Mourning Dove Hunting Regulations and Harvest (chapter 19 in The Mourning Dove of North America: Ecology and Management) Kenneth C. Sadler, Missouri. Department of Conservation, 1985 *The Upland and Webless Migratory Game Birds of Texas* Leonard A. Brennan, Damon L. Williford, Bart M. Ballard, William P. Kuvlesky, Eric D. Grahmann, Stephen J. DeMaso, 2017-02-17 Authored by some of the state's top wildlife scientists *The Upland and Webless Migratory Game Birds of Texas* presents the most up to date and comprehensive information covering twenty one species of game birds Ranging from the most well known like the Wild Turkey and Mourning Dove to the marsh loving rails and other more elusive species these birds have widespread appeal among both hunters and birders and underscore the diverse challenges facing wildlife scientists land managers and conservationists in Texas today From cultural significance to taxonomy and evolutionary history

this volume provides a wealth of background information on these species. Additionally, the book offers illustrated species accounts, detailed range maps, and information about habitat and management requirements, hunting regulations, and research priorities. Readers will gain a deeper understanding of these game birds and the array of terrestrial and wetland landscapes key to their survival. This will serve as a convenient and thorough reference volume for wildlife biologists and enthusiasts as well as landowners and hunters. Thomas C. Tacha, Clait E. Braun, 1994 **Ecology for Nonecologists** Frank R. Spellman, 2008. Written for anyone who works with chemicals or has a general interest in ecology, this book examines the interrelationship of life forms in our environment and provides straightforward explanations about the complicated interactions among nature and humans. Emphasizing basic concepts, definitions, and descriptions, the author presents illustrative problems in terms of commonly used ecological parameters to provide readers with enough information to make technical and personal decisions about ecology. Funneling the broad multidisciplinary field of ecology, which incorporates aspects of biology, chemistry, physics, geology, meteorology, agriculture, forestry, and more into a single stream, the author provides those with backgrounds in only a handful or even none of these disciplines with an easy-to-read understanding of the functions and values of ecology and its interrelationships with other sciences, including ecology's direct impact on our lives. Organized into three parts, this book examines the fundamentals of ecology, the role of biodiversity, and the practical side of ecology. Readers will examine such topics as biogeochemical cycles, ecological pyramids, and the laws of population ecology. They will also examine species, terrestrial ecosystems, and aquatic systems. Each chapter ends with a Chapter Review Test. **Sex in City Plants, Animals, Fungi, and More** Kenneth D. Frank, 2022-04-19. Cities pose formidable obstacles to nonhuman life. Vast expanses of asphalt and concrete are inhospitable to plants and animals; traffic noise and artificial light disturb natural rhythms; sewage and pollutants imperil existence. Yet cities teem with life. In rowhouse neighborhoods, tiny flowers bloom from cracks in the sidewalk. White clover covers lawns; its seeds dispersed by shoes and birds. Moths flutter, and spiders weave their webs near electric lights. Sparrows and squirrels feast on the scraps people leave behind. Pairs of red-tailed hawks nest on window ledges. How do wild plants and animals in urban areas find mates? How do they navigate the patchwork of habitats to reproduce while avoiding inbreeding? In what ways do built environments enable or inhibit mating? This book explores the natural history of sex in urban bacteria, fungi, plants, and nonhuman animals. Kenneth D. Frank illuminates the reproductive behavior of scores of species. He examines topics such as breeding systems, sex determination, sex change, sexual conflict, sexual trauma, sexually transmitted disease, sexual mimicry, sexual cannibalism, aphrodisiacs, and lost sex. Frank offers a guide to urban reproductive diversity across a range of conditions, showing how understanding of sex and mating furthers the appreciation of biodiversity. He presents reproductive diversity as elegant but vulnerable, underscoring the consequences of human activity. Featuring compelling photographs of a multitude of life forms in their city habitats, this book provides a new
