their own writing Above Book cover of Wild Wise Weird The Kingfisher Story Collection Read her piece below to see how this approach can help build broader ecological literacy and cultural readiness for sustainability transformations *Natural Visions* Finis Dunaway, 2016-12-20 Walden Pond The Grand Canyon Yosemite National Park Throughout the twentieth century photographers and filmmakers created unforgettable images of these and other American natural treasures Many of these images including the work of Ansel Adams continue to occupy a prominent place in the American imagination Making these representations though was more than a purely aesthetic project In fact portraying majestic scenes and threatened places galvanized concern for the environment and its protection *Natural Visions* documents through images the history of environmental reform from the Progressive era to the first Earth Day celebration in 1970 showing the crucial role the camera played in the development of the conservation movement In *Natural Visions* Finis Dunaway tells the story of how visual imagery such as wilderness photographs New Deal documentary films and Sierra Club coffee table books shaped modern perceptions of the natural world By examining the relationship between the camera and environmental politics through detailed studies of key artists and activists Dunaway captures the emotional and spiritual meaning that became associated with the American landscape Throughout the book he reveals how photographers and filmmakers adapted longstanding traditions in American culture the Puritan jeremiad the romantic sublime and the frontier myth to literally picture nature as a place of grace for the individual and the nation Beautifully illustrated with photographs by Ansel Adams Eliot Porter and a host of other artists *Natural Visions* will appeal to a wide range of readers interested in American cultural history the visual arts and environmentalism *An Ecological Vision of the World* Hyun-Chul Cho, 2004 This study is an endeavour on the basis of the Christian theological tradition to overcome the tendency of the human s arrogant domination and reckless exploitation of nature The author presents an alternative vision of the world to the current excessively dualistic and anthropocentric worldview This alternative worldview is an ecological vision of the world which is relational and inclusive This ecological worldview is a Christian vision of the world which is rooted in the triune God out of love and is present in creation out of love from beginning to end It is further asserted that this ecological vision of the world can contribute to a spirituality of life and peace and to a Christian life committed to cosmic justice *Visions of the 21st Century* Martin Schoenhals, Joseph E. Behar, 2001 *Religion and Ecological Sustainability in China* James Miller, Dan Smyer Yu, Peter van der Veer, 2014-04-29 This book sheds light on the social imagination of nature and environment in contemporary China It demonstrates how the urgent debate on how to create an ecologically sustainable future for the world s most populous country is shaped by its complex engagement with religious traditions competing visions of modernity and globalization and by engagement with minority nationalities who live in areas of outstanding natural beauty on China s physical and social margins The book develops a comprehensive understanding of contemporary China that goes beyond the tradition modernity dichotomy and illuminates the diversity of narratives and worldviews that inform contemporary Chinese understandings of

and engagements with nature and environment Institutional Dynamics in Environmental Governance Bas Arts, Pieter Leroy, 2006-09-09 Environmental policy in its broadest context has been significantly revitalized and renewed during the last two decades That observation is nothing new attested to by the number of publications conferences and both private and public projects that have been initiated However our understanding of the dynamics of this renewal has generally been informed by studies on single policies and projects leaving us with a limited understanding of what the newness consists of in terms of an integrated perspective This book presents fresh analyses of a number of well known cases but does so from one comprehensive view the so called policy arrangement approach Cases discussed range over organic farming integrated water management nature policy cultural heritage policy integrated region oriented policy corporate environmental management and target group policy always in search of the commonality of experience and conclusions to be drawn in understanding the past and in formulating future perspectives **The Reenchantment of Science** David Ray Griffin, 1988-05-06 This book describes the move from modern mechanistic science to a post modern organismic science David Ray Griffin gives voice to a revisionary postmodernism based on the work of Whitehead and Hartshorne that contrasts with the relativistic nihilistic postmodernism of Heidegger Derrida and Wittgenstein The book brings together some of today s most creative thinking about science Griffin s introductory essay summarizes the way in which the mechanistic view led to the disenchantment of science and the various reasons for the reversal of this process in our time The essays on physics cosmology biology ecology psychosomatic medicine and parapsychology bring out the various dimensions of the reenchantment of science the replacement of modern dualism and reductionism with an ecological organismic paradigm the priority of internal relations to external the causal power of experience the presence of experience purpose and intrinsic value throughout nature influence at a distance the laws of nature as habits the presence of a divine whole in all the parts and the history of the universe as a self creative meaningful story This book gives a powerful voice to this emerging movement s proposals for a postmodern science spirituality and world order **From Waste to Value** Antje Klitkou, Arne Martin Fevolden, Marco Capasso, 2019-03-27 From Waste to Value investigates how streams of organic waste and residues can be transformed into valuable products to foster a transition towards a sustainable and circular bioeconomy The studies are carried out within a cross disciplinary framework drawing on a diverse set of theoretical approaches and defining different valorisation pathways Organic waste streams from households and industry are becoming a valuable resource in today s economies Substances that have long represented a cost to companies and a burden for society are now becoming an asset Waste products such as leftover food forest residues and animal carcasses can be turned into valuable products such as biomaterials biochemicals and biopharmaceuticals Exploiting these waste resources is challenging however It requires that companies develop new technologies and that public authorities introduce new regulation and governance models This book helps policy makers govern and regulate bio based industries and helps industry actors to identify and exploit new opportunities in the circular bioeconomy Moreover it provides

important insights for all students and scholars concerned with renewable energy sustainable development and climate change The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Encyclopedia of Global Warming and Climate Change, Second Edition S. George Philander, 2012-06-13 The First Edition of the *Encyclopedia of Global Warming and Climate Change* provided a multi-authored academic yet non-technical resource for students and teachers to understand the importance of global warming to appreciate the effects of human activity and greenhouse gases around the world and to learn the history of climate change and the research enterprise examining it This edition was well received with notable reviews Since its publication the debate over the advent of global warming at least partially brought on by human

enterprise has continued to ebb and flow depending literally on the weather politics and media coverage of climate summits and debates Advances in research also change the discourse as new data is collected and new scientific projects continue to explore and explain global warming and climate change Thus a new Second Edition updates more than half of the original entries and adds new perspectives and content to keep students and researchers up to date in a field that has proven provocatively lively

Writing Nature in Cold War American Literature Sarah Daw, 2018-08-23 First book length ecocritical study of Cold War American literature Compelling analyses of the function and representation of Nature in a wide range of Cold War fiction and poetry by authors including Paul Bowles J D Salinger Jack Kerouac Allen Ginsberg and Mary McCarthy reveals the prevalence of portrayals of Nature as an infinite interdependent system in American literature written between 1945 and 1971 Daw astutely highlights the Cold War s often overlooked role in environmental history and argues that Rachel Carson s *Silent Spring* 1962 can be considered as part of a trend of increasingly ecological depictions of Nature in literature written after 1945 By exploring the most recent developments in the field of ecocriticism the book is embedded within current ecocritical debates concerning the Anthropocene and anthropogenic climate change

Key Features Contains five case studies of six Cold War writers Paul Bowles Peggy Pond Church J D Salinger Jack Kerouac Allen Ginsberg and Mary McCarthy Offers an in depth exploration of the influences behind each writer s presentation of Nature Shows the Cold War to be a time of seismic change in the human s relationship to the environment and demonstrates the degree to which this inflects Cold War literature Engages with the most recent developments in the field of ecocriticism which drive the study s analytical methodology and embed the book within current ecocritical debates

Sustainable Poetry Leonard M. Scigaj, 2021-12-15 Focusing on the work of A R Ammons Wendell Berry W S Merwin and Gary Snyder author Leonard Scigaj shows that just as a sustainable society does not depreciate its resource base so a sustainable poetry does not restrict interest to language Over the past thirty years many poets have shown an increasing sensitivity to ecological thinking But critics trained in poststructuralist language theory often fail to explore the substance of ecopoetry Scigaj is the first to define ecopoetry as separate and distinct from nature or environmental poetry marked by its concern with balancing the interests of human beings with the needs of nature Just as science learned that the earth was not the center of the universe ecopoetry insists on the recognition that humans are not at the center of the natural world

Law and Ecology Richard O. Brooks, Ross Jones, 2017-07-05 In 1970 Earth Day was first celebrated marking the dawn of worldwide environmental consciousness and the passing of many environmental laws In part these events were the result of the maturing of the science of ecology which recognized the interdependence of the web and cycles of nature This volume explores the relationship between ecology and environmental law beginning with a description of the two very different disciplines This description is followed by a history of their episodic interactions the early period of origin the mid century formative period from 1950 to 1970 the initial serious period of interaction after Earth Day in 1970 and the testing of the relationship during

the next two decades Utilizing a number of case studies examinations of the key linkage persons legal instruments and the migration of ecological concepts and frameworks this book analyzes the final flowering of an ecosystem regime which embraces the connections between the two disciplines of ecology and environmental law Concluding with an inventory of the problems posed by the relationship between the two disciplines and an agenda for future research this clearly structured comprehensive and stringent book is an essential resource for all serious scholars and students of ecology and environmental law

Cartographies of the Mind Massimo Marraffa, Mario De Caro, Francesco Ferretti, 2007-06-04 In the last three decades the level of interaction between philosophy and psychology has increased dramatically As a contribution to this trend this book explores some areas in which this interaction has been very productive or at least highly provocative The interaction between philosophy and psychology can be of different kinds For example psychology can be the subject for philosophy of science In such a case the philosopher of science pursues the usual set of issues explanation reduction etc within the special case of psychology Or philosophy can be the source of proposals for improving psychology Vice versa the findings of psychology can be used to criticize philosophical theories and suggest ways to resolve some traditional philosophical questions about the mind such as the nature of mental representation perception emotion memory consciousness and free will The chapters in this book reflect these different forms of interaction in an effort to clarify issues and debates concerning some traditional cognitive capacities The result is a philosophically and scientifically up to date collection of cartographies of the mind
