**Ecology of plants in the tropics** Daniel H. Janzen, 1977      Physiological Ecology of Tropical Plants Ulrich Lüttge, 2013-03-09 This richly illustrated text covers the ecophysiology of plants of all major tropical ecosystems from tropical rain forests epiphytic habitats mangroves and savannas to salinas inselbergs and paramos and their ecophysiological adaptation to these different tropical environments The physiognomy of biotopes and characteristic life forms of plants are depicted with photographs

**Physiological Ecology of Tropical Plants** Ulrich Lüttge, 2007-12-14 Since the publication of the first edition of this book ten years ago international research into the physiological ecology of plants in the tropics has increased enormously in quantity and quality This brand new edition brings the story right up to date New approaches have been developed in remote sensing while at the other end of the scale molecular biology has come on in leaps and bounds particularly regarding ecological performance of tropical plants e g in understanding the adaptation of resurrection plants to the extreme habitat of inselbergs In this fully revised and updated second edition the wealth of new information has made it necessary to break large chapters down into smaller ones

**Physiological ecology of plants of the wet tropics** Ernesto Medina, H.A. Mooney, C. Vazquez-Yanes, 2012-12-06 This book contains the results of a Symposium on the physiological ecology of plants of the lowland wet tropics held in Mexico in June 1983 organized by the Instituto de Biología of the National University of Mexico U N A M and sponsored by UNAM CONACYT NSF and UNESCO CIET A workshop portion of the Symposium was held at the tropical research station at Los Tuxtlas Veracruz This Symposium originated in response to the increasing interest in the physiological ecology of tropical plants because of the potential of this field to provide a basic understanding of functioning of tropical plant communities The study of physiological ecology of tropical plants has been delayed in some cases by the lack of conceptual framework but also by the absence of appropriate instrumentation and techniques with which to conduct precise measurements under high temperature high humidity field conditions Hypotheses and concepts of the physiological ecology of tropical plants have been based mainly on observational data and the analysis of growth forms and leaf anatomy The early work of A F W Schimper and O Stocker in Asia and the extensive surveys made by H Walter on the osmotic potentials of plants in the tropics and subtropics constituted until relatively recently the only available information on the water and carbon relations of tropical plants

**Reproductive Ecology of Tropical Forest Plants** K.S. Bawa, M. Hadley, 1991-01-15 Reproductive Ecology of Tropical Forest Plants reviews recent developments in the reproductive ecology of tropical forest plants and explores the implications of current findings on forest structure function management and conservation It examines how insights gained from reproductive ecology can be helpful in the management of tropical forest resources and discusses directions of future research
