in Our Brain Angela D. Friederici,2017-11-16 A landmark account of the neurobiological basis of language arguing that species specific brain differences may be at the root of the human capacity for language Language makes us human It is an intrinsic part of us although we seldom think about it Language is also an extremely complex entity with subcomponents responsible for its phonological syntactic and semantic aspects In this landmark work Angela Friederici offers a comprehensive account of these subcomponents and how they are integrated Tracing the neurobiological basis of language across brain regions in humans and other primate species she argues that species specific brain differences may be at the root of the human capacity for language Friederici shows which brain regions support the different language processes and how these brain regions are connected structurally and functionally to make language processes that take place in milliseconds possible She finds that one particular brain structure connecting syntax relevant brain regions is present only in the mature human brain and only weakly present in other primate brains Is this the missing link that explains humans capacity for language Friederici describes the basic language functions and their brain basis the language networks connecting different language related brain regions the brain basis of language acquisition during early childhood and when learning a second language proposing a neurocognitive model of the ontogeny of language and the evolution of language and

underlying neural constraints She finds that it is the information exchange between the relevant brain regions supported by the white matter tract that is the crucial factor in both language development and evolution *The Complete Idiot's Guide to Speed Reading* Abby Marks Beale,2008 Presents strategies and techniques designed to increase reading speed and improve comprehension and retention of a variety of reading materials Competing Motivations in Grammar and Usage Brian MacWhinney,Andrej Malchukov,Edith Moravcsik,2014-10-30 This volume examines the conflicting factors that shape the content and form of grammatical rules in language usage Speakers and addressees need to contend with these rules when expressing themselves and when trying to comprehend messages For example there are on going competitions between the speaker s interests and the addressee s needs or between constraints imposed by grammar and those imposed by online processing These competitions influence a wide variety of systems including case marking agreement and word order politeness forms lexical choices and the position of relative clauses Chapters in the book analyse grammar and usage in adult language as well as first and second language acquisition and the motivations that drive historical change Several of the chapters seek explanations for the competitions involved based on earlier accounts including the Competition Model Natural Morphology the functional typological tradition and Optimality Theory The book will be of interest to linguists from a wide variety of backgrounds particularly those interested in psycholinguistics historical linguistics philosophy of language and language acquisition from advanced undergraduate level upwards **New Methods in Reading Comprehension Research** David E. Kieras,Marcel A. Just,2018-04-17 Published in 1984 this volume presents methodologies for studying the ongoing psychological processes that occur as a person reads a text as well as discussing the major findings that these methodologies have produced to provide a handbook of reading comprehension research techniques Focusing on the comprehension processes that occur when a person is reading rather than the representation that remains after the text has been read the methodologies use measures such as reading times that reflect ongoing processes rather than relying exclusively on conventional measures of memory performance such as recall These methods make use of computer technology for rapid and flexible stimulus representation and data acquisition This book will allow researchers and students to select appropriate methodologies to investigate a range of fascinating questions about reading comprehension
