

JUST FISHING

There is a decided art to the catching of these inland lake warblers with live bait. At times, of course, they may be taken easily, but we are not concerned in this phase of handling. What we want to know about is how to catch them after considerable tactics fail to bring results. It is with this intention in mind that I write this chapter.

Of course I do not mean to imply that I am always out here. That would be far from the truth. Of all the fish the whitefish and brook trout have been debated one more time or two, but they probably will continue to do so. They are the most expensive fish of our inland waters and to be so hard to catch. No matter how good the most fishing is, one with any degree of skill can usually make a showing of a fish or two after some hours of concentrated effort. So the best fishing is "off" it is hard indeed, for both expert and novice; whether one works like a Trojan or fishes with intelligence. You see, I recognize and admit my limitations in a moment.

But I have, during my years of experience, picked up a few many tricks which have served me well in times of need, but apparently insignificant methods of handling live bait which often bring me success at times when confidence and hope are low. Let me tell you about them.

No doubt you have all experienced times when, being out by side with a fellow angler, you could not win a bit after your partner kept taking them one after the other. "Oh," you wonder, "We're both using the same bait and fishing in same water. He's lucky," you will probably think. "Just a piece of luck," and let it go at that.

But is it luck? For many years I hardly considered it to be. It was no better than the usual opinion of the times of defeat, an idea explaining my failure. But as I have been interested in the game as a sport and not a money-making device, I began to wonder if it really was luck.
