therapy have been shown to aid a wide range of people and illnesses Although the benefits of animal companionship have long been suspected little is known about the research the process or why it works This book provides clinicians with a history of the human animal bond and the rationale for incorporating animals into therapy today In this book the author includes a discussion of the myriad of ways that clinicians can directly help people care for their pets such as crisis intervention services policy issues grief counseling for pet loss and compassion fatigue in the veterinary profession There also is a thorough discussion of animal assisted therapy AAT as a distinct and unique modality The adaptive nature of AAT is not only due to the symbiotic relationship between humans and animals but also because of the flexible nature of the model it can be used with clients of all demographics and with most mental illnesses Research shows that the majority of mental health practitioners believe that AAT is a valid treatment modality but AAT has not yet been manualized and clinicians are left confused about where to start The Human Animal Bond in Clinical Social Work Practice is a unique and essential resource that provides guidelines for developing AAT treatment plans and integrating AAT with existing therapeutic models The book answers the questions that social workers psychologists psychiatrists and other mental health counselors may have about the benefits of the human animal bond and ways to tap into that special bond in direct practice *FREEDOM FOUND*
