Ecology Pollution And Environment:

Ecology of Industrial Pollution Lesley C. Batty, Kevin B. Hallberg, 2010-02-18 Written for researchers and practitioners in environmental pollution management and ecology this interdisciplinary account explores the ecological issues associated with industrial pollution to provide a complete picture of this important environmental problem from cause to effect to solution Bringing together diverse viewpoints from academia and environmental agencies and regulators the contributors cover such topics as biological resources of mining areas biomonitoring of freshwater and marine ecosystems and risk assessment of contaminated land in order to explore important questions such as What are the effects of pollutants on functional ecology and ecosystems Do current monitoring techniques accurately signal the extent of industrial pollution Does existing policy provide a coherent and practicable approach Case studies from throughout the world illustrate major themes and provide valuable insights into the positive and negative effects of industrial pollution the provision of appropriate monitoring schemes and the design of remediation and restoration strategies

Environmental Ecology Bill Freedman, 2013-09-25 Environmental Ecology The Impacts of Pollution and Other Stresses on Ecosystem Structure and Function deals with environmental studies on the ecological impacts of anthropogenic stresses The book discusses more particularly the ways that anthropogenic or natural influences affect the quality of the inorganic and biotic components of the biosphere as well as the human environment The text discusses the sources of air pollution the different toxic elements naturally occurring contamination or anthropogenic sources and acidifying substances or acid rain The author also cites several studies that deal with the reclamation of acidified bodies of water Another topic the author addresses is declining forest areas he then cites several case studies of this occurrence such as those by Fowells 1965 Hepting 1971 and Auclair 1987 The text also investigates the ecological effects of oil pollution caused during the refining process and transportation The author then examines the general response patterns to ecological stress The text is intended for advanced students of environmental ecology and environmental science as well as for ecologists environmentalists and urban planners and officials
