**Ecological Security in Northeast Asia** Miranda Alice Schreurs, Dennis Pirages, 1998 *The Environmental Dimension of Asian Security* In-t'aek Hyön, Miranda Alice Schreurs, 2007 Northeast Asia is a region with highly disparate levels of industrialization and political systems It also contains some very troubling security flashpoints the Taiwan Strait the Korean Peninsula and the East China Sea China's rapacious quest for energy and rapid industrial expansion have led to intense international competition with Japan and the United States and internal instability as well North Korea poses two distinct environmental security threats famine refugees and the regime's use of nuclear blackmail for subsidized energy Yet there is very little regional cooperation despite the need to manage disputes over energy natural resources and pervasive pollution The Environmental Dimension of Asian Security examines these issues through a regional environmental security complex that explores the potential for greater intersubjective understandings of regional environmental and natural resource problems and greater institutional collaboration and management **Environmental Change and Security Project Report**, 1998 *Complexity, Security and Civil Society in East Asia* Peter Hayes, Kiho Yi, 2015-06-22 Complexity Security and Civil Society in East Asia offers the latest understanding of complex global problems in the region including nuclear weapons urban insecurity energy and climate change Detailed case studies of China North and South Korea and Japan demonstrate the importance of civil society and civic diplomacy in reaching shared solutions to these problems in East Asia and beyond Each chapter describes regional civil society initiatives that tackle complex challenges to East Asia's security In doing so the book identifies key pressure points at which civil society can push for constructive changes especially ones that reduce the North Korean threat to its neighbors Unusually this book is both theoretical and practical Complexity Security and Civil Society in East Asia presents strategies that can be led by civil society and negotiated by its diplomats to realize peace security and sustainability worldwide It shows that networked civic diplomacy offers solutions to these urgent issues that official complex diplomacy cannot By providing a new theoretical framework based on empirical observation this volume is a must read for diplomats scholars students journalists activists and individual readers seeking insight into how to solve the crucial issues of our time *Facing Global Environmental Change* Hans Günter Brauch, Navnita Chadha Behera, Patricia Kameri-Mbote, John Grin, Úrsula Oswald Spring, Béchir Chourou, Czesław Mesjasz, Heinz Krummenacher, 2009-06-04 The year 2007 could perhaps accurately be described as the year when climate change finally received the attention that this challenge deserves globally Much of the information and knowledge that was created in this field during the year was the result of the findings of the Fourth Assessment Report AR4 of the Intergovernmental Panel on Climate Change IPCC which were disseminated on a large scale and reported extensively by the media This was the result not only of a heightened interest on the part of the public on various aspects of climate change but also because the IPCC itself proactively attempted to spread the findings of its AR4 to the public at large The interest generated on the scientific realities of climate change was

further enhanced by the award of the Nobel Peace Prize to the IPCC and former Vice President of the US Al Gore By taking this decision in favour of a leader who has done a great deal to create awareness on climate change and a body that assesses all scientific aspects of climate change and disseminates the result of its findings the Norwegian Nobel Committee has clearly drawn the link between climate change and peace in the world Japan's Security Relations with China Since 1989
