## Ecology And Equity:

Ecology and Equity Madhav Gadgil, Ramachandra Guha, 1995 Radical both in its critique of the causes of environmental crisis in India and in its proposal for ecological reform this book reveals the interconnections of social and environmental conflict and makes for essential reading      *Uncivil City* Amita Baviskar, 2020-04-10 This book looks at two decades of environmental politics in Delhi and argues that bourgeois environmentalists who claim to speak for nature and society have perversely worsened the quality of life for most citizens      **The International Handbook on Environmental Technology Management** Dora Marinova, David Annandale, John Phillimore, 2008-01-01 This is an excellent textbook suitable as a core text for environmental engineers and environmental scientists but equally it should in my opinion be compulsory reading for all researchers practitioners and policy makers regardless of their discipline because it has relevance for all In fact the book is so lively and understandable that everyone and anyone could and should read it Clearly written by a team of recognised environmental authors drawn from around the world it guides the reader through current thinking on the tools and techniques industry As an academic it is a delight to find a book to recommend that I know students will enjoy and one which addresses so many different elements of a diversity of university courses while covering the most important areas of environmental technology and management I am certainly using it to enhance and update the content of some of my own lectures Susan Haile International Journal of Sustainable Engineering This substantial collection draws together a very wide variety of literatures and practices I would expect this book to be a popular purchase by academic libraries principally as a core text R D Management This stunning Handbook is an excellent tool for environmental manager and environmental officer alike It is brimful of ideas case studies and methodologies which stimulate continuous improvement thinking and help train staff to implement sustainability and environmental management concepts Highly recommended Eagle Bulletin This important Handbook is the first comprehensive account that brings together recent developments in the three related fields of environmental technology environmental management and technology management With contributions from more than 55 outstanding authors representing ten countries and five continents the reader is provided with a vast range of insightful perspectives on the latest industry and policy issues With the aid of numerous case studies leading experts reflect on significant changes in the use of technology and management practices witnessed in the last decade Within this Handbook the authors discuss in detail eco modernization and technology transformation environmental technology management in business practices measuring environmental technology management case studies in new technologies for the environment environmental technology management and the future The International Handbook on Environmental Technology Management has a broad audience including researchers practitioners policymakers and students in the fields of sustainability and environmental science      *Sustainable Entrepreneurship* Alan S. Gutterman, 2018-08-30 This book traces the foundations for sustainable entrepreneurship beginning with sustainability ecopreneurship and social entrepreneurship

Sustainability has become a multidimensional concept that extends beyond environmental protection to economic development and social equity in other words entrepreneurship guided and measured by the three pillars of the triple bottom line Sustainable entrepreneurship is the continuing commitment by businesses to behave ethically and contribute to economic development while improving the quality of life of the workforce their families the local and global community as well as future generations The text continues with a review of the basic principles of sustainable entrepreneurship and how entrepreneurs can integrate sustainability into their business models This book will be an invaluable resource for entrepreneurs looking to build a new venture based on the principles of sustainability from the outset In addition it can be used by academics teaching sustainable entrepreneurship a topic of surging interest to students and by professionals working with sustainable businesses

**Skills in the Green Economy through the Advanced Training Programs on Cradle to Cradle** Elina Priedulena,Max Hogeforster,Baltic Sea Academy .,2016-08-15 Energy efficiency climate and biodiversity protection are among the top priorities of the EU and all member states In order to meet the challenges of growing landfills scarcity of resources air pollution to name only a few of them new ways of thinking and of economic activities are essential This is exactly what the Cradle to Cradle C2C concept delivers products flow in infinite material life cycles thus being economically successful conducive to the environment and healthy for consumers without producing any waste Cradle to Cradle concept born as vision by Prof Dr Michael Braungart and William McDonough in 1990ies has become real It is well known on the world market more than 1 500 products have been developed Despite the advantages the Cradle to Cradle approach has mostly been used by big companies and is hardly known in SMEs Thus a EU funded project was started in 2014 to develop trainings for Cradle to Cradle for SMEs This book contains the training including train the trainer experiences and presentations made at the final conference in 2016 It contains substantial contributions by authors like Michael Braungart Thomas Straubhaar and others Law and Agroecology Massimo Monteduro,Pierangelo Buongiorno,Saverio Di Benedetto,Alessandro Isoni,2015-05-06 This book represents a first attempt to investigate the relations between Law and Agroecology There is a need to adopt a transdisciplinary approach to multifunctional agriculture in order to integrate the agroecological paradigm in legal regulation This does not require a super law that hierarchically purports to incorporate and supplant the existing legal fields rather it calls for the creation of a trans law that progressively works to coordinate interlegalities between different legal fields respecting their autonomy but emphasizing their common historical roots in rural space In the process rural space the rural phenomenon as a whole reflects the plurality and interdependence of different complex systems based jointly on the land as a central point of reference Rural is more than agricultural if agriculture is understood traditionally as an activity aimed at exploiting the land for the production of material goods for use consumption and private exchange rurality marks the reintegration of agriculture into a broader sphere one that is not only economic but also social and cultural not only material but also ideal relational historical and symbolic and not only private but also public In approaching rural space the natural and social sciences first became specialized multiplied and compartmentalized in a plurality of first order disciplines later they began a process of integration into Agroecology as a second order multi perspective and shared research platform Today Agroecology is a transdiscipline that integrates other fields of knowledge into the concept of agroecosystems viewed as socio ecological

systems However the law seems to still be stuck in the first stage Following a reductionist approach law has deconstructed and shattered the universe of law into countless disjointed legal elementary particles multiplying the planes of analysis and in particular keeping Agricultural Law and Environmental Law two separate fields
