Hughes, 2013-08-02 As environmental problems become increasingly complex it is critical that students and activists learn the skills with which to address them Although there already are many case studies of actual issues only in the last few years have environmental scientists paid close attention to their resolution Environmental Problem Solving teaches these skills Jeffrey W Hughes creates an organized method for approaching problems understanding larger issues and crafting solutions to a wide range of contemporary environmental issues Many environmental activists often have preconceived ideas of environmental protection and problem solving They react emotionally to news of deforestation a new housing development or a planned big box store without thinking about the problem logically and they may automatically regard foresters development companies and corporations as opponents As their views harden discourse turns acrimonious and it becomes ever more difficult to find satisfactory solutions This book teaches those on both sides of the table to address their own preconceptions and approach hard issues critically methodically and fairly Hughes combines aspects of the decision making process from the fields of business management and communication science based on extensive research and ample practical experience in the field and classroom He creates a logical framework to help guide thinking from identifying a problem to finding its solution Using examples drawn from real life situations Environmental Problem Solving will become an invaluable guide for environmentalists agency professionals consultants students naturalists and concerned citizens *Handbook on Sustainability Transition and Sustainable Peace* Hans Günter Brauch, Úrsula Oswald Spring, John Grin, Jürgen Scheffran, 2016-08-10 In this book 60 authors from many disciplines and from 18 countries on five continents examine in ten parts Moving towards Sustainability Transition Aiming at Sustainable Peace Meeting Challenges of the 21st Century Demographic Imbalances Temperature Rise and the Climate Conflict Nexus Initiating Research on Global Environmental Change Limits to Growth Decoupling of Growth and Resource Needs Developing Theoretical Approaches on Sustainability and Transitions Analysing National Debates on Sustainability in North America Preparing Transitions towards a Sustainable Economy and Society Production and Consumption and Urbanization Examining Sustainability Transitions in the Water Food and Health Sectors from Latin American and European Perspectives Preparing Sustainability Transitions in the Energy
