the role composition and outlook of the middle classes It compares and contrasts three Lancashire milltowns and surrounding parishes in the early phase of textile industrialization when the urbanizing process was at its most rapid and dysfunctional and class relations were most fraught The book s range extends from the French Revolution to 1851 the year of the Great Exhibition which symbolized mid century stability and prosperity The author argues that members of the middle class were pivotal in the creation of this stability He shows them creating themselves as a class while being created as a class putting themselves in order while being ordered from above The book shifts attention from the search for a single elusive class consciousness to demonstrate instead how the ideological leaders of the three milltowns negotiated their power within the powerful forces of capitalism and state building It argues that at a time of intense labor capital conflict it was precisely because of their diversity and their efforts to build bridges to the lower orders and upper class that the stability of the liberal capitalist system was maintained **Power and Progress** Daron Acemoglu,Simon Johnson,2023-05-16

Awarded the 2024 Nobel Prize in Economics Daron Acemoglu and Simon Johnson overturn conventional wisdom about how economies work revealing the untold story of who wins and who loses the rewards of prosperity in a work that fundamentally transforms how we look at and understand the world Throughout history technological change whether it takes the form of agricultural improvements in the Middle Ages the Industrial Revolution or today s artificial intelligence has been viewed as a main driver of prosperity working in the public interest The reality though is that technology is shaped by what powerful people want and believe generating riches social respect cultural prominence and further political voice for those already powerful For most of the rest of us there is the illusion of progress Daron Acemoglu and Simon Johnson debunk modern techno optimism through a dazzling original account of how technological choices have changed the course of history From

vivid stories of how the economic surplus of the Middle Ages was appropriated by an ecclesiastical elite to build cathedrals while the peasants starved to the making of vast fortunes from digital technologies today as millions are pushed towards poverty we see how the path of technology is determined and who influences its trajectory To achieve the true potential of innovation we need to ensure technology is creating new jobs and opportunities rather than marginalizing most people through automated work and political passivity We need to use the tremendous digital advances of the last half century to create useful and empowering tools and seize back control from a small elite of hubristic messianic tech leaders pursuing their own interests With their breakthrough economic theory and manifesto for building a better society Acemoglu and Johnson provide the understanding and vision to reimagine and reshape the path of technology and create true shared prosperity

The Societal Foundations of National Competitiveness Michael J. Mazarr, 2022-06-21 Nations rise and fall succeed or fail in rivalries and enjoy stability or descend into chaos because of a complex web of factors One critical component is a nation's essential social characteristics This report examines the characteristics of highly competitive societies explores the relationship of a nation's social condition to its global standing and then applies these lessons to the United States today

The Struggle for Market Power James Alan Jaffe, 2003-11-13 An account of the respective market ideologies of capital and labour during the Industrial Revolution

From Family Firms to Corporate Capitalism Kristine Bruland, Patrick O'Brien, 1998 What explains the growth of a business and more broadly the development or decline of a whole economy What role do particular entrepreneurs or indeed a culture of entrepreneurship play Does the evidence suggest that a particular structure or organizational form was or should be adopted to ensure best practice and commercial success These fundamental questions have long pre-occupied business and economic historians With the current expansion of business and management education and training the investigations and findings of the historian may have wider significance and relevance This volume has been stimulated by the work of Peter Mathias one of the leading figures in this field in the post-war period Here a number of his former students many now internationally distinguished historians pay tribute in a book that explores the move from family firms to corporate capitalism In a series of chapters they explore at the level of the firm the myriad of micro decisions that ultimately help to explain the overall performance of industries sectors and national economies as they evolve through time The contributors argue that sustained growth has never been a matter of a few spectacular technical breakthroughs Instead it rests on subtle economic and social transformations in cultures in economic organizations and in the roles of science and technology

The End of Anglo-America Robert Arthur Burchell, 1991 This collection of essays examines the phenomenon of the gradually evolving cultural differences which took place between America and Britain after the American revolution A culture of individualism began to emerge in contrast with elitism leading to suspicion of government and emerging personal ambitions particularly with regard to one's children However cultural changes emerged at a different pace in different parts of the country One author argues that Britain and

America continued as members of a single political family which in turn belonged to a wider European community Another suggests that a clear but selective emancipation from the British political culture took place and that a development of distinctly American institutions and practices emerged Yet another believes that in the United States there was less criticism of business success and less possibility of the generations that succeeded business success being seduced by gentrification

The Rise and Fall of Modern Empires, Volume III Sarah Stockwell, 2017-03-02 Few aspects of the history of modern empires are of such significance as their economics and politics These factors are inextricably linked in many analyses have generated extensive historiographical debate and are currently the subject of some of the freshest and liveliest scholarship The articles and chapters which are brought together in this volume relate not only to the European colonial empires but also to the Napoleonic Russian and Japanese empires The collection is strongly comparative in approach with the articles arranged into thematic sections on the place of politics and economics in the rise and fall of modern empires the causal relationship between modern empires and colonial global and metropolitan economic transformations and the technologies of rule which provided the frameworks through which colonial economies were managed and rights defined The collection reflects new approaches as well as the continuing importance of issues addressed in an older historiography and the thematic arrangement produces useful juxtapositions of older and newer literatures The substantial introduction explores the themes and identifies key historiographical trends in relation to each [Favorites of Fortune](#) Patrice L. R. Higonnet, David S. Landes, Henry Rosovsky, 1991 A galaxy of distinguished international economists and historians pit economic history against the shaky assumptions of the classical economic theory of natural growth Their explanations consider the factors of technology entrepreneurialism and paths to economic growth but each reflects an ideological wave of explanation that has marked the last two hundred years **A Companion to Nineteenth-Century Britain** Chris Williams, 2008-04-15 A

Companion to Nineteenth Century Britain presents 33 essays by expert scholars on all the major aspects of the political social economic and cultural history of Britain during the late Georgian and Victorian eras Truly British rather than English in scope Pays attention to the experiences of women as well as of men Illustrated with maps and charts Includes guides to further reading [Mao and Markets](#) Christopher Marquis, Kunyuan Qiao, 2022-01-01 A thoroughly researched assessment of how China's economic success continues to be shaped by the communist ideology of Chairman Mao A Financial Times Best Book of 2022 Tied for the 2023 Axiom Gold Medal sponsored by Axiom Business Book Awards It was long assumed that as China embraced open markets and private enterprise its state controlled economy would fall by the wayside that free markets would inevitably lead to a more liberal society Instead China's growth over the past four decades has positioned state capitalism as a durable foil to the orthodoxy of free markets to the confusion of many in the West Christopher Marquis and Kunyuan Qiao argue that China's economic success is based on not in spite of the continuing influence of Communist leader Mao Zedong They illustrate how Mao's ideological principles mass campaigns and socialist institutions have enduringly

influenced Chinese entrepreneurs business strategies and the management of their ventures Grounded in case studies and quantitative analyses this book shows that while private enterprise is the engine of China s growth Chinese companies see no contradictions between commercial drive and a dedication to Maoist ideology Slavery, Freedom and Gender Brian L. Moore,B. W. Higman,2003 This book is a collection of essays by several distinguished scholars which began as a series of lectures sponsored by the Department of History at the University of the West Indies Mona Jamaica to honour internationally recognized Caribbean historian Elsa Goveia The collection consists of 13 lectures delivered between 1987 to 1998 The book is divided into two broad sections In Slavery and Freedom which features critical research on slavery and post emancipation society and Gender Paradigms It will be particularly engaging to readers interested in Caribbean history social history and gender studies **Asia in Europe, Europe in Asia** Srilata Ravi,Mario Rutten,Beng-Lan Goh,2004-06-30 The book presents a unique combination of the study of contemporary and historical practices between Asia and Europe and brings forth some of the latest thinking on the subject Recent debates have centered primarily on contemporary aspects of the Europe Asia partnership in terms of international relations and economic linkages The present volume complements this political and economic interest in Europe Asia relationship by focusing on the academic social and cultural connections between the two regions The contributions in this volume have a contemporary focus but contextualize the themes within a historical perspective They deal with academic discourses on the region on modernity and entrepreneurship they discuss the long term exchange of knowledge in specific scientific fields and they focus on the cultural interconnections in the area of film literature and migration The originality of this book lies in its interdisciplinary approach to the question of Asia Europe and in its emphasis on the multifaceted complexity of the relationship between these two regions It brings together the diversity of local histories ideas and agencies in both Europe and Asia into a universal project of knowledge formation in order to reveal their contribution to the making of the world we are in

The Top Books of the Year First Industrialists The Problem Of Origins The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous compelling novels enthralling the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the fascinating narratives that have charmed audiences this year. First Industrialists The Problem Of Origins : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Pape, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
