Economic Analysis Beyond The Local System:

Economic analysis beyond the local system Richard E. Blanton, 1996-12-19 Co published with the Society for Economic Anthropology this work explores the social political and economic contexts and consequences of economic interaction beyond the local systems Because the focus of economic analysis is often local particularly in anthropology this book specifically aims analysis beyond the local system of economic interaction **The Mesoamerican World System, 200-1200 CE** Peter Jiménez, 2020-08-27 This is the first application of the comparative approach of world systems analysis in Mesoamerican archaeology **World-systems Theory in Practice** P. Nick Kardulias, 1999 In the quarter century since Wallerstein first developed world systems theory WST scholars in a variety of disciplines have adopted the approach to explain intersocietal interaction on a grand scale These essays bring to light archaeological data and analysis to show that many historic and prehistoric states lacked the mechanisms to dominate the distant and in some cases nearby societies with which they interacted Core periphery exploitation needs to be demonstrated not simply assumed as the interdisciplinary dialogue which occurs in this volume demonstrates World Systems Theory in Practice will appeal to individuals with an interest in the application of WST in both the Old World and the New World The papers in this volume reflect the vitality of the debate concerning the use of such generalizing theories and will be of interest to archeologists anthropologists historians sociologists and those involved in the study of civilizations **A World-Systems Reader** Thomas D. Hall, 2000-03-01 This book brings together some of the most influential new research from the world systems perspective The authors survey and analyze new and emerging topics from a wide range of disciplinary perspectives from political science to archaeology Each analytical essay is written in accessible language so that the volume serves as a lucid introduction both to the tradition of world systems thought and the new debates that are sparking further research today **Ancient Oaxaca** Richard E. Blanton, Gary M. Feinman, Stephen A. Kowalewski, Linda M. Nicholas, 2022-07-28 Over two thousand years ago Oaxaca Mexico was the site of one of the New World's earliest episodes of primary state formation and urbanism and today it is one of the world's archaeologically best studied regions This volume which thoroughly revises and updates the first edition provides a highly readable yet comprehensive path to acquaint readers with one of the earliest and best known examples of Native American state formation and its consequences as seen from the perspectives of urbanism technology demography commerce households and religion and ritual Written by prominent archaeological researchers who have devoted decades to Oaxacan research and to the development of suitable social theory the book places ancient Oaxaca within the context of the history of ideas that have addressed the causes and consequences of social evolutionary change It also critically evaluates the potential applicability of more recent thinking about state building grounded in collective action and related theories

The Politics of Swidden farming Debojyoti Das, 2018-09-28 The Politics of Swidden Farming offers a new explanation for the changes taking place in swidden farming practised in the highlands of eastern India through an ethnographic case study

The book traces the story of agroecological change and state intervention to colonial times and helps understand contemporary agrarian change by contextualizing farming not just in terms of the science and technology of agriculture or conservation and biodiversity but also in terms of technologies of rule The Politics of Swidden Farming adds a new dimension to the underdeveloped literature on shifting cultivation in South Asia by focusing on the social ecology of farming and agrarian change in the hills It provides a comparative viewpoint to state centred and donor driven development in the frontier region by bringing in different actors and institutions that become the actants and agents of social change

Collective Action in the Formation of Pre-Modern States Richard Blanton, Lane Fargher, 2008 Anthropological archaeology and other disciplines concerned with the formation of early complex societies are undergoing a theoretical shift Given the need for new directions in theory the book proposes that anthropologists look to political science especially the rational choice theory of collective action The authors subject collective action theory to a methodologically rigorous evaluation using systematic cross cultural analysis based on a world wide sample of societies *Transforming the Indonesian Uplands* Tania Li, 2005-06-27 Drawing upon current theoretical debates in social anthropology development studies and political ecology and presenting original research from across the Archipelago this book addresses the changing histories and identities of upland people as they relate in new ways to the natural resource base to markets and to the state It is an engaged study which fills important analytical gaps and addresses real world concerns exploring the uplands as components of national and global systems of meaning power and production It offers a significant re assessment of concepts processes histories relationships and discourses many of which are not unique to either the uplands or Indonesia making the book essential and compelling reading for both scholars and practitioners **Borderlines in a Globalized World** G.

Preyer, Mathias Bös, 2013-11-11 Scholars of different schools have extensively analyzed world systems as networks of communication under the fashionable heading globalization Our collected new research pushes the argument one step further Globalization is not a homogenization of all social life on earth It is a heterogeneous process that connects the global and the local on different levels To understand these contemporary developments this book employs innovative concepts strategies of research and explanations Globalization is a metaphor for different borderstructures new borderlines and conditions of membership which emerge in a global world system As a world system expands it incorporates new territories and new peoples The process of incorporation creates frontiers or boundaries of the world system These frontiers or boundary zones are the locus of resistance to incorporation ethnogenesis ethnic transformation and ethnocide
