Ecology Of Nusa Tenggara And Maluka:

Ecology of Nusa Tenggara Kathryn Monk,Yance De Fretes,2012-06-05 The Ecology of Nusa Tenggara and Maluku is a comprehensive ecological survey of a series ecologically diverse islands in the Pacific It contains extensive baseline data on the region s people ecosystems biodiversity and land use and discusses these in a historical as well as a developmental context It also provides guidelines for scientific researchers on worthwhile ecological and socio economic research projects This region is the most diverse in Indonesia Its myriad islands range from small atolls to active volcanic islands rising 3 500 meters above sea level Each province has extensive coastlines only 10 percent of the province of Maluku is land The seas include shallow continental shelves and some of the deepest sea basins in the world The complexity and vulnerability of these islands mean that development and environment are inextricably linked If this is not understood and acted upon there is no possibility for the ecologically sustainable development of Nusa Tenggara and Maluku *The Ecology of Nusa Tenggara and*

Maluku Kathryn A. Monk,Yance de Fretes,Gayatri Reksodiharjo-Lilley,1997 The Ecology of Nusa Tenggara and Maluku presents for the first time within one cover extensive baseline data on the region s natural history peoples ecosystems biodiversity and land use It discusses these in historical context as well as in the context of the socio economic development of the region Highly illustrated and accessible to any reader with an interest in the region it also provides guidelines to scientific researchers on worthwhile ecological and socio economic research projects It will be invaluable to all individuals involved in development planning and environmental management within the region **The Ecology of Indonesia Series:**

The ecology of Nusa Tenggara and Maluku ,1996 **The Ecology of Indonesia Series: The Ecology of Maluku and Nusa Tenggara** ,1996 *Ecology of Indonesian Papua Part Two* Andrew J. Marshall,Bruce M. Beehler,2012-06-26 The

Ecology of Papua provides a comprehensive review of current scientific knowledge on all aspects of the natural history of western Indonesian New Guinea Designed for students of conservation environmental workers and academic researchers it is a richly detailed text dense with biogeographical data historical reference and fresh insight on this complicated and marvelous region We hope it will serve to raise awareness of Papua on a global as well as local scale and to catalyze effective conservation of its most precious natural assets New Guinea is the largest and highest tropical island and one of the last great wilderness areas remaining on Earth Papua the western half of New Guinea is noteworthy for its equatorial glaciers its vast forested floodplains its imposing central mountain range its Raja Ampat Archipelago and its several hundred traditional forest dwelling societies One of the wildest places left in the world Papua possesses extraordinary biological and cultural diversity Today Papua s environment is under threat from growing outside pressures to exploit its expansive forests and to develop large plantations of oil palm and biofuels It is important that Papua s leadership balance economic development with good resource management to ensure the long term well being of its culturally diverse populace **Ecology of Sulawesi**

Tony Whitten,Greg S. Henderson,2012-06-19 The Ecology of Sulawesi is a comprehensive ecological survey of one of

Indonesia's least populated and most diverse islands. It is hoped that it will prove useful to resource managers, ecologists, environmental scientists and local government personnel and be enlightening to Sulawesi's inhabitants and visitors. Sulawesi is one of the least known islands of Indonesia and wise environmental management including the proper assessment of environmental management including the proper assessment of environmental impacts arising from development projects and other activities is currently very difficult.

Varieties of Religion and Ecology Zainal A. Bagir, Michael S. Northcott, Frans Wijzen, 2021. This collection presents critical environmental problems with respect to their intersection with culture and religion in Indonesia such as water resource management, conservation and political ecology. Scholars from the region ground investigation in ethnographic field studies that represent diverse communities including Indigenous perspectives from across the archipelago. The discussion is forward looking and sophisticated offering a meaningful and critical engagement with the field of religion and ecology. Anna M. Gade, Professor of Environmental Studies, University of Wisconsin-Madison, United States.

Owls of the World Claus König, Friedhelm Weick, Jan-Hendrik Becking, 2009-01-01. Owls are enduringly popular birds but due to their nocturnal habits most species are difficult to see well. The plumages of many species are cryptic and difficult to separate by plumage alone. This problem is compounded by the different morphs that many adopt. This book fully describes every known species and subspecies of owl as well as presenting the latest evidence on owl taxonomy based on DNA work and vocalisations. Because voice is vital in owl identification much emphasis is placed on it in the book and sonograms are provided for many species. A CD of owl vocalisations will accompany the book.

Anthropology and Cryptozoology Samantha Hurn, 2016-11-03. Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct, unclassified or unrecognised. In consequence and in part because of its selective methods and lack of epistemological rigour, cryptozoology is often dismissed as a pseudo science. However, there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware, scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them. In many cultural contexts, myth, folk classification and lived experience challenge the truth expounded by scientists. With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world, this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals. Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures.

Anthropology and Cryptozoology: Exploring encounters with mysterious creatures will be of interest to anthropologists, sociologists and geographers working in the fields of research methods, cryptozoology, mythology and folklore and human-animal interaction.

The Tomb of the Mili Mongga Samuel Turvey, 2024-02-15. The Tomb of the Mili Mongga lives up to its magnificent billing. DAILY TELEGRAPH. A fossil expedition becomes a thrilling search for a mythical beast deep in the Indonesian forest and a fascinating look at how fossils, folklore and biodiversity converge. A tale of exciting scientific

discovery The Tomb of the Mili Mongga tells the story of Samuel Turvey's expeditions to the island of Sumba in eastern Indonesia While there he discovers an entire recently extinct mammal fauna from the island's fossil record revealing how islands support some of the world's most remarkable biodiversity and why many of these unique endemic species are threatened with extinction or have already been lost But as the story unfolds an unexpected narrative emerges Sumba's Indigenous communities tell of a mysterious wildman called the mili mongga a giant yeti like beast that supposedly lives in the island's remote forests What is behind the stories of the mili mongga Is there a link between this enigmatic entity and the fossils that Sam is looking for And what did he discover when he finally found the tomb of a mili mongga Combining evolution anthropology travel writing and cryptozoology The Tomb of the Mili Mongga explores the relationship between biodiversity and culture what reality means from different cultural perspectives and how folklore fossils and conservation can be linked together in surprising ways *Sustainable Environmental Management* Jatna Supriatna, Ralph Lenz, 2025-08-02

Environmental sustainability in the developing world is the focus of this book Our purpose will not however be to produce an endless list of huge numbers of facts about the many developing countries Indonesia could be considered a proto typical example of a developing world country As an archipelago situated along the equator in Southeast Asia its location is ideal for a prototype almost all developing countries are tropical Kalimantan Sumatra and Papua in particular contain a substantial portion of the world's remaining equatorial rainforests rainforest management is among the most pressing global sustainability problems However Indonesia's forests are far from monolithic they include a large set of different biome types Indonesia's population is multi ethnic a characteristic not only of other very large developing countries like India and Nigeria but of nearly every African country and of many other formerly colonized regions Another factor favoring a prototype designation is a relatively recent escape from the category of severe under development Indonesia ranked eighth in the world in real per capita GDP growth rate between 1960 and 2018 not an atypical outcome for Southeast Asian market economies Thailand Malaysia Singapore and Myanmar ranked even higher EarthTrends of World Resources Institute Like most developing countries economic growth has mainly been sparked by exports of energy and mineral extraction products and plantation crops There is also manufacturing growth Indonesia has seven million cities and the world's sixth largest metro area by population At the same time many of the population remain engaged in agriculture many are extremely impoverished Environmental problems Indonesia encounters in its path to economic development are typical of those in other developing countries and solutions it may find can serve as guidelines for other developing countries anticipating a similar economic take off This book consists of 21 chapters on sustainability efforts in Indonesia by many stakeholders government local government private sectors NGOs and communities Religion in Environmental and Climate Change Dieter Gerten, Sigurd Bergmann, 2011-11-17 Climate change and other global environmental changes deserve attention by the the humanities they are caused mainly by human attitudes and activities and feed back to human societies Focussing on religion allows for

analysis of various human modes of perception action and thought in relation to global environmental change On the one hand religious organizations are aiming to become greener on the other hand some religious ideas and practices display fatalism towards impacts of climate change What might be the fate of different religions in an ever warming world This book gathers recent research on functions of religion in climate change from theological ethical philosophical anthropological historical and earth system analytical perspectives Charting the spread from regional case studies to global scale syntheses the authors demonstrate that world religions and indigenous belief systems are already responding in highly dynamic ways to ongoing and projected climate changes in theory and practice for better or for worse The book establishes the research field religion in climate change and identifies avenues for future research across disciplines Nage Birds Gregory

Forth,2013-01-11 This unusual and richly illustrated book is the story of the relationship between the Nage people of eastern Indonesia and the birds alongside which they co exist Based on fieldwork carried out over a period of some fifteen years it aims for a total view of how a human community interacts with another zoological class giving birds a chosen place in human ideas and social practice As well as a fascinating ornithological study of Indonesian bird life Nage Birds offers a much needed critique of current theoretical argument on how non Western societies categorize and evaluate different species and modes of being Faunal and Floral Migration and Evolution in SE Asia-Australasia Ian Metcalfe,Jeremy M.B. Smith, Mike

Morwood,Iain Davidson,2001-06-01 This multidisciplinary book focuses on the relationships and interactions between palaeobiogeography biogeography dispersal vicariance migrations and evolution of organisms in the SE Asia Australasian region The book investigates biogeographic links between SE Asia and Australasia which go back more than 500 million years It also focuses on the links between geological evolution and biological migrations and evolution in the region It was in the SE Asian region that Alfred Russell Wallace established his biogeographic line now known as Wallace s Line which was the beginning of biogeography Wallace also independently developed his theory of evolution based on his work in this area The book brings together for the first time geologists palaeontologists zoologists botanists entomologists evolutionary biologists and archaeologists in the one volume to relate the region s geological past to its present biological peculiarities The book is organized into six sections Section 1 Paleobiogeographic Background provides overviews of the geological and tectonic evolution of SE Asia Australasia and changing patterns of land and sea for the last 540 million years Section 2 Palaeozoic and Mesozoic Geology and Biogeography discusses Palaeozoic and Mesozoic biogeography of conodonts brachiopods plants dinosaurs and radiolarians and the recognition of ancient biogeographic boundaries or Wallace Lines in the region Section 3 Wallace s Line focuses on the biogeographic boundary established by Wallace including the history of its establishment its significance to biogeography in general and its applicability in the context of modern biogeography Section 4 Plant biogeography and evolution includes discussion on primitive angiosperms the diaspora of the southern rushes and environmental climatic and evolutionary implications of plants and palynomorphs in the region The biogeography and

migration of insects butterflies birds rodents and other non primate mammals is discussed in section 5 Non Primates The final section 6 Primates focuses on the biogeographic radiation migration and evolution of primates and includes papers on the occurrence and migration of early hominids and the requirements for human colonization of Australia Managing Coastal and Inland Waters Kenneth Ruddle, Arif Satria, 2010-09-08 Besides the erroneous assumption that tropical fisheries are open access the cases demonstrate that pre existing systems 1 are concerned with the community of fishers and ensuring community harmony and continuity 2 involve flexible multiple and overlapping rights adapted to changing needs and circumstances 3 that fisheries are just one component of a community resource assemblage and depend on both the good management of linked upstream ecosystems and risk management to ensure balanced nutritional resources of the community and 4 pre existing systems are greatly affected by a constellation of interacting external pressures **Bujangga Manik** Alexander Joseph West, 2025-05-26 Bujangga Manik is a narrative poem in Old Sundanese which opens a window onto the world of late 15th century maritime Southeast Asia The poem describes the spiritual development of a young man from Pakicilan in what is now West Java as he walks and sails across and around Java and Bali culminating with his death in a mountainside hermitage and ascension to heaven This volume is an exemplary edition of Bujangga Manik complete with a revised transliteration a new English translation detailed descriptions of the manuscript script and language and an extensive commentary on the poem's contents from its setting and characters to its descriptions of ocean going ships houses furniture perfumes and much else *Discourse, Power, and Resistance Down Under* Mark Vicars, Tarquam McKenna, 2014-02-07 DPR Down Under Volume 2 draws together a spirited collection of papers presented at the Australian Discourse Power and Resistance conference held in Darwin 2012 The volume of work addresses and seeks to contextualise the problematic question What counts as good research and who decides Each chapter in this volume written from differing theoretical and methodological positions articulates a notion of what could be considered as being good research and is in some way involved in speaking a truth back to power The chapters invite the reader to rethink and reconsider the inherently political critical and subversive nature of research from a range of critical investigations **Moments in Indonesian Film History** David Hanan, 2021-12-12 This book explores Indonesian cinema focusing on moments of unique creativity by Indonesian film artists who illuminate important but less widely known aspects of their multi dimensional society It begins by exploring early 1950s Indonesian neorealist films of the Perfini group which depict the ethos and emerging moral issues of the period of struggle for independence 1945-49 It continues by discussing four audacious political allegories produced in four discrete political eras including the Sukarno Suharto and Reformasi periods It also surveys the main approaches to Islam in both popular cinema and auteur films during the Suharto New Order One chapter celebrates the popular songs and B movies of the Betawi comedian Benyamin S which dramatize the experience of the poor in modernizing Jakarta Another examines persisting Third World dimensions of Indonesian society as critiqued in two experimental features The concluding chapter highlights

innovation in a renewed Indonesian cinema of the post Suharto Reformasi period 1999 2020 including films by an unprecedented generation of women writer directors

Early Modern Southeast Asia, 1350-1800 Ooi Keat Gin, Hoang Anh Tuan, 2015-10-08 This book presents extensive new research findings on and new thinking about Southeast Asia in this interesting richly diverse but much understudied period It examines the wide and well developed trading networks explores the different kinds of regimes and the nature of power and security considers urban growth international relations and the beginnings of European involvement with the region and discusses religious factors in particular the spread and impact of Christianity One key theme of the book is the consideration of how well developed Southeast Asia was before the onset of European involvement and how during the peak of the commercial boom in the 1500s and 1600s many polities in Southeast Asia were not far behind Europe in terms of socio economic progress and attainments

Enacting the Corporation

Marina Welker, 2014-03-21 What are corporations and to whom are they responsible Anthropologist Marina Welker draws on two years of research at Newmont Mining Corporation s Denver headquarters and its Batu Hijau copper and gold mine in Sumbawa Indonesia to address these questions Against the backdrop of an emerging Corporate Social Responsibility movement and changing state dynamics in Indonesia she shows how people enact the mining corporation in multiple ways as an ore producer employer patron promoter of sustainable development religious sponsor auditable organization foreign imperialist and environmental threat Rather than assuming that corporations are monolithic profit maximizing subjects Welker turns to anthropological theories of personhood to develop an analytic model of the corporation as an unstable collective subject with multiple authors boundaries and interests Enacting the Corporation demonstrates that corporations are constituted through continuous struggles over relations with and responsibilities to local communities workers activists governments contractors and shareholders
